HOW THIS BOOK CAN BOOST YOUR PROFIT PERFORMANCE	9
1. MAXIMIZE YOUR PROFITS	21
Where the Magic Is	21
To Trade or to Invest	22
The Most Dollars in the Least Time	22
How the Trading Interval Affects Profits	23
Adding Magic by Compounding	26
Maintaining 100% Investment	26
Four Steps to Riches	26
2. TIMING IS THE KEY	28
Something New and Unconventional Is Required	29
What Makes Prices Change	30
The Impact of Historical Events	30
The Source of Trends	30
“X” Motivation – and What It Does to Prices	31
How Cyclicity Expresses Itself in the Market	31
The Summation Principle	32
The Commonality Principle	32
The Variation Principle	32
The Nominality Principle	33
The Proportionality Principle	33
The Significance of Cyclicity	35
How to Go About Observational Analysis	36
“Nesting” Envelopes Upward	38
“Nesting” Down	39
Using Expanded or Contracted Data	40
Extracting Cyclic Model Elements	44
Cyclicity in Individual Issues	44
How Synchronization Is Expressed	48
Summing It All Up	48
3. VERIFY YOUR CHART PATTERNS	51
Why Trend Lines and Channels Form and Repeat	52
Where Head and Shoulder Patterns Come From	52

About Double Tops and Bottoms	57
The Significance of Triangles	57
How to Tell in Advance if a Chart Pattern Will "Fail"	59
Understanding Other Chart Patterns	61
How Cyclicity Gives Meaning to Chart Patterns	61
The Significance of Moving Averages	62
Why Ten- and 30-Week Moving Averages Are Useful	64
How to Plot and Interpret a Moving Average Properly	65
How a Moving Average Can Aid Cyclic Analysis	65
Summarizing Chart Patterns	66
4. TIMING YOUR BUYS WITH GRAPHICS	68
Prediction by Graphics	68
How to Construct Curvilinear Envelopes	69
Prediction of Price Turns Using Envelopes	70
Use This Example as Your Channel Prediction Guide	71
Constructing the Dominant Channel	73
Finding the Outer Envelope	74
Setting Up Price-Turn Predictions	75
The Kind of Results You Can Achieve	76
How to Generate Graphic "Buy" Signals	77
What to Look For	78
Recognizing the "Valid Trend Line"	78
"Edge-Band" Transaction Timing	79
"Mid-Band" Transaction Timing	82
Points to Remember Regarding Graphic "Buy" Signals	85
5. YOU'VE MADE SOME MONEY – HOW TO KEEP IT	86
Use of Logical Cut-Loss Criteria	86
Extension to Trailing "Sell" Signals	88
How to Construct Selling Analogs	90
How to Make and Use Non-Real Time Envelopes	91
Selling Short	93
Selling Rules to Remember	95
6. COMPUTE YOUR WAY TO INCREASED PROFITS	97
Why You Need Computational Aids	97
How to Construct and Use Half-Span Moving Averages	97
Other Uses for Half- and Full-Span Moving Averages	108
Now Turn Your Moving Averages Inside Out	109
Use the Inverse Half-Span Average to Improve Your Timing	109
Try the Inverse Average in Other Ways	112
7. HOW TO SELECT AND TRACK TRADING ISSUES	114
Alternative Ways of Selecting Investment Vehicles	114
The Total Scanning Concept	115
Making Use of Screening Criteria	116
Selecting Candidates for Volatility	117

Applying Stability Factors	118	
A Word of Caution and Emphasis	119	
When You Should Use Alternative Scanning Methods	119	
Take Advantage of the "Stable" Concept	120	
How to Track Your Stable	121	
Summing Up Selection and Tracking	122	
8. TRADING BY LOGIC INSTEAD OF BY GUESS		123
The Tools at Your Command	123	
The Anatomy of a Trade	124	
Determining the "State of the Market"	124	
Selecting the Issue	127	
The Next Step Is Analysis	127	
Forming the Valid Downtrend Line	131	
Computing Potential and Risk	131	
A Model Transaction	132	
A Trading Experiment	135	
Prediction of the Averages	138	
The Results of Industry Group Predictions	138	
Specific Issues Involved	138	
Conclusions	139	
9. WHY STOCK PRICES CHANGE		141
How Decision-Making Enters the Picture	142	
Understanding Irrational Decision Processes	144	
What You Should Know About Fundamental Factors	145	
How Company-Related Fundamentals Affect Prices	146	
The Influence of Broad Environmental Factors	147	
Should You Sell in Event of War?	147	
What About Currency Devaluations?	147	
How National Crisis Should Affect Your Decisions	149	
How the GNP Affects the Market	149	
Now Compare Cyclicalities vs. History!	151	
The Impact of the Fall of France	151	
Here is How Long-Range Cyclicalities Affects the Market	154	
Summarizing Price Change Causes	157	
10. PITFALLS AND HOW TO AVOID THEM		158
Why the Unexpected Occurs	159	
Recognizing Psychological Barriers	160	
Counteracting the Outside Influence	160	
Overcoming Greed	162	
Beat the "Persimmon Effect"	163	
The Bugaboo of Time Distortion -- and What to Do About It	164	
Dealing With "Scale Effect"	165	
Combating Emotional Cyclicalities	166	
In a Nutshell	167	

11. SPECTRAL ANALYSIS – HOW TO DO IT AND WHAT IT MEANS 168
Why Numerical Analysis	169
The Meaning of a Frequency Spectrum	169
How to Do Fourier Analysis	171
Assembling Your Data	171
Separating Your Data Into Two Sequences	172
Determining the Frequencies in Your Analysis	172
Now Compute the Corresponding Amplitudes	173
How to Get Composite Amplitudes	175
The Kind of Results You Can Expect	175
How Numerical Filters Can Help You	175
What You Must Know About Filter Operation	176
The Part of "Weights" in Numerical Filters	177
How to Design Your Own Numerical Filters	178
Applying Your Numerical Filter to Stock Prices	182
Take Advantage of Curve Fitting	183
Fit Your Data With a Straight Line	184
How to Use Other Kinds of Curve Fitting	185
Summarizing Numerical Analysis	185

APPENDICES

I. THE NOT-TO-BE-EXPECTED "ORDER" OF SPECTRAL RELATIONSHIPS IN STOCK PRICE DATA188
The Implications of Fourier Analysis of Stock Prices	188
Course Frequency Structure	190
Fine Frequency Structure	190
Amplitude-Frequency Relationships	191
The Use of Comb Filters	191
The Variables Involved	196
Best Estimate of Spectral Line Spacing	196
The Line Spectral Model	199
II. EXTENSION OF "AVERAGE" RESULTS TO INDIVIDUAL ISSUES	... 201
A Basis For the Principle of Commonality	201
Spectral Signatures, Fundamentals, and Time Synchronization	201
III. THE SOURCE AND NATURE OF TRANSACTION INTERVAL EFFECTS 204
Theoretical Yield-Rate Maximums vs. Transaction Interval	204
The Impact of Compounding	204
The Effect of Sinusoidal Rate Summation	206
IV. FREQUENCY RESPONSE CHARACTERISTICS OF A CENTERED MOVING AVERAGE207
Response Derivation	207
Response Characteristics	207
Application Implications	207

Response of the Inverse Centered Moving Average 210

V. PARABOLIC INTERPOLATION212
 Three-Point Interpolation 212
 Equation Derivation 213

VI. TRIGONOMETRIC CURVE FITTING215
 Generalized Least-Square-Error Methods 215
 Solving for Frequency 216
 Computing Amplitudes 217
 Determining Composity Amplitudes and Phases 217

BIBLIOGRAPHY218

INDEX220
