

# COM and .NET Component Services

Dedication

Foreword

Preface

- Scope of This Book
- Some Assumptions About the Reader
- Definitions and Text Conventions
- Other COM+ Books and References
- How to Contact Us
- Acknowledgments

1. COM+ Component Services
  - 1.1 COM+ Component Services
  - 1.2 The Component Services Explorer
  - 1.3 Hello COM+
  - 1.4 COM+ Configured Components
  - 1.5 Applications, DLLs, and Components
  - 1.6 Configuring COM+ Applications
  - 1.7 Debugging COM+ Applications
  - 1.8 Deploying COM+ Applications
  - 1.9 Summary
2. COM+ Context
  - 2.1 Encapsulation via Marshaling in COM
  - 2.2 Encapsulation via Interception in COM+
  - 2.3 The Context Object
  - 2.4 The Call Object
  - 2.5 Cross-Context Manual Marshaling
  - 2.6 Summary
3. COM+ Instance Management
  - 3.1 Client Types
  - 3.2 Instance Management and Scaling
  - 3.3 Object Pooling
  - 3.4 Just-in-Time Activation
  - 3.5 Combining JITA with Object Pooling
  - 3.6 Object Constructor String
  - 3.7 COM+ Instance Management Pitfalls
4. COM+ Transactions
  - 4.1 Transaction Basics
  - 4.2 Transaction Properties
  - 4.3 Transaction Scenarios
  - 4.4 COM+ Transactions Architecture
  - 4.5 Configuring Transactions
  - 4.6 Voting on a Transaction
  - 4.7 Transactional Object Life Cycle
  - 4.8 Designing Transactional Components
  - 4.9 Nontransactional Clients
  - 4.10 Transactions and Object Pooling
  - 4.11 Compensating Transactions
  - 4.12 Transaction Execution Time

- 4.13 Tracing Transactions
- 4.14 In-Doubt Transactions
- 4.15 Transaction Statistics
- 4.16 COM+ Transactions Pitfalls
- 5. COM+ Concurrency Model
  - 5.1 Object-Oriented Programming and Multiple Threads
  - 5.2 Apartments: The Classic COM Solution
  - 5.3 Activities: The COM+ Innovation
  - 5.4 COM+ Configuration Settings
  - 5.5 Activities and JITA
  - 5.6 Activities and Transactions
  - 5.7 Tracing Activities
  - 5.8 The Neutral Threaded Apartment
  - 5.9 Summary
- 6. Programming the COM+ Catalog
  - 6.1 Why Program the Catalog?
  - 6.2 The Catalog Programming Model
  - 6.3 Catalog Structure
  - 6.4 Interacting with the Catalog
  - 6.5 Features of COMAdminCatalog
  - 6.6 The COM+ Catalog and Transactions
  - 6.7 Summary
- 7. COM+ Security
  - 7.1 The Need for Security
  - 7.2 Basic Security Terms
  - 7.3 Role-Based Security
  - 7.4 Securing a Server Application
  - 7.5 Securing a Library Application
  - 7.6 Programmatic Role-Based Security
  - 7.7 Security Boundaries
  - 7.8 Advanced COM+ Security
  - 7.9 COM+ Security Pitfalls
  - 7.10 Summary
- 8. COM+ Queued Components
  - 8.1 Major Benefits of Queued Components
  - 8.2 Queued Components Architecture
  - 8.3 Component Services Explorer Configuration
  - 8.4 Invoking Queued Components on the Client Side
  - 8.5 Designing Queued Component Interfaces
  - 8.6 Receiving Output from a Queued Component
  - 8.7 Queued Component Error Handling
  - 8.8 Queued Components and Transactions
  - 8.9 Synchronous Versus Asynchronous Components
  - 8.10 Queued Components Security
  - 8.11 Queued Components Pitfalls
  - 8.12 Summary
- 9. COM+ Event Service
  - 9.1 Classic COM Events
  - 9.2 COM+ Event Model
  - 9.3 The Event Class
  - 9.4 Subscription Types
  - 9.5 Delivering Events

- 9.6 Event Filtering
- 9.7 Distributed COM+ Events
- 9.8 Asynchronous Events
- 9.9 COM+ Events and Transactions
- 9.10 COM+ Events and Security
- 9.11 COM+ Events Limitation
- 9.12 Summary
- 10. .NET Serviced Components
  - 10.1 Developing Serviced Components
  - 10.2 .NET Assemblies and COM+ Applications
  - 10.3 Registering Assemblies
  - 10.4 Configuring Serviced Components
  - 10.5 Application Activation Type
  - 10.6 The Description Attribute
  - 10.7 Accessing the COM+ Context
  - 10.8 COM+ Context Attributes
  - 10.9 COM+ Object Pooling
  - 10.10 COM+ Just-in-Time Activation
  - 10.11 COM+ Constructor String
  - 10.12 COM+ Transactions
  - 10.13 COM+ Synchronization
  - 10.14 Programming the COM+ Catalog
  - 10.15 COM+ Security
  - 10.16 COM+ Queued Components
  - 10.17 COM+ Loosely Coupled Events
  - 10.18 Summary
- A. The COM+ Logbook
  - A.1 Logbook Requirements
  - A.2 Log File Example
  - A.3 Using the Logbook
  - A.4 Configuring the Logbook
  - A.5 How Does the Logbook Work?
  - A.6 Summary
- B. COM+ 1.5
  - B.1 Improved User Interface Usability
  - B.2 Legacy Applications and Components
  - B.3 Disabling Applications and Components
  - B.4 Pausing Applications
  - B.5 Service Activation Type
  - B.6 Improved Queuing Support
  - B.7 Application Pooling and Recycling
  - B.8 Application Dump
  - B.9 Application Partitioning
  - B.10 Aliasing Components
  - B.11 Configurable Transaction Isolation Level
  - B.12 Improved Context Activation Setting
  - B.13 Private Components
  - B.14 Web Services in COM+ 1.5
  - B.15 Summary
- C. Introduction to .NET
  - C.1 .NET Programming Languages
  - C.2 Packaging .NET Components: Assemblies
  - C.3 Developing .NET Components
