

Contents

Foreword	v
Preface	vii
Acknowledgments	xvii

Part I: AutoCAD Basics 1

Chapter 1: Starting to Draw 3

Getting Acquainted with AutoCAD	3
Starting AutoCAD	4
Creating a New Drawing	5
Working with AutoCAD Today	5
Using AutoCAD Today to create a new drawing	6
Using the AutoCAD Interface	7
The drawing area	8
The menus and toolbars	9
The command line	10
The status bar	10
Creating Your First Drawing	10
Toolbars	10
Drawing a rectangle	11
Saving a Drawing	13
Closing a Drawing and Exiting from AutoCAD	16

Chapter 2: Opening a Drawing 19

Creating a New Drawing from a Template	19
Working with Templates	20
Customizing the default template	21
Creating your own templates	24
Opening a Drawing with Default Settings	24
Opening an Existing Drawing	25
Opening a drawing from AutoCAD Today	25
Opening an existing drawing within AutoCAD	26
Using dialog boxes to open drawings	27
Using an Existing Drawing as a Prototype	27
Saving a Drawing Under a New Name	28

Chapter 3: Using Commands 31

The Windows Interface	31
Using AutoCAD's menus	31
Using shortcut menus	33
Using dialog boxes	34
Using toolbars	35
The Command Line	38
Understanding command names	38
Responding to command options	40
Command Techniques	41
Repeating commands	42
Canceling commands	42
Undoing a command	43
Redoing a command	45
Using the OOPS command	45
Using one command within another command	46
Of Mice and Pucks	48
Getting Help in AutoCAD	49
Getting help on a command	50
Using the main help system	50
Working with help screens	52
Using Active Assistance	52
Getting more help	53

Chapter 4: Specifying Coordinates 57

Understanding the X,Y Coordinate System	57
Drawing units	58
Types of measurement notation	58
Typing Coordinates	59
Absolute Cartesian coordinates	59
Relative Cartesian coordinates	61
Polar coordinates	62
Direct distance entry	64
Orthogonal mode	65
Polar tracking	65
Displaying Coordinates	69
Picking Coordinates on the Screen	70
Snap settings	70
Object snaps	75
Running object snaps and OSNAP mode	80
Locating Points	83
Object snap tracking	83
Point filters	88
From	90

Chapter 5: Setting Up a Drawing 93

Unit Types	93
Setting the drawing units	95
Setting the angle type	96
Setting the angle measure and direction	97
Drawing Limits	99
Setting drawing limits	100
Understanding scales	101
Inserting a Title Block	106
Common Setup Options	107
Setting blips	107
Setting snap, grid, and ortho	108
The MVSETUP Command	110

Part II: Drawing in Two Dimensions 113**Chapter 6: Drawing Simple Lines 115**

Using the LINE Command	115
Drawing Rectangles	116
Drawing Polygons	119
Creating Construction Lines	121
Creating Rays	123

Chapter 7: Drawing Curves and Point Objects 125

Drawing Circles	125
Understanding the circle options	125
Drawing circles	126
Drawing Arcs	129
Understanding arc options	129
Drawing arcs	130
Creating Ellipses and Elliptical Arcs	133
Understanding ellipse options	133
Drawing ellipses	134
Making Donuts	137
Understanding DONUT options	137
Drawing donuts	138
Placing Points	138
Changing the point style	138
Creating points	139

Chapter 8: Viewing Your Drawing 143

Understanding How AutoCAD Displays Drawings	143
Panning	144

Using the PAN command	144
Using the scroll bars	145
The ZOOM Command	147
Understanding ZOOM options	147
ZOOM Dynamic	148
Aerial View	152
Zooming and panning with Aerial View	152
Understanding Aerial View options	153
Using Aerial View	154
Named Views	155
Saving a view	156
Displaying a view	157
Using other view control functions	158
Using Named Views to Open a Drawing	159
A drawing with a view	159
Partially opening a drawing	159
Tiled Viewports	160
Configuring tiled viewports	161
Using tiled viewports	164
Saving and restoring viewport configurations	165
Snap Rotation	168
User Coordinate Systems	170
Understanding UCS options	170
Saving and restoring a custom UCS	171
Controlling the UCS icon	172
Using a custom UCS	174
Isometric Drawing	176
Understanding isometric planes	176
Drawing in isometric mode	177

Chapter 9: Editing Your Drawing: Basic Tools 181

Editing a Drawing	181
Understanding object-selection basics	182
Erasing objects	183
Moving objects	184
Copying objects	187
Copying and moving objects from one drawing to another	190
Rotating objects	192
Scaling objects	195
Using the CHANGE command	197
Selecting Objects	200
Selecting objects after choosing a command	201
Cycling through objects	205
Selecting objects before choosing a command	207
Implied windowing	207
Customizing the selection process	209

Chapter 10: Editing Your Drawing: Advanced Tools 215

Copying and Moving Objects	215
Using the MIRROR command	215
Using the ARRAY command	217
Offsetting objects	223
Aligning objects	225
Resizing commands	227
Extending objects	231
Lengthening objects	234
Stretching objects	237
Using Construction Commands	239
Breaking objects	240
Creating chamfered corners	243
Creating rounded corners	245
Double-Clicking to Edit Objects	248
Grips	249
Stretching with grips	250
Moving with grips	252
Rotating with grips	253
Scaling with grips	253
Mirroring with grips	254
Customizing grips	257
Editing with the Object Property Manager	257
Selection Filters	261
Using Quick Select to select objects	261
Using the FILTER command	263
Naming and editing filters	266
Using filters	267
Groups	269
Creating and modifying groups	269
Changing a group	270
Using groups	271

Chapter 11: Organizing Drawings with Layers, Colors, Linetypes, and Lineweights 275

Working with Layers	276
Understanding layers	276
Creating new layers	277
Using layers	284
Modifying layers	292
Changing Object Color, Linetype, and Lineweight	297
Changing an object's color	297
Changing the current color	299
Changing an object's linetype	300
Changing the current linetype	301
Changing an object's lineweight	301
Changing the current lineweight	302

Working with Linetype Scales	304
Changing linetype spacing by using a different linetype	304
Changing linetype spacing by changing the global linetype scale	305
Changing linetype spacing by changing the object linetype scale	307
Importing Layers and Linetypes from Other Drawings	309
Matching Properties	310

Chapter 12: Getting Information from Your Drawing 315

Drawing-Level Information	315
Listing the status of your drawing	315
Listing system variables	316
Tracking drawing time	318
Object-Level Information	320
Listing objects	320
Calculating distances	321
Finding coordinates	321
Calculating area and perimeter	323
Getting information from the Object Property Manager	326
Measurement Commands	327
Dividing objects	327
Measuring objects	328
AutoCAD's Calculator	330
Calculating numbers	330
Using coordinates	331
Using object snaps	331
Using mathematical functions	333
Using CAL's special functions	334

Chapter 13: Creating Text 339

Creating Single-Line Text	339
Justifying single-line text	340
Setting the height	342
Setting the rotation angle	343
Adding special characters and formatting	344
Using the TEXT command	346
Editing single-line text	346
Understanding Text Styles	350
Creating a new text style	351
Renaming and deleting text styles	353
Changing a text style	354
Making a style current	355
Importing a text style	356

Creating Multiline Text	356
Using the Multiline Text Editor	357
Editing paragraph text	361
Importing text	362
Managing Text	364
Using Quicktext	364
Using AutoCAD fonts	365
Freezing text layers	366
Using MIRRTEXT	366
Finding Text in Your Drawing	368
Checking Your Spelling	369
Customizing the spelling dictionary	370

Chapter 14: Drawing Dimensions 373

Working with AutoCAD's Dimensions	373
The elements of a dimension	373
Preparing to dimension	375
Drawing Linear Dimensions	376
Specifying the dimensioned object	376
Using dimension options	379
Drawing Aligned Dimensions	384
Specifying the dimensioned object	384
Using the options	385
Creating Baseline and Continued Dimensions	387
Drawing baseline dimensions	388
Drawing continued dimensions	388
Dimensioning Arcs and Circles	391
Marking arc and circle centers	391
Creating radial dimensions	392
Creating diameter dimensions	392
Dimensioning Angles	393
Creating Ordinate Dimensions	397
Drawing Leaders	400
Using the Leader Settings dialog box	401
Creating a leader	404
Using Quick Dimension	406
Editing Dimensions	409
Editing associativity	409
Using the DIMEDIT command	412
Using the DIMTEDIT command	412
Using DDEDIT to edit dimension text	413
Using the Object Property Manager to edit dimensions	414
Using Quick Dimension to edit dimensions	414
Using grips to edit dimensions	416
Editing objects and dimensions together	417

Chapter 15: Creating Dimension Styles and Tolerances 421

Understanding Dimension Styles	421
Defining a New Dimension Style	423
Managing dimension lines and arrows	423
Managing dimension text	430
Fitting dimensions into tight spaces	434
Defining primary units	439
Defining alternate units	442
Formatting tolerances	444
Changing Dimension Styles	447
Choosing a new current dimension style	448
Creating a variant of a dimension style	448
Modifying a dimension to use a new dimension style	448
Modifying dimension styles	449
Overriding a dimension style	449
Updating a dimension style	450
Comparing dimension styles	450
Copying dimension styles from other drawings	451
Creating Geometric Tolerances	456
Starting the tolerance frame	456
Inserting the tolerance frame	459
Editing a tolerance frame	459

Chapter 16: Drawing Complex Objects 461

Creating and Editing Polylines	461
Using the PLINE command	462
Editing polylines with the PEDIT command	466
Editing polylines using the Properties window	468
Drawing and Editing Splines	470
Creating splines	470
Editing splines	472
Creating Regions	477
Creating Boundaries	479
Using Hatches to Create Solid or Patterned Fills	481
Understanding hatch patterns	481
Defining a hatch	482
Determining the hatch boundary	485
Dragging and dropping hatch patterns	489
Editing hatches	490
Using the SOLID command	492
Creating and Editing Multilines	493
Creating a multiline style	493
Drawing multilines	499
Editing multilines: Double-clicking to edit	501
Using the SKETCH Command	506
Digitizing Drawings with AutoCAD's TABLET Command	508

Chapter 17: Plotting and Printing Your Drawing 511

Preparing a Drawing for Plotting or Printing	511
Doing a draft plot	512
Plotting a drawing from model space	512
Creating a Layout in Paper Space	512
Entering paper space	512
Using the Layout Wizard	513
Laying out a drawing in paper space on your own	517
Working with Plot Styles	530
Setting the plot style mode	531
Creating a plot style table	532
Attaching a plot style table to a layout	538
Setting the plot style property for a layer or object	539
Plotting a Drawing	541
Choosing a plotter/printer	542
Previewing your plot	545
Creating the plot	546
Batch Plotting	546
Specifying how to plot	547
Selecting a page setup	548
Choosing a plotter or printer	548
Specifying plot settings	549
Plot testing	550
Plot logging	550
Starting the batch plot	551
Creating Plot Stamps	552

Part III: Working with Data

555

Chapter 18: Working with Blocks and Attributes 557

Combining Objects into Blocks	558
Understanding base points and insertion points	558
Creating a block	559
Redefining a block	561
Saving blocks as files	563
Replacing an existing file	564
Inserting Blocks and Files into Drawings	565
Using the Insert dialog box	566
Using the AutoCAD DesignCenter	568
Managing Blocks	573
Working with layers	573
Exploding blocks	577
Using the XPLODE command	577
Editing blocks	579
Organizing blocks	582

Using Windows Features	583
Manipulating objects with the Windows clipboard	584
Using drag-and-drop	584
Working with Attributes	588
Creating attribute definitions	589
Inserting blocks with attributes	594
Editing attributes	595
Extracting a database from attributes	602

Chapter 19: Referencing Other Drawings 609

Understanding External References	609
Attaching an external reference	610
Viewing xref relationships	611
Editing an Xref within Your Drawing	615
Choosing the xref or block to edit	616
Editing the xref	617
Controlling Xref Display	619
Xrefs and dependent symbols	620
Circular references	621
Clipping xrefs	621
Speeding up the display of large xrefs	622
Managing Xrefs	627
The Xref Manager	627
AutoCAD DesignCenter	627
The Xref log file	629

Chapter 20: Working with External Databases 633

Understanding External Database Access	633
Preparing for Database Connectivity	635
Installing AutoCAD's database feature	635
Organizing the database structure	636
Configuring a data source	637
Connecting to Your Database	641
Connecting a database to a drawing	642
Opening a data table	643
Editing data in the Data View window	648
Linking Data to Drawing Objects	649
Creating a link template	649
Creating a link	651
Creating Labels	657
Creating label templates	657
Creating attached labels	659
Creating freestanding labels	660
Querying with the Query Editor	661
Using the Quick Query tab	662
Using the Range Query tab	663

Using the Query Building tab	664
Using the SQL Query tab	666
Creating selection sets with Link Select	668
Working with Query Files	670
Storing queries	670
Importing and exporting queries	671
Converting prior release links to AutoCAD 2002 format	671

Part IV: Drawing in Three Dimensions

673

Chapter 21: Specifying 3D Coordinates 675

Working with 3D Coordinates	676
Absolute and relative Cartesian coordinates in 3D	677
Cylindrical and spherical coordinates	677
Using editing commands with 3D wireframes	679
Using point filters, object snaps, and grips in 3D	683
Creating 3D polylines	685
Using Elevation and Thickness	686
Creating surfaces with thickness	686
Using the HIDE command	687
Adding elevation to objects	690
Working with the User Coordinate System	692
Using the UCS icon	692
UCS options	694

Chapter 22: Viewing 3D Drawings 701

Working with the Standard Viewpoints	702
Using the VPOINT command	702
Looking at a drawing from the standard viewpoints	703
Using DDVPOINT	709
Working with the Tripod and Compass	712
Getting a Quick Plan View	717
Shading Your Drawing	719
Using the shading options	720
Using materials	720
Using 3D Orbit	723
Starting 3D orbit	723
Refining your 3D orbit view	729
Using Tiled Viewports	736
Defining a Perspective View	736
Using DVIEW	737
Understanding the DVIEW options	737
Laying Out 3D Drawings	744
Using SOLVIEW to lay out paper space viewports	744
Using SOLDRAW to create hidden lines and hatching	746
Using SOLPROF to create profiles	747

Chapter 23: Creating 3D Surfaces 749

Drawing Surfaces with 3DFACE	750
Using the 3DFACE command	751
Making 3D face edges invisible	751
Drawing Surfaces with PFACE	758
Creating Polygon Meshes with 3DMESH	763
Drawing Standard 3D Shapes	765
Box	766
Wedge	767
Pyramid	768
Cone	769
Sphere	770
Dome	771
Dish	772
Torus	773
Mesh	775
Drawing a Revolved Surface	778
Determining the angle of rotation	779
Setting the number of segments	779
Using the REVSURF command	780
Drawing an Extruded Surface	782
Drawing Ruled Surfaces	785
Drawing Edge Surfaces	788

Chapter 24: Creating Solids and Editing in 3D 791

Drawing Standard Shapes	792
Drawing a box	793
Drawing a sphere	794
Drawing a cylinder	795
Drawing a cone	796
Drawing a wedge	797
Drawing a torus	798
Creating Extruded Solids	800
Drawing Revolved Solids	803
Creating Complex Solids	805
Adding solids	805
Subtracting solids	806
Creating a solid from the intersection of two solids	807
Creating a new solid using INTERFERE	807
Sectioning and Slicing Solids	811
Using the SECTION command	811
Using the SLICE command	812
Using Editing Commands in 3D	815
Mirroring in 3D	816
Array in 3D	818
Rotating in 3D	821

Aligning in 3D	824
Trimming and extending in 3D	826
Filleting in 3D	828
Chamfering in 3D	831
Exploding 3D objects	834
Editing Solids	835
Editing faces	835
Editing edges	843
Editing bodies	844
Listing Solid Properties	847

Chapter 25: Rendering in 3D 851

Understanding Rendering	851
Learning the steps	852
Doing a default rendering	852
Creating Lights	855
Assigning color to a light	855
Setting the North location	856
Setting the ambient light	856
Creating a point light	856
Creating a spotlight	859
Creating a distant light	860
Creating shadows	863
Creating Scenes	868
Working with Materials	869
Adding materials	869
Attaching materials	877
Using Backgrounds	878
Doing the Final Render	881
Statistics	884
Saving rendered images	884
Unloading Render	885

Part V: Organizing and Managing Drawings

887

Chapter 26: Keeping Control of Your Drawings 889

Accessing Drawing Components with the AutoCAD DesignCenter	889
Navigating with the DesignCenter	890
Accessing named drawing components	894
Controlling the DesignCenter display	895
Setting Standards for Drawings	897
AutoCAD Today Manager's Corner	898
Accessing symbol libraries	899
Using the CAD manager's tools	900
Translating layers	903

Keeping Track of Your Drawings	909
Archiving drawings	909
Finding drawings	910
Finding drawings from within AutoCAD	911
Specifying drawing properties	911
Using AutoCAD on a Network	913
Using the Multiple Document Environment	913
Handling Errors and Crashes	914
Taking care of temporary files	914
Repairing corrupted drawing files	915
Using backup drawings	916
Taking care of your hard disk after a crash	917
Managing Drawings from Prior AutoCAD Releases	917

Chapter 27: Working with Other Applications 919

Importing and Exporting Other File Formats	920
Exporting AutoCAD drawings	920
Importing files	924
Working with Raster Images	926
Inserting images	927
Managing images	928
Clipping images	929
Controlling image display	930
Pasting, Linking, and Embedding Objects	933
Embedding objects into AutoCAD	934
Using Paste Special	936
Linking data	939

Chapter 28: Getting on the Internet 945

Sending Drawings	945
Faxing a drawing from within AutoCAD	945
FTPing a drawing	946
E-mailing a drawing	946
Meeting Online	949
Starting NetMeeting	949
Sharing an application	952
Chatting	952
Using the whiteboard	953
Transferring files	954
Adjusting NetMeeting settings	954
Opening Drawings from the Web	955
Using the Browse the Web - Open dialog box	955
Using i-drop to drag objects into a drawing	956
Creating Object Hyperlinks	956
Creating a hyperlink	957
Using a hyperlink	959
Editing a hyperlink	960

Publishing Drawings on the World Wide Web	961
Understanding DWF files	961
Creating DWF files	962
Using the Publish to Web Wizard	964
Editing Web pages	967
Viewing drawings on the Web	968

Part VI: Customizing AutoCAD

973

Chapter 29: Customizing Commands and Toolbars 975

Working with Customizable Files	975
Editing customizable files	977
Backing up customizable files	977
Using the command-line form of commands	978
Documenting your files	980
Creating Keyboard Shortcuts for Commands	980
Creating shortcuts to Windows programs	980
Creating keyboard shortcuts to commands	981
Customizing Toolbars	983
Using the Customize dialog box	984
Creating a new toolbar	984

Chapter 30: Creating Macros and Slide Shows with Script Files . . 995

Creating Macros with Script Files	995
Creating the script file	995
Running script files	997
Creating Slide Shows	1001
Creating slides	1001
Viewing slides	1001
Using scripts to create slide shows	1003
Creating Slide Libraries	1005

Chapter 31: Creating Your Own Linetypes and Hatch Patterns . . 1007

Creating Linetypes	1007
Creating simple linetypes	1007
Creating complex linetypes	1009
Creating Hatch Patterns	1013

Chapter 32: Creating Shapes and Fonts 1019

Creating Shapes	1019
Using shape files	1020
Creating shape files	1020
Editing shape files	1029
Creating Fonts	1030

Chapter 33: Customizing Menus 1033

Working with Menu Files	1033
Understanding the menu files	1033
Loading and unloading menu files	1034
Customizing a Menu	1038
Looking at acad.mns	1038
Writing menu macros	1040
Swapping menus	1042
Working on menu sections	1043
The Buttons and Aux menus	1046
The POP menus	1050
Customizing the toolbars from the menu file	1060
Image tile menus	1062
Tablet menus	1066
Working with the Screen menu	1067
Creating status line help messages	1067
Creating keyboard shortcuts	1069

Part VII: Programming AutoCAD**1075****Chapter 34: Understanding AutoLISP and Visual LISP Basics . . . 1077**

Introducing Visual LISP	1078
Opening Visual LISP	1078
Opening and loading an AutoLISP file with Visual LISP	1079
Loading an AutoLISP file	1080
Using an AutoLISP routine in AutoCAD	1082
Looking at an AutoLISP routine	1083
Using the Visual LISP interface	1084
Closing a file and Visual LISP	1086
Getting Help in Visual LISP	1087
Working with AutoLISP Expressions	1088
Understanding AutoLISP syntax	1089
Working with numbers and text	1089
Using AutoLISP on the Command Line	1092
Creating AutoLISP Files	1093

Chapter 35: Exploring AutoLISP Further 1097

Creating Variables	1097
Working with AutoCAD Commands	1098
Accessing AutoCAD commands	1098
Creating functions	1099
Creating functions with arguments	1102
Working with system variables	1104

Working with Lists	1106
Using lists for coordinates	1106
Creating dotted pairs	1107
Setting Conditions	1108
Conditional structures	1108
Loop structures	1110
Managing Drawing Objects	1113
Getting information about an object	1113
Modifying objects	1116
Creating selection sets	1116
Getting Input from the User	1120
Putting on the Finishing Touches	1122

Chapter 36: Exploring Advanced AutoLISP Topics 1127

Understanding Local and Global Variables	1127
Working with Visual LISP ActiveX Functions	1129
Reviewing AutoLISP retrieval and modification	1129
Using ActiveX with Visual LISP	1134
Debugging Code	1138
Using the Error trace window	1140
Working with break points	1140
Using the Watch window	1144

Chapter 37: Programming with Visual Basic for Applications . . . 1147

Starting to Work with VBA	1147
Opening the VBA environment	1148
Getting acquainted with VBA	1149
Investigating the Hierarchy Model	1150
Getting help	1153
Writing VBA Code	1154
Looking at VBA syntax	1155
Saving a VBA routine	1157
Loading a VBA routine	1158
Running a VBA routine	1158
Using the Visual Basic Editor	1158
Understanding variables	1161
Creating VBA statements	1163
Getting User Input	1164
Creating Dialog Boxes	1167
Understanding the Toolbox toolbar	1168
Changing dialog box properties	1169
Adding dialog box controls	1170
Modifying Objects	1175
Using constants	1175
Using functions	1175
Debugging and Trapping Errors	1177
Moving to Advanced Programming	1178
A Final Word	1179

Appendix A: Installing and Configuring AutoCAD

1181

Installing AutoCAD

Preparing to install AutoCAD

Starting installation

Adding items to an installation

Authorizing AutoCAD

Configuring AutoCAD

Starting AutoCAD your way

Understanding configuration files

Creating multiple configurations

Configuring a Plotter

Using the Plotter Manager

Editing a plotter configuration

Configuring AutoCAD Today
