Foreword	xi
Preface	xiii
Acknowledgments	xxiii

Part I: Dreamweaver MX Basics

1

Chapter 1: Introducing Dreamweaver MX	3
The Dynamic World of Dreamweaver	3
Connecting to the world's data	4
True data representation	5
Integrated visual and text editors	5
World-class code editing	6
Roundtrip HTML	7
Web site maintenance tools	8
Team-oriented site building	8
The Dreamweaver Interface	8
Choice of environments	9
Easy text entry	9
Drag-and-drop data fields	9
One-stop object modification	11
Accessing and managing resources	11
Complete custom environment	12
Managing keyboard shortcuts	12
Simple selection process	12
Enhanced layout options	13
Plugin media preview	14
Extended Find and Replace	14
Up-to-Date Code Standards	14
Cutting-edge CSS support	14
Addressing accessibility	15
Straightforward text and graphics support	15
Enhanced table capabilities	16
Easy form entry	17
Click-and-drag frame setup	17
Multimedia enhancements	18

Next-Generation Features	18
Flash and Fireworks integration	18
Server-side behaviors	19
Roundtrip XML	20
3D layers	20
Animated objects	21
Dynamic style updates	21
JavaScript behaviors	22
Program Extensibility	23
Objects and behaviors	23
Server Behavior Builder	23
Commands and floating panels	24
Adjustable Insert bars	25
Custom tags, translators, and Property inspectors	25
Automation Enhancements	25
Rapid application development with Application objects	25
Applying HTML Styles	26
Importing office documents	27
Reference panel	27
History panel	27
Site Management Tools	28
Object libraries	28
Super-charged templates	29
Browser targeting	30
Converting Web pages	30
Verifying links	30
FTP publishing	30
Site map	31
File check in/check out	31
Summary	32
Chapter 2: QuickStart	35
Setting Up a Site	35
Making the Data Source Connection	39
Home Page Layout	41
Starting with the <head>	41
Specifying page colors	42
Initial graphic layout	43
Including Client Text	45
Adding Dynamic Content	47
Inserting Server Behaviors	49
Activating the Page with JavaScript	50
Previewing and Posting Your Pages	52
Summary	54
Chapter 3: Touring Dreamweaver	55
Choosing a Workspace Layout	55
Viewing the Document Window	60
Switching views in the Document window	61
Working with the status bar	62

Accessing the Toolbars	67
The Standard toolbar	68
The Document toolbar	69
The Live Data toolbar	72
Selecting from the Insert Bar	73
Common objects	76
Layout objects	78
Text objects	80
Table objects	83
Frames objects	83
Forms objects	85
Template objects	87
Character objects	87
Media objects	88
Head objects	89
Script objects	90
Application objects	91
ASP objects	92
ASP.NET objects	94
CFML Basic objects	95
CFML Flow objects	96
CFML Advanced objects	97
JSP objects	99
PHP objects	101
Getting the Most Out of the Property Inspector	102
Manipulating the Property inspector	102
Property inspector elements	103
Customizing Your Workspace with Dockable Panels	105
Hiding and showing panels	109
Customizing panel groups	111
Accessing the Menus	112
The File menu	113
The Edit menu	116
The View menu	118
The Insert menu	121
The Modify menu	128
The Text menu	132
The Commands menu	135
The Site menu	137
The Window menu	141
The Help menu	143
Summary	144

Chapter 4: Setting Your Preferences 145

Customizing Your Environment	145
General preferences	145
Preferences for invisible elements	150
Panels preferences	152
Highlighting preferences	153

Quick Tag Editor preferences	155
Status Bar preferences	156
File Types/Editors preferences	157
New Document preferences	160
Adjusting Advanced Features	161
Accessibility preferences	162
Layout View preferences	163
Layers preferences	165
CSS Styles preferences	167
Making Online Connections	168
Site preferences	168
Preview in Browser preferences	170
Customizing Your Code	172
Fonts preferences	172
Code Hints preferences	174
Code Rewriting preferences	175
Code Colors preferences	178
Code Format preferences	179
Validator preferences	182
Summary	184

Chapter 5: Setting Up a Site 185

Planning Your Site	185
Primary considerations	185
Design options	187
Mapping Dynamic Pages for Web Applications	190
Defining a Site	191
Using the Site Definition wizard	191
Using Advanced mode	195
Establishing local connections	195
Specifying the remote site	197
Adding Testing Server details	199
Cloaking Site Folders	200
Cloaking folders	201
Uncloaking folders (and files)	201
Managing Site Info	202
Creating and Saving New Pages	203
Starting Dreamweaver	203
Opening existing files	204
Opening a new file	204
Saving your file	204
Closing the file	206
Quitting the program	206
Creating New Documents	206
Using the New Document dialog box	206
Creating a new default document	207
Previewing Your Web Pages	208
Putting Your Pages Online	210
Using the FTP Log panel	212
Summary	213

Part II: Web Design and Layout**215****Chapter 6: Accessing the Code Directly 217**

The Structure of a Web Page	218
Expanding into XHTML	219
doctype and doctype Switching	220
Defining <head> Elements	221
Establishing page properties	221
Choosing a page palette	223
Understanding <meta> and other <head> tags	225
Adding to the <body>	232
Logical styles	232
Physical styles	233
Working with Code View and Code Inspector	234
Enabling Code view options	236
Printing code	237
Enhancing Code Authoring Productivity	238
Code Hints and Tag Completion	238
Inserting code with the Tag Chooser	241
Adding Code through the Snippets Panel	242
Using the Reference Panel	244
Modifying Code with the Tag Inspector	246
Rapid Tag Modification with the Quick Tag Editor	247
Insert HTML mode	249
Wrap Tag mode	250
Edit Tag mode	252
Adding Java Applets	253
Adding JavaScript and VBScript	256
Inserting JavaScript and VBScript	256
Editing JavaScript and VBScript	258
Validating Your Page	259
Inserting Symbols and Special Characters	260
Named characters	261
Decimal characters and UTF-8 encoding	261
Using the Character objects	262
Summary	264

Chapter 7: Working with Text 265

Starting with Headings	265
Working with Paragraphs	267
Editing paragraphs	268
Checking Your Spelling	273
Using Find and Replace	274
Finding on the visual page	275
Searching the code	279
Concentrating your search with regular expressions	285
Controlling Whitespace	289
Indenting text	289
Working with preformatted text	290

The tag	291
Other whitespace tags	292
Importing Word HTML	294
Styling Your Text	296
Depicting various styles	297
Using the <address> tag	299
Adding abbreviations and acronyms	300
Using HTML Styles	300
Defining HTML styles	301
Applying HTML styles	303
Removing HTML styles	304
Changing default styles	305
Modifying Text Format	306
Adjusting font size	306
Absolute size	307
Relative size	308
Adding font color	308
Assigning a specific font	311
Aligning text	315
Indenting entire paragraphs	316
Incorporating Dates	316
Commenting Your Code	318
Summary	319

Chapter 8: Inserting Images 321

Web Graphic Formats	321
GIF	321
JPEG	323
PNG	324
Using Inline Images	324
Inserting images	324
Dragging images from the Assets panel	327
Modifying images	330
Working with alignment options	335
Adding Background Images	338
Dividing the Web Page with Horizontal Rules	340
Applying Simple Web Animation	342
Dreamweaver Technique: Including Banner Ads	343
Inserting Rollover Images	345
Adding a Navigation Bar	347
Summary	350

Chapter 9: Establishing Web Links 351

Understanding URLs	351
Surfing the Web with Hypertext	353
Inserting URLs from the Assets panel	356
Pointing to a file	357
Addressing types	358
Checking links	359
Adding an E-Mail Link	359

Navigating with Anchors	361
Moving within the same document	362
Using named anchors in a different page	363
Targeting Your Links	364
Summary	365

Chapter 10: Setting Up Tables 367

HTML Table Fundamentals	367
Rows	368
Cells	369
Column and row headings	369
Inserting Tables in Dreamweaver	370
Setting Table Preferences	372
Modifying Tables	374
Selecting table elements	374
Editing a table's contents	377
Working with table properties	380
Setting cell, column, and row properties	390
Working with Table Formats	393
Sorting Tables	395
Importing Tabular Data	397
Designing with Layout View	398
Drawing cells and tables	400
Modifying layouts	405
Summary	410

Chapter 11: Interactive Forms 411

How HTML Forms Work	411
Inserting a Form in Dreamweaver	413
Using Text Fields	414
Text fields	414
Password fields	416
Multiline text areas	417
Providing Checkboxes and Radio Buttons	421
Checkboxes	421
Radio buttons	421
Creating Form Lists and Menus	424
Drop-down menus	424
Menu values	425
Scrolling lists	426
Navigating with a Jump Menu	428
Modifying a jump menu	429
Activating Go buttons	430
Activating Your Form with Buttons	432
Submit, Reset, and Command buttons	432
Graphical buttons	432
Using the Hidden Field and the File Field	434
The hidden input type	435
The file input type	435
Improving Accessibility	435
Summary	437

Chapter 12: Creating Lists 439

Creating Unordered (Bulleted) Lists	439
Editing unordered lists	441
List tags	441
Using other bullet symbols	442
Mastering Ordered (Numbered) Lists	444
Editing ordered lists	446
Using other numbering styles	446
Making Definition Lists	447
Using Nested Lists	449
Accessing Special List Types	451
Menu lists	451
Directory lists	452
Dreamweaver Technique: Building Graphical Bullets	452
Summary	455

Chapter 13: Making Client-Side Image Maps 457

Client-Side Image Maps	457
Creating Image Hotspots	458
Using the drawing tools	460
Modifying an image map	462
Converting Client-Side Maps to Server-Side Maps	463
Adapting the server script	463
Including the map link	464
Dreamweaver Technique: Building an Image Map Rollover	465
Step 1: Create two images	465
Step 2: Set up the layers	466
Step 3: Make the image map	468
Step 4: Attach the behaviors	469
Step 5: Add the clipping	470
Summary	472

Chapter 14: Using Frames and Framesets 473

Frames and Framesets: The Basics	473
Columns and rows	474
Sizing frames	474
Creating a Frameset and Frames	475
Creating a new frameset file	475
Creating a frameset visually	477
Quickly creating framesets with frame objects	478
Adding More Frames	480
Using the menus	482
Using the mouse	483
Selecting, Saving, and Closing Framesets	483
Selecting framesets and frames	483
Saving framesets and frames	485
Closing framesets	485
Working with the Frameset Property Inspector	485
Resizing frames in a frameset	486
Manipulating frameset borders	487

Modifying a Frame	488
Page properties	488
Working with the Frame Property inspector	488
Modifying content	493
Deleting frames	493
Targeting Frame Content	494
Targeting sections of your frameset	494
Targeting specific frames in your frameset	495
Updating two or more frames at once	495
Handling Frameless Browsers	496
Investigating Iframes	498
Summary	500

Part III: Incorporating Dynamic Data

501

Chapter 15: Establishing Connections and Recordsets 503

Data Source Basics	503
Understanding How Active Content Pages Work	506
Opening a Connection to a Data Source	507
Using Data Source Names (DSN)	509
Specifying connection strings	516
PHP	521
Managing Connections	522
Extracting Recordsets	522
Building simple recordsets	523
Writing advanced SQL statements	526
Working with recordsets	530
Summary	531

Chapter 16: Making Data Dynamic 533

Working with Dynamic Text	533
Inserting dynamic text	533
Viewing dynamic data	535
Formatting Dynamic Data	537
Data formatting	537
Editing and creating new data formats	545
Making Images Dynamic	548
Altering attributes dynamically	550
Integrating Flash and Other Dynamic Media	551
Summary	553

Chapter 17: Managing Data 555

Displaying Data Conditionally	555
Repeating data	556
Showing and hiding page elements	559
Handling Record Navigation	562
Building record navigation links	562
Using Application Objects for record navigation	564
Tracking record status	565

Dreamweaver Technique: Using Flash Buttons for Recordset Navigation	565
Step 1: Prepare the page	566
Step 2: Add the Flash Buttons	566
Step 3: Include the JavaScript functions	568
Step 4: Insert the hidden variables	570
Summary	572

Chapter 18: Working with Live Data 575

Viewing Live Data	576
How Live Data works	576
Setting up for Live Data	576
Entering and exiting Live Data view	579
Making changes in Live Data	580
Live Data Settings	581
Getting the query string	581
Posting responses with Live Data settings	583
Previewing in the Browser	585
Using the Server Debug Panel with ColdFusion MX	586
Summary	589

Chapter 19: Crafting Multiple-Page Applications 591

Using the URL to Pass Parameters	591
Sending parameters	592
Receiving parameters	594
Automating master-detail page production	596
Getting Values from a Form	601
Passing single values from a form	601
Passing multiple values from a form	602
Passing form and URL values to a related page	603
Dreamweaver Technique: Building a Search Engine	604
Establishing Dynamic Form Elements	605
Text fields	605
Checkboxes	607
Radio buttons	608
List/Menus	609
Managing Data Sources Online	610
Inserting data	611
Updating data	613
Deleting data	616
Inserting Variables	617
Application and session variables	618
Request and other variables	618
Connecting to the Customer	618
Logging in existing customers	619
Restricting access	620
Log out users	622
Adding new customers	623
Summary	624

Part IV: Dynamic HTML and Dreamweaver**625****Chapter 20: Building Style Sheet Web Pages 627**

Understanding Cascading Style Sheets	628
Grouping properties	628
Inheritance of properties	628
Cascading characteristics	629
Defining new classes for extended design control	630
How styles are applied	630
Creating and Applying a Style Sheet in Dreamweaver	632
Dreamweaver Technique: Eliminating underlines from links	632
Using the CSS Styles panel to apply styles	634
Applying styles through the Property inspector	635
Attaching an external style sheet	635
Applying, changing, and removing a style	636
Defining new styles	638
Editing and managing style sheets	640
Styles and Their Attributes	642
Type options	643
Background options	644
Block options	645
Box options	647
Border options	648
List options	649
Positioning options	650
Extensions options	651
Design Time Style Sheets	654
Summary	655

Chapter 21: Working with Layers 657

Layers 101	657
Creating Layers with Dreamweaver	659
Inserting a layer object	659
Using the Insert ⇄ Layer command	661
Setting default characteristics of a layer	661
Embedding a layer with style sheets	662
Choosing relative instead of absolute positioning	665
Modifying a Layer	666
Selecting a layer	666
Resizing a layer	666
Moving a layer	667
The Layers panel	674
Aligning layers with the ruler and grid	676
Adding elements to a layer	678
Forms and layers	679
Creating Your Page Design with Layers	680
Using the Tracing Image	680
Preventing overlaps	681
Designing precision layouts	682

Converting content to layers	682
Converting layers to tables	683
Activating Layers with Behaviors	685
Drag Layer	686
Set Text of Layer	688
Show-Hide Layers	689
Dreamweaver Technique: Creating a Loading Layer	690
Summary	690

Chapter 22: Working with Timelines

693

Into the Fourth Dimension with Timelines	693
Timeline capabilities	694
A few ground rules	695
Creating Animations with Timelines	695
Adding Layers to the Timelines Panel	696
Modifying a Timeline	698
Altering the animation bars	698
Using the Timeline controls	699
Adding keyframes	702
Removing timeline elements	704
Changing animation speed	704
Recording a layer's path	705
Triggering Behaviors in Timelines	707
Dreamweaver Technique: Creating a Multiscreen Slideshow	709
Step 1: Preparing the graphic elements	709
Step 2: Creating the slideshow timeline	711
Step 3: Creating the moving layers timeline	712
Step 4: Adding the behaviors	714
Summary	715

Chapter 23: Using Behaviors

717

Understanding Behaviors, Events, and Actions	717
Attaching a Behavior	718
Using the Behaviors panel	719
Adding a behavior	720
Managing events	721
Standard actions	724
Installing, Managing, and Modifying Behaviors	751
Altering the parameters of a behavior	752
Sequencing behaviors	752
Deleting behaviors	752
Summary	752

Part V: Adding Multimedia Elements

753

Chapter 24: Fireworks Integration

755

Easy Graphics Modification	755
Optimizing an image in Fireworks	756
Editing an image in Fireworks	759
Replacing an image placeholder using Fireworks	760

Inserting Rollovers	762
Using Dreamweaver's behaviors	762
Using Fireworks' code	764
Modifying sliced images	768
Editing Fireworks-Created Pop-Up Menus	769
Controlling Fireworks with Dreamweaver	770
Web photo album	770
Building Dreamweaver/Fireworks extensions	771
Summary	775

Chapter 25: Inserting Flash and Shockwave Elements 777

Director and Flash: What's the Difference?	778
Including Flash and Shockwave Movies in Dreamweaver Projects	780
Specifying Shockwave Properties	783
Additional parameters for Shockwave	785
Automatic settings for Shockwave files	785
Designating Flash Attributes	785
Setting the scale in Flash movies	786
Additional parameters for Flash	787
Creating Flash Buttons and Crafting Templates	788
Creating your own Flash Button templates	790
Working with Flash Text	791
Configuring MIME Types	793
Managing Links in Flash Movies with Dreamweaver	794
Providing User Interaction with Shockwave Movies	795
Dreamweaver Technique: Creating inline Shockwave controls	796
Dreamweaver Technique: Playing Shockwave movies in frames	797
Dreamweaver Technique: Triggering behaviors from Flash movies	800
Dreamweaver Technique: Using the JavaScript Integration Kit for Flash	802
Editing Flash Movies from within Dreamweaver	813
Summary	814

Chapter 26: Adding Video to Your Web Page 817

Video on the Web	817
The Streaming Media Big Three	818
RealMedia	818
QuickTime	820
Windows Media	821
Working with Video Clips	822
Linking to video	823
Embedding video	824
Playing Videos within Dreamweaver	824
Inserting QuickTime Movies	825
QuickTime versions	830
Playing QuickTime VR	831
Streaming with RealMedia	832
A RealMedia example	834
Creating RealMedia metafiles	834
Inserting RealMedia in your Web page	834
Summary	837

Chapter 27: Using Audio on Your Web Page 839

Digital Audio Fundamentals	839
File formats	839
Making audio files lighter	841
Music Files	843
MP3 Mini-Primer	844
Player support	844
Encoding MP3	845
Linking to Audio Files	845
Embedding Sounds and Music	846
Playing background music	847
Targeting Specific Plugins	849
Windows Media Player audio	850
Using Embed with ActiveX	852
Using Netscape's LiveAudio Plugin	852
Installing Streaming Audio	854
Working with floating or embedded RealAudio players	855
Accessing RealAudio parameters	857
Summary	858

Part VI: Enhancing Web Site Management and Workflow in Dreamweaver

859**Chapter 28: Using Dreamweaver Templates 861**

Understanding Templates	861
Creating Your Own Templates	863
Using Editable Regions	864
Marking existing content as editable	864
Inserting a new editable region	866
Locking an editable region	867
Adding Content to Template Documents	867
Making Attributes Editable	869
Setting Editable Attributes	871
Enabling Repeating Regions	873
Modifying a repeating region	874
Constructing a Repeating Table	876
Establishing Optional Regions	877
Combining editable and optional regions	880
Setting optional region properties	880
Evaluating template expressions	881
Dreamweaver Technique: Template Expression examples	885
Nesting Templates	891
Working with Templates in the Assets Panel	893
Creating a blank template	895
Deleting and opening templates	895
Applying templates	896
Mapping inconsistent template regions	896

Updating Templates	898
Removing Template Markup	899
Deleting template markup individually	899
Removing template markup from an entire page	900
Exporting a site without template markup	900
Changing the Default Document	901
Summary	902

Chapter 29: Using the Repeating Elements Library 903

Dreamweaver Library Items	903
Using the Library Assets Panel	904
Adding a Library item	905
Moving Library items to a new site	906
Inserting a Library item in your Web page	906
Deleting an item from the Library	908
Renaming a Library item	909
Editing a Library Item	909
Updating Your Web Sites with Libraries	911
Applying Server-Side Includes	912
Adding server-side includes	913
Editing server-side includes	914
Summary	915

Chapter 30: Maximizing Browser Targeting 917

Converting Pages in Dreamweaver	918
Making 3.0-compatible pages	918
Evolving 3.0 pages to 4.0 standards	920
Ensuring Browser Compatibility	920
Internal coding for cross-browser compatibility	921
Designing Web pages for backward compatibility	923
Dreamweaver Technique: Browser checking	924
Testing Your Page with a Targeted Browser	927
Testing browser compatibility for a Web page	927
Testing browser compatibility for an entire site	929
Using the results of the browser check	930
Customizing a Browser Profile	931
Understanding the browser profile structure	931
Creating a browser profile	932
Validating Your Code	935
Setting Validator preferences	936
Summary	938

Chapter 31: Building Web Sites with a Team 939

Following Check In/Check Out Procedures	939
Check In/Check Out overview	940
Enabling Check In/Check Out	942
Checking files in and out	943
Integrating Dreamweaver with Visual SourceSafe	945
Communicating with WebDAV	947

Keeping Track with Design Notes	949
Setting up for Design Notes	949
Setting the status with Design Notes	950
Creating custom Design Notes	952
Viewing Design Notes	953
Browsing File View Columns	954
Generating Reports	956
Outputting HTML reports	958
Using Workflow reports	959
Collaborating with Macromedia Sitespring	960
Summary	962

Chapter 32: Integrating with XML 963

Understanding XML	963
Exporting XML	965
Importing XML	968
Building Your Own XML Files	969
Summary	969

Part VII: Extending Dreamweaver 971

Chapter 33: Customizing Dreamweaver 973

Adding New Commands	974
Understanding Dreamweaver commands	974
Recording and replaying commands	977
Scripting commands	981
Dreamweaver Techniques: Useful command routines	982
Managing Menus and Keyboard Shortcuts	988
Handling History panel commands	989
Using the Keyboard Shortcut editor	989
Adjusting the menus.xml file	992
Building menu commands	995
Working with Custom Tags	996
Customizing Property Inspectors	999
Coding a Property inspector	999
Designing a Property inspector	1003
Making Custom Floating Panels	1004
Developing Translators	1007
Translator functions	1008
Locking code	1010
Extending C-Level Libraries	1011
Calling C-level extensions	1012
Building C-level extensions	1013
Customizing Your Tag Libraries	1014
Editing tag libraries, tags, and attributes	1014
Creating and deleting tag libraries, tags, and attributes	1016
Importing a DTD or schema to create a new tag library	1017
Summary	1018

Chapter 34: Creating and Using Objects 1019

Inserting Dreamweaver Objects	1019
Modifying the Insert Bar	1021
Reorganizing the objects and adding categories	1021
Adding Other Objects	1022
Creating Custom Objects	1025
Making simple objects	1025
Building an object button	1028
Putting JavaScript to Work in Custom Objects	1029
Using the objectTag() function	1029
Offering help	1031
Attaching a parameter form	1031
Using the form controls	1034
Adding images to your objects	1040
Using layers and Flash movies in objects	1041
Summary	1042

Chapter 35: Creating a Behavior 1043

Creating a Behavior from Scratch	1043
Step 1: Define your behavior	1044
Step 2: Create the action file	1045
Step 3: Build the user interface	1047
Step 4: Apply the behavior	1050
Step 5: Inspect the behavior	1051
Step 6: Test your behavior	1052
Debugging the behavior	1054
The Extending Dreamweaver Documentation	1054
Document Object Model	1055
Dreamweaver JavaScript API extensions	1059
Behavior API	1071
Useful Common Functions	1074
Dreamweaver Behavior Techniques	1076
Specifying an event	1076
Returning a value	1077
Including multiple functions	1077
Summary	1078

Chapter 36: Handling Server Behaviors 1079

Understanding Server Behaviors	1079
Applying and Managing Server Behaviors	1080
Inserting and removing server behaviors	1081
Editing the parameters	1081
Standard Server Behaviors	1082
Recordset (Query)	1082
Repeat Region	1084
Recordset Paging	1084
Move To Specific Record	1085
Show Region	1086
Go To Detail Page	1087

Go To Related Page	1088
Insert Record	1089
Update Record	1090
Delete Record	1092
