# CONTENTS

Acknowledgments . . . . .	xiii
Introduction. . . . .	xv
<b>❖ 1 Introduction to High Availability, Clustering, and Load-Balancing Technologies . . . . .</b>	<b>1</b>
Introduction to High Availability . . . . .	2
High Availability . . . . .	3
Pros and Cons to Clustering and Load Balancing . . . . .	5
Hot Spare . . . . .	6
A Need for Redundancy . . . . .	7
Manageability . . . . .	7
Reliability . . . . .	7
Scalability . . . . .	7
Clustering with NT 4.0 . . . . .	9
Windows 2000 Clustering and Load Balancing . . . . .	10
Windows 2000 Clustering Services . . . . .	10
Network Load Balancing . . . . .	14
Server 2003 Clustering and Load Balancing . . . . .	17
Windows Server 2003 Enterprise Servers . . . . .	17
Windows Server 2003 . . . . .	17
Application Center 2000 . . . . .	18
Component Load Balancing . . . . .	20
Highly Available Databases with SQL Server 2000 . . . . .	21
Designing a Highly Available Solution . . . . .	22
Creating a Project Plan . . . . .	23
Pilots and Prototypes . . . . .	23
Designing a Clustered Solution . . . . .	24
Designing a Load-Balanced Third-Party Solution . . . . .	33

N-Tier Designs . . . . .	34
Three-Tier Designs . . . . .	35
Security and Remote Access Design . . . . .	36
Handling the Costs . . . . .	38
Budget . . . . .	38
ROI and TCO Fundamentals . . . . .	39
Creating Your Design Plan and Implementation Team . . . . .	40
Creating the Project Plan . . . . .	40
The Team (Human Resources) . . . . .	41
Management's Approval and Getting Started . . . . .	41
<b>❖ 2 Designing a Clustered Solution with Windows 2000 Advanced Server . . . . .</b>	<b>43</b>
Designing a Clustered Solution with Windows 2000	
Advanced Server . . . . .	44
Where to Begin . . . . .	44
The Design Phase . . . . .	45
Plan Your Hardware Roll Out . . . . .	45
Microsoft's Hardware Compatibility List . . . . .	46
The Servers and Presales Support . . . . .	46
Power Supplies . . . . .	47
Power and Uninterruptible Power Supply (UPS) . . . . .	47
Server Mounting and Racking . . . . .	48
Environmental Considerations . . . . .	48
Locked Cases and Physical Security . . . . .	49
Central Processing Unit (CPU) . . . . .	49
Memory Requirements (Physical and Virtual) . . . . .	49
NIC's Cabling and Switch Connections . . . . .	50
Small Computer System Interface (SCSI) . . . . .	52
Advanced SCSI Configuration . . . . .	54
Configuring the Shared SCSI Bus . . . . .	54
SCSI Cables: Lengths, Termination, and Troubleshooting . . . . .	55
Fibre Channel . . . . .	56
Quorum Devices and Shared Storage . . . . .	56
Adding Devices to the Shared SCSI Bus . . . . .	59
RAID Considerations . . . . .	60
Cluster Server Drive Considerations . . . . .	61
Final Hardware Design Considerations . . . . .	61
Plan your Software Rollout . . . . .	61
Preinstallation Configurations . . . . .	62
Installation and Configuration . . . . .	62
Precluster System Customization and Configuration . . . . .	67
Disk Drive Configuration . . . . .	67
Page File Configuration . . . . .	73
Configuring Network Properties . . . . .	73
Heartbeat Connection and Client Access . . . . .	75

IP Addressing and NIC Card Configurations . . . . .	76
Advanced Configuration and Troubleshooting for Network Connections . . . . .	80
NETBIOS and WINS . . . . .	84
User Accounts and Security . . . . .	86
Cluster Service Account Advanced Configuration . . . . .	88
Domain Connection . . . . .	90
Clustering Service Preinstallation Checklist . . . . .	93
Clustering Services Installation . . . . .	94
Joining a Cluster . . . . .	99
Postinstallation Troubleshooting . . . . .	100
Using Cluster.exe Command-Line Administration . . . . .	100
The Test of Failover and Last Tips . . . . .	101
Designing a NLB Solution with Windows 2000 Advanced Server . . . . .	102
Where to Begin . . . . .	103
The Design Phase . . . . .	104
Hardware Load Balancers and Software Load Balancers . . . . .	105
Topology Maps . . . . .	105
Initial NLB Planning and Readiness Assessment . . . . .	105
NLB Software Rollout . . . . .	108
Installation and Configuration . . . . .	110
Configuring Cluster Parameter . . . . .	110
Configuring Host Parameters . . . . .	113
Configuring the Port Rules Tab . . . . .	115
Windows 2000 Advanced Server NLB Installation and Advanced Settings . . . . .	119
NLB Cluster Performance Is Slow . . . . .	119
Exam Fundamentals . . . . .	121
Conclusion . . . . .	122
<b>❖ 3 Designing a Clustered Solution with Windows Server 2003 . . . . .</b>	<b>123</b>
Windows Server 2003 Rolling Upgrade . . . . .	124
Planning a Rolling Upgrade with Management . . . . .	124
Planning a Rolling Upgrade . . . . .	127
Rolling Upgrade Going Live . . . . .	134
Windows Server 2003 Rolling Upgrade . . . . .	136
Designing a Clustered Solution with Windows Server 2003 . . . . .	137
Where to Begin . . . . .	137
The Design Phase . . . . .	138
Other Infrastructure Design Concerns . . . . .	140
Clustering Services Install Preinstallation Checklist . . . . .	141
Configuring Network Properties . . . . .	142
Domain Connection and Client Access . . . . .	144
Installation and Configuration of Windows Server 2003 Cluster Services . . . . .	146

Configuring and Troubleshooting the Cluster Service . . . .	159
New Command Line Tools . . . . .	175
Windows Server 2003 Cluster Tips . . . . .	175
Designing a NLB Solution with Windows Server 2003 . . . . .	177
Where to Begin . . . . .	177
The Design Phase . . . . .	181
Initial NLB Planning and Readiness Assessment . . . . .	182
Windows Server 2003 NLB Software Rollout . . . . .	184
Cluster Parameters . . . . .	185
Host Parameters . . . . .	189
Port Rules . . . . .	191
Adding/Editing Port Rules . . . . .	193
Managing Network Load Balancing . . . . .	196
Using the Network Load Balancing Manager . . . . .	196
Using the NLB Command . . . . .	198
Conclusion . . . . .	201
<b>❖ 4 Designing a Clustered and Load-Balanced Solution with     Application Center 2000 . . . . .</b>	<b>203</b>
Predesign Planning . . . . .	204
The Purpose of Application Center 2000 . . . . .	204
Application Center 2000 Feature Set and Requirements . . . . .	206
Preparation and Installation . . . . .	213
Planning the Deployment of Application Center 2000 in n-tier Environments . . . . .	214
Basic Configuration of Application Center 2000 . . . . .	218
Creating a New Cluster . . . . .	218
The Cluster Controller . . . . .	224
Adding a New Member to an Application Center 2000 Cluster . . . . .	226
Postdesign Tips and Troubleshooting . . . . .	227
Memory Check . . . . .	227
Changing Node Names . . . . .	228
The Network Load Balancing Hot Fix Package . . . . .	228
Uninstalling Application Center 2000 Doesn't Remove a Member from the Cluster . . . . .	228
Conclusion . . . . .	229
<b>❖ 5 Designing a Clustered Solution with Windows SQL Server 2000     Enterprise Edition . . . . .</b>	<b>231</b>
Predesign Planning . . . . .	232
SQL Server Component Planning . . . . .	232
SQL Server Cluster Model . . . . .	235
Planning for Failover-Based Pricing . . . . .	237
SQL Server 2000 Minimum Requirements . . . . .	237
Planning Tips for SQL Server 2000 Failover Cluster Servers . . . . .	239

Placement of SQL Server in the N-Tier Architecture . . . . .	239
Virtual Server . . . . .	240
Preinstallation Checklist . . . . .	241
Installing and Configuring MSDTC . . . . .	242
Installation and Configuration of SQL Server in a	
Clustered Solution . . . . .	244
Advanced Troubleshooting . . . . .	254
Running Services . . . . .	254
Event Viewer Errors . . . . .	255
Other Error Messages . . . . .	255
IP Addressing Problems . . . . .	257
Changing Service Accounts on a SQL Virtual Server . . . . .	260
Changing a Clustered SQL Server Network Name . . . . .	261
Moving Resources . . . . .	261
Network Failure . . . . .	262
Log Files . . . . .	263
Conclusion . . . . .	263
<b>❖ 6 Designing a Highly Available Solution with Windows Services . . . . .</b>	<b>265</b>
Highly Available Windows Services . . . . .	266
Highly Available DHCP Services . . . . .	266
Highly Available WINS . . . . .	278
Conclusion . . . . .	287
<b>❖ 7 Building Advanced Highly Available Load-Balanced Configurations . . . . .</b>	<b>289</b>
Predesign Planning . . . . .	290
NLB Advanced Design and Troubleshooting . . . . .	290
More NLB Best Practices . . . . .	300
NLB Security Design . . . . .	302
Building a Highly Available Server 2003 NLB Solution . . . . .	304
Building a Load-Balanced Cluster with Server 2003 . . . . .	304
Conclusion . . . . .	313
<b>❖ 8 High Availability, Baselineing, Performance Monitoring, and</b>	
<b>Disaster Recovery Planning . . . . .</b>	<b>315</b>
Planning for High Availability . . . . .	316
Planning Your Downtime . . . . .	316
Building the Highly Available Solutions' Plan . . . . .	317
Disaster Recovery Planning . . . . .	321
Building the Disaster Recovery Plan . . . . .	321
System Monitoring and Baselineing . . . . .	325
Why Monitor and Baseline? . . . . .	326
Using Performance Monitor on Your Servers . . . . .	327
Configuring the Performance Console . . . . .	329
Advanced Performance Monitoring Techniques . . . . .	338
Conclusion . . . . .	350

❖ <b>A Project Plan Sample</b> . . . . .	<b>351</b>
High-Availability Project Planning . . . . .	352
Build the Project . . . . .	352
❖ <b>B Advanced Troubleshooting: Event IDs</b> . . . . .	<b>357</b>
Event ID 1000 . . . . .	358
Event ID 1002 . . . . .	358
Event ID 1006 . . . . .	358
Event ID 1007 . . . . .	359
Event ID 1009 . . . . .	359
Event ID 1010 . . . . .	359
Event ID 1011 . . . . .	359
Event ID 1015 . . . . .	360
Event ID 1016 . . . . .	360
Event ID 1019 . . . . .	360
Event ID 1021 . . . . .	360
Event ID 1022 . . . . .	361
Event ID 1023 . . . . .	361
Event ID 1024 . . . . .	361
Event ID 1034 . . . . .	362
Event ID 1035 . . . . .	362
Event ID 1040 . . . . .	362
Event ID 1042 . . . . .	363
Event ID 1043 . . . . .	363
Event ID 1044 . . . . .	363
Event ID 1045 . . . . .	363
Event ID 1056 . . . . .	364
Event ID 1061 . . . . .	364
Event ID 1062 . . . . .	364
Event ID 1063 . . . . .	364
Event ID 1068 . . . . .	365
Event ID 1069 . . . . .	365
Event ID 1070 . . . . .	365
Event ID 1071 . . . . .	365
Event ID 1104 . . . . .	366
Event ID 1105 . . . . .	366
Event ID 1107 . . . . .	366
Event ID 5719 . . . . .	366
Event ID 7000 . . . . .	367
Event ID 7013 . . . . .	367
❖ <b>Index</b> . . . . .	<b>369</b>
