Preface	xi
Acknowledgments	xxi

Part I: Dreamweaver MX 2004 Basics

1

Chapter 1: Introducing Dreamweaver MX 2004 3

The Dynamic World of Dreamweaver	3
Connecting to the world's data	4
True data representation	5
Integrated visual and text editors	5
World-class code editing	6
Roundtrip HTML	8
Web site maintenance tools	8
Team-oriented site building	8
The Dreamweaver Interface	9
Easy text entry	9
Drag-and-drop data fields	10
One-stop object modification	10
Accessing and managing resources	11
Complete custom environment	11
Managing keyboard shortcuts	12
Simple selection process	13
Enhanced layout options	14
Plugin media preview	14
Extended Find and Replace	14
Up-to-Date Code Standards	14
Cutting-edge CSS support	15
Addressing accessibility	16
Straightforward text and graphics support	16
Enhanced table capabilities	16
Easy form entry	17
Click-and-drag frame setup	18
Multimedia enhancements	19
Next-Generation Features	19
Flash and Fireworks integration	19
Server-side behaviors	20
Roundtrip XML	20
3D layers	21
Dynamic style updates	22
JavaScript behaviors	23

Program Extensibility	24
Objects and behaviors	24
Server Behavior Builder	24
Commands and floating panels	25
Adjustable Insert bars	25
Custom tags, translators, and Property inspectors	26
Automation Enhancements	26
Rapid application development with Application objects	26
Importing office documents	27
Reference panel	28
History panel	28
Site Management Tools	28
Object libraries	28
Super-charged templates	29
Browser targeting	30
Converting Web pages	31
Verifying links	31
FTP publishing	31
Site map	32
File check in/check out	32
Summary	33
Chapter 2: A Dreamweaver Workflow Example	35
Setting Up a Site	35
Making the Data Source Connection	39
Home Page Layout	41
Starting with the <head>	41
Specifying page styles	42
Initial graphic layout	44
Including Client Text	46
Adding Dynamic Content	48
Inserting Server Behaviors	49
Activating the Page with JavaScript	50
Previewing and Posting Your Pages	52
Summary	54
Chapter 3: Touring Dreamweaver	57
Choosing a Workspace Layout	57
Viewing the Document Window	60
Switching views in the Document window	61
Working with the status bar	62
Accessing the Toolbars	67
The Document toolbar	67
The Standard toolbar	70
The Live Data toolbar	71
Selecting from the Insert Bar	72
Common objects	73
Layout objects	76
Forms objects	79
Text objects	80
HTML	83
Application objects	85

Flash elements	88
Favorites	89
ASP objects	90
ASP.NET objects	91
CFML objects	92
JSP objects	95
PHP objects	96
Getting the Most Out of the Property Inspector	97
Manipulating the Property inspector	97
Property inspector elements	98
Customizing Your Workspace with Dockable Panels	100
Hiding and showing panels	103
Customizing panel groups	104
Accessing the Menus	106
The File menu	107
The Edit menu	109
The View menu	111
The Insert menu	114
The Modify menu	123
The Text menu	127
The Commands menu	130
The Site menu	131
The Window menu	132
The Help menu	134
Summary	135

Chapter 4: Setting Your Preferences 137

Customizing Your Environment	137
General Preferences	137
Preferences for invisible elements	142
Panels preferences	144
Highlighting preferences	145
Status Bar preferences	146
File Types / Editors preferences	148
Office Copy/Paste preferences (Windows only)	151
New Document preferences	151
Adjusting Advanced Features	153
Accessibility preferences	154
Layout Mode preferences	155
Layers preferences	156
CSS Styles preferences	158
Making Online Connections	159
Site preferences	160
Preview in Browser preferences	162
Customizing Your Code	164
Fonts preferences	164
Code Hints preferences	165
Code Rewriting preferences	167
Code Colors preferences	169
Code Format preferences	169
Validator preferences	173
Summary	174

Chapter 5: Setting Up Sites and Servers 177

Planning Your Site	177
Primary considerations	178
Design options	179
Mapping Dynamic Pages for Web Applications	182
Defining a Site	183
Using the Site Definition wizard	183
Using Advanced mode	187
Establishing local connections	187
Specifying the remote site	189
Adding Testing Server details	191
Cloaking Site Folders	192
Managing Site Info	193
Working Directly with Servers	194
Establishing a siteless server connection	194
Accessing server files	197
Creating and Saving New Pages	198
Starting Dreamweaver	199
Opening existing files	199
Opening a new file	200
Saving your file	201
Saving to remote servers	201
Closing the file	202
Quitting the program	202
Creating New Documents	203
Using the New Document dialog box	203
Creating a new default document	204
Previewing Your Web Pages	204
Putting Your Pages Online	206
Transferring with FTP	207
Using the FTP Log panel	208
Summary	209

Part II: Web Design and Layout Fundamentals**211****Chapter 6: Accessing the Code Directly 213**

The Structure of a Web Page	214
Expanding into XHTML	215
doctype and doctype Switching	216
Defining <head> Elements	217
Establishing page properties	217
Choosing a page palette	222
Understanding <meta> and other <head> tags	223
Adding to the <body>	231
Logical styles	231
Physical styles	232

Working with Code View and Code Inspector	232
Enabling Code view options	235
Printing code	236
Enhancing Code Authoring Productivity	236
Code Hints and Tag Completion	236
Modifying blocks of code	239
Inserting code with the Tag Chooser	241
Adding Code through the Snippets Panel	242
Using the Reference Panel	244
Modifying Code with the Tag Inspector	246
Rapid Tag Modification with the Quick Tag Editor	248
Insert HTML mode	248
Wrap Tag mode	251
Edit Tag mode	252
Adding Java Applets	254
Adding JavaScript and VBScript	256
Inserting JavaScript and VBScript	257
Editing JavaScript and VBScript	257
Validating Your Page	259
Inserting Symbols and Special Characters	261
Named characters	261
Decimal characters and UTF-8 encoding	262
Using the Character objects	262
Summary	264

Chapter 7: Building Style Sheet Web Pages 267

Understanding Cascading Style Sheets	268
Grouping properties	268
Inheritance of properties	268
Cascading characteristics	269
Defining new class and ID selectors for extended design control	270
How styles are applied	271
Creating and Applying a Style Sheet in Dreamweaver	272
Automatically created styles	273
Applying styles through the Property inspector	275
Attaching an external style sheet	275
Applying, changing, and removing a style	277
Defining new styles	279
Editing and managing style sheets	282
Styles and Their Attributes	286
Type options	286
Background options	288
Block options	290
Box options	292
Border options	293
List options	294
Positioning options	294
Extensions options	296
Design Time Style Sheets	299
Summary	300

Chapter 8: Working with Text 301

Starting with Headings	301
Working with Paragraphs	303
Editing paragraphs	305
Checking Your Spelling	309
Using Find and Replace	310
Finding on the visual page	311
Searching the code	316
Concentrating your search with regular expressions	321
Controlling Whitespace	326
Indenting text	327
Working with preformatted text	327
The tag	328
Working with Microsoft Office Documents	330
Copying and pasting Office content	330
Dragging and dropping Word and Excel files	331
Importing Word HTML	331
Styling Your Text	335
Depicting various styles	335
Using the <address> tag	338
Adding abbreviations and acronyms	338
Modifying Text Format	339
Adjusting font size	339
Absolute size	342
Relative size	343
Adding font color	344
Assigning a specific font	346
Aligning text	350
Indenting entire paragraphs	351
Incorporating Dates	351
Commenting Your Code	353
Summary	355

Chapter 9: Inserting Images 357

Web Graphic Formats	357
GIF	357
JPEG	359
PNG	360
Using Inline Images	360
Inserting images	361
Dragging images from the Assets panel	364
Optimizing and altering images	367
Modifying image attributes	375
Working with alignment options	378
Adding Background Images	382
Dividing the Web Page with Horizontal Rules	384
Applying Simple Web Animation	386
Dreamweaver Technique: Including Banner Ads	387

Inserting Rollover Images	389
Adding a Navigation Bar	391
Summary	394

Chapter 10: Establishing Web Links 397

Understanding URLs	397
Surfing the Web with Hypertext	399
Dreamweaver Technique: Eliminating underlines from links	401
Inserting URLs from the Assets panel	403
Pointing to a file	404
Checking links	406
Adding an E-Mail Link	407
Navigating with Anchors	408
Moving within the same document	409
Using named anchors in a different page	410
Targeting Your Links	411
Summary	412

Part III: Advanced Design Tools and Techniques 413

Chapter 11: Working with Divs and Layers 415

Divs and Layers 101	415
Placing <div> tags	417
Defining a CSS rule for a <div> tag	418
Inserting the <div> tag	418
Creating Layers with Dreamweaver	421
Inserting a layer object	422
Using the Insert Í Layout Objects Í Layer command	423
Setting default characteristics of a layer	423
Choosing relative instead of absolute positioning	425
Modifying a Layer	426
Selecting a layer	426
Resizing a layer	426
Moving a layer	427
Using the Layer Property inspector	428
The Layers panel	434
Aligning layers with the ruler and grid	436
Adding elements to a layer	438
Forms and layers	439
Creating Your Page Design with Layers	439
Using the Tracing Image	440
Preventing overlaps	441
Activating Layers with Behaviors	441
Drag Layer	442
Set Text of Layer	444
Show-Hide Layers	445
Dreamweaver Technique: Creating a Loading Layer	446
Summary	446

Chapter 12: Using Behaviors 449

Understanding Behaviors, Events, and Actions	449
Attaching a Behavior	450
Using the Behaviors panel	451
Adding a behavior	452
Managing events	453
Standard actions	455
Installing, Managing, and Modifying Behaviors	482
Altering the parameters of a behavior	483
Sequencing behaviors	483
Deleting behaviors	484
Summary	484

Chapter 13: Setting Up Tables 485

HTML Table Fundamentals	485
Rows	486
Cells	487
Column and row headings	487
Inserting Tables in Dreamweaver	488
Modifying Tables	491
Selecting table elements	492
Editing a table's contents	496
Working with table properties	499
Setting cell, column, and row properties	509
Working with Table Formats	512
Sorting Tables	514
Importing Tabular Data	516
Designing with Layout Mode	518
Drawing cells and tables	519
Modifying layouts	524
Summary	529

Chapter 14: Interactive Forms 531

How HTML Forms Work	531
Inserting a Form in Dreamweaver	533
Using Text Fields	535
Text fields	535
Password fields	536
Multiline text areas	537
Providing Checkboxes and Radio Buttons	541
Checkboxes	541
Radio buttons	541
Creating Form Lists and Menus	544
Drop-down menus	544
Menu values	545
Scrolling lists	546
Navigating with a Jump Menu	548
Modifying a jump menu	551
Activating Go buttons	551
Activating Your Form with Buttons	552
Submit, Reset, and Command buttons	552
Graphical buttons	553

Using the Hidden Field and the File Field	555
The hidden input type	555
The file input type	555
Improving Accessibility	556
Styling Forms with CSS	557
Encompassing the form	558
Altering input fields	559
Distinguishing lists and menus	560
Changing labels and legends	560
Highlighting focus	562
Summary	563

Chapter 15: Creating Lists 565

Creating Unordered (Bulleted) Lists	565
Editing unordered lists	566
List tags	567
Using other bullet symbols	567
Styling lists with CSS	569
Mastering Ordered (Numbered) Lists	570
Editing ordered lists	572
Using other numbering styles	572
Dreamweaver Technique: Creating Navigation Buttons from Lists	573
Step 1: Preparing background graphics	574
Step 2: Creating the list and containing <div>	575
Step 3: Building the CSS styles	577
Step 4: Applying the CSS	582
Making Definition Lists	583
Using Nested Lists	584
Accessing Special List Types	586
Menu lists	587
Directory lists	587
Summary	587

Chapter 16: Making Client-Side Image Maps 589

Client-Side Image Maps	589
Creating Image Hotspots	591
Using the drawing tools	593
Modifying an image map	595
Converting Client-Side Maps to Server-Side Maps	596
Adapting the server script	596
Including the map link	597
Dreamweaver Technique: Building an Image Map Rollover	598
Step 1: Create two images	598
Step 2: Set up the layers	599
Step 3: Make the image map	601
Step 4: Attach the behaviors	602
Step 5: Add the clipping	603
Summary	605

Chapter 17: Using Frames and Framesets 607

Frames and Framesets: The Basics	608
Columns and rows	608
Sizing frames	608
Creating a Frameset and Frames	609
Creating a new frameset file	609
Hand-coding framesets	611
Creating a frameset visually	611
Creating framesets quickly with frame objects	613
Adding More Frames	616
Using the menus	616
Using the mouse	617
Selecting, Saving, and Closing Framesets	618
Selecting framesets and frames	618
Saving framesets and frames	619
Closing framesets	619
Working with the Frameset Property Inspector	620
Resizing frames in a frameset	620
Manipulating frameset borders	621
Modifying a Frame	622
Page properties	622
Working with the Frame Property inspector	623
Modifying content	627
Deleting frames	628
Targeting Frame Content	628
Targeting sections of your frameset	628
Targeting specific frames in your frameset	629
Updating two or more frames at once	629
Handling Frameless Browsers	631
Investigating iframes	632
Summary	635

Part IV: Incorporating Dynamic Data**637****Chapter 18: Establishing Connections and Recordsets 639**

Data Source Basics	639
Understanding How Active Content Pages Work	642
Opening a Connection to a Data Source	643
Using Data Source Names (DSN)	645
Specifying connection strings	652
PHP	657
Managing Connections	657
Extracting Recordsets	658
Building simple recordsets	659
Writing advanced SQL statements	661
Working with recordsets	665
Summary	666

Chapter 19: Making Data Dynamic	669
Working with Dynamic Text	669
Inserting dynamic text	669
Viewing dynamic data	671
Formatting Dynamic Data	673
Data formatting	673
Editing and creating new data formats	681
Making Images Dynamic	682
Integrating Flash and Other Dynamic Media	685
Summary	687
Chapter 20: Managing Data	689
Displaying Data Conditionally	689
Repeating data	689
Showing and hiding page elements	692
Handling Record Navigation	695
Building record navigation links	695
Using Application objects for record navigation	697
Tracking record status	698
Dreamweaver Technique: Using Flash Buttons for Recordset Navigation	699
Step 1: Prepare the page	700
Step 2: Add the Flash buttons	701
Step 3: Include the JavaScript functions	702
Step 4: Insert the hidden variables	704
Summary	706
Chapter 21: Working with Live Data	707
Viewing Live Data	708
How Live Data works	708
Setting up for Live Data	708
Entering and exiting Live Data view	712
Making changes in Live Data	713
Live Data Settings	714
Getting the query string	714
Posting responses with Live Data settings	716
Previewing in the Browser	718
Using the Server Debug Panel with ColdFusion MX	719
Summary	722
Chapter 22: Crafting Multiple-Page Applications	723
Using the URL to Pass Parameters	723
Sending parameters	724
Receiving parameters	726
Automating master-detail page production	729
Getting Values from a Form	733
Passing single values from a form	734
Passing multiple values from a form	735
Passing form and URL values to a related page	736

Dreamweaver Technique: Building a Search Engine	737
Establishing Dynamic Form Elements	738
Text fields	738
Checkboxes	740
Radio buttons	741
List/Menu	742
Managing Data Sources Online	743
Inserting data	743
Updating data	746
Deleting data	749
Inserting Variables	750
Application and session variables	751
Request and other variables	751
Connecting to the Customer	752
Logging in existing customers	752
Restricting access	753
Helping users log out	755
Adding new customers	756
Summary	757

Part V: Adding Multimedia Elements

759

Chapter 23: Fireworks Integration 761

Easy Graphics Modification	762
Optimizing an image in Fireworks	762
Editing an image in Fireworks	766
Replacing an image placeholder using Fireworks	767
Inserting Rollovers	768
Using Dreamweaver's behaviors	769
Using Fireworks' code	771
Modifying sliced images	774
Editing Fireworks-Created Pop-Up Menus	775
Controlling Fireworks with Dreamweaver	776
Creating a Web photo album	776
Building Dreamweaver/Fireworks extensions	780
Summary	782

Chapter 24: Inserting Flash and Shockwave Elements 783

Director and Flash: What's the Difference?	784
Including Flash and Shockwave Movies in Dreamweaver Projects	786
Specifying Shockwave Properties	788
Additional parameters for Shockwave	790
Automatic settings for Shockwave files	790
Designating Flash Attributes	791
Setting the scale in Flash movies	792
Additional parameters for Flash	793
Integrating Flash Elements	794
Working with the Image Viewer	795
Adding other Flash elements	799

Creating Flash Buttons	800
Working with Flash Text	802
Configuring MIME Types	804
Managing Links in Flash Movies with Dreamweaver	805
Providing User Interaction with Flash and Shockwave Movies	806
Dreamweaver Technique: Creating inline controls	807
Dreamweaver Technique: Playing movies in frames	808
Dreamweaver Technique: Triggering behaviors from Flash movies	810
Editing Flash Movies from within Dreamweaver	812
Summary	814

Chapter 25: Adding Video to Your Web Page 815

Video on the Web	815
The Streaming Media Big Three	816
RealMedia	816
QuickTime	818
Windows Media	819
Working with Video Clips	820
Linking to video	821
Embedding video	822
Playing Videos Within Dreamweaver	822
Inserting QuickTime Movies	824
QuickTime versions	829
Playing QuickTime VR	829
Streaming with RealMedia	832
Creating RealMedia metafiles	832
Inserting RealMedia in your Web page	833
Summary	835

Chapter 26: Using Audio on Your Web Page 837

Digital Audio Fundamentals	837
File formats	837
Making audio files lighter	839
MIDI Files	841
MP3 Mini-Primer	842
Player support	842
Encoding MP3	843
Linking to Audio Files	843
Embedding Sounds and Music	844
Playing background music	846
Targeting Specific Plugins	847
Windows Media Player audio	847
Using Embed with ActiveX	849
Installing Streaming Audio	850
Working with floating or embedded RealAudio players	850
Accessing RealAudio parameters	853
Summary	854

Part VI: Enhancing Web Site Management and Workflow

855

Chapter 27: Using Dreamweaver Templates 857

Understanding Templates	857
Creating Your Own Templates	859
Using Editable Regions	860
Marking existing content as editable	860
Inserting a new editable region	862
Locking an editable region	863
Adding Content to Template Documents	863
Making Attributes Editable	865
Setting Editable Attributes	868
Enabling Repeating Regions	869
Modifying a repeating region	871
Constructing a Repeating Table	872
Establishing Optional Regions	874
Combining editable and optional regions	876
Setting optional region properties	877
Evaluating template expressions	877
Dreamweaver Technique: Template expression examples	881
Nesting Templates	888
Working with Templates in the Assets Panel	890
Creating a blank template	891
Deleting and opening templates	892
Applying templates	892
Mapping inconsistent template regions	893
Updating Templates	894
Removing Template Markup	895
Deleting template markup individually	895
Removing template markup from an entire page	896
Exporting a site without template markup	896
Changing the Default Document	897
Summary	898

Chapter 28: Using Repeating Elements 899

Dreamweaver Library Items	899
Using the Library Assets Panel	900
Adding a Library item	901
Moving Library items to a new site	902
Inserting a Library item in your Web page	902
Deleting an item from the Library	904
Renaming a Library item	905
Editing a Library Item	905
Updating Your Web Sites with Libraries	907
Applying Server-Side Includes	908
Adding server-side includes	909
Editing server-side includes	911
Summary	911

Chapter 29: Maximizing Browser Targeting 913

Converting Pages in Dreamweaver	914
Ensuring Browser Compatibility	915
Internal coding for cross-browser compatibility	915
Designing Web pages for backward compatibility	917
Validating your code	918
Setting Validator preferences	920
Testing Your Page with a Targeted Browser	921
Automatically checking your pages	922
Testing browser compatibility for an entire site	926
Using the results of the browser check	927
Customizing a Browser Profile	927
Understanding the browser profile structure	927
Creating a browser profile	929
Summary	932

Chapter 30: Building Web Sites with a Team 933

Following Check In/Check Out Procedures	933
Check In/Check Out overview	934
Enabling Check In/Check Out	936
Checking files in and out	937
Keeping Track with Design Notes	939
Setting up for Design Notes	939
Setting the status with Design Notes	941
Creating custom Design Notes	942
Viewing Design Notes	943
Browsing File View Columns	943
Generating Reports	946
Outputting HTML reports	948
Using Workflow reports	949
Administering Macromedia Contribute Sites	951
Setting up Contribute compatibility	952
Entering sitewide administrator settings	954
Establishing Contribute groups	956
Connecting users	964
Rolling back a Contribute page in Dreamweaver	966
Integrating Dreamweaver with Visual SourceSafe	967
Communicating with WebDAV	968
Summary	970

Chapter 31: Integrating with XML 971

Understanding XML	971
Exporting XML	973
Importing XML	976
Building Your Own XML Files	977
Summary	977

Part VII: Extending Dreamweaver**979****Chapter 32: Customizing Dreamweaver 981**

Adding New Commands	982
Understanding Dreamweaver commands	982
Recording and replaying commands	985
Scripting commands	988
Dreamweaver Techniques: Useful command routines	990
Managing Menus and Keyboard Shortcuts	995
Handling History panel commands	996
Using the Keyboard Shortcut editor	997
Adjusting the menus.xml file	999
Building menu commands	1003
Working with Custom Tags	1004
Customizing Property Inspectors	1007
Coding a Property inspector	1008
Designing a Property inspector	1011
Making Custom Floating Panels	1012
Developing Translators	1015
Translator functions	1016
Locking code	1017
Extending C-Level Libraries	1018
Calling C-level extensions	1019
Building C-level extensions	1020
Customizing Your Tag Libraries	1021
Editing tag libraries, tags, and attributes	1021
Creating and deleting tag libraries, tags, and attributes	1023
Importing a DTD or schema to create a new tag library	1024
Summary	1025

Chapter 33: Creating and Using Objects 1027

Inserting Dreamweaver Objects	1027
Modifying the Insert Bar	1028
Specifying favorites	1028
Reorganizing objects and adding categories	1029
Adding Other Objects	1031
Creating Custom Objects	1033
Making simple objects	1035
Building an object button	1037
Putting JavaScript to Work in Custom Objects	1037
Using the objectTag() function	1037
Offering help	1039
Attaching a parameter form	1040
Using the form controls	1041
Adding images to your objects	1048
Using layers and Flash movies in objects	1048
Summary	1049

Chapter 34: Creating a Behavior 1051

Creating a Behavior from Scratch	1051
Step 1: Define the behavior	1052
Step 2: Create the action file	1054
Step 3: Build the user interface	1056
Step 4: Apply the behavior	1058
Step 5: Inspect the behavior	1059
Step 6: Test the behavior	1061
Debugging the behavior	1062
The Extending Dreamweaver Documentation	1062
Document Object Model	1063
Dreamweaver JavaScript API extensions	1067
Behavior API	1078
Useful Common Functions	1082
Dreamweaver Behavior Techniques	1083
Specifying an event	1084
Returning a value	1084
Including multiple functions	1085
Summary	1085

Chapter 35: Handling Server Behaviors 1087

Understanding Server Behaviors	1087
Applying and Managing Server Behaviors	1089
Inserting and removing server behaviors	1089
Editing the parameters	1089
Standard Server Behaviors	1090
Recordset (Query)	1090
Repeat Region	1092
Recordset Paging	1093
Move To Specific Record	1094
Show Region	1094
Go To Detail Page	1096
Go To Related Page	1097
Insert Record	1098
Update Record	1099
Delete Record	1100
User authentication	1101
Dynamic elements	1105
Stored Procedure/Command/Callable	1110
Special JSP server behaviors	1111
ASP.NET server behaviors	1113
Installing Additional Server Behaviors	1116
Creating Custom Server Behaviors	1117
Summary	1121

Appendix: What's on the CD-ROM 1123

Index.	1127
