

Contents

Preface	vii
Acknowledgments	xiii

Part I: Learning the Max Interface 1

Quick Start: Creating and Animating a Three-Fingered Gaaboot	3
Visiting an Alien World — Planning the Production	3
Modeling the Main Character	4
Tutorial: Modeling the Gaaboot’s body and head	5
Tutorial: Modeling the Gaaboot’s hands and feet	6
Tutorial: Adding face details	8
Tutorial: Connecting body parts	8
Creating the Landscape	11
Tutorial: Creating a lunar surface	11
Tutorial: Loading a background image	12
Adding Materials to Objects in the Scene	13
Tutorial: Applying materials	13
Tutorial: Adding eye pupils using vertex colors	15
Animating a Character	16
Tutorial: Creating and fitting a biped	16
Tutorial: Attaching the character skin to a biped	18
Tutorial: Animating a character’s motion	19
Rendering the Final Animation	20
Tutorial: Creating a preview animation	20
Tutorial: Rendering the final animation	21
Summary	22

Chapter 1: Finding Your Way — Exploring the Max Interface	23
The Interface Elements	24
Using the Menus	26
Using the Toolbars	27
Learning the main toolbar	28
Viewing the floating toolbars	31
Using the Viewports	31
Using the Command Panel	31
Working with rollouts	32
Increasing the Command Panel’s width	32
Tutorial: Rearranging the interface for lefties	34
Using the Lower Interface Bar Controls	35
Interacting with the Interface	36
Gaining quick access with the right-click quadmenus	36
Understanding the button color cues	37
Using drag-and-drop features	37

Controlling spinners	37
Finding keyboard shortcuts	38
Using strokes	38
Understanding modeless and persistent dialog boxes	38
Getting Help	38
Browser-based reference guides	39
Online help	39
Summary	40
Chapter 2: Seeing It All – Working with the Viewports	41
Understanding 3D Space	41
Axonometric versus Perspective	42
Orthographic and Isometric views	42
Learning viewports in Max	43
Using the Viewport Navigation Controls	44
Zooming a view	45
Panning a view	45
Walking through a view	45
Rotating a view	46
Controlling viewports with a scroll wheel	47
Controlling camera and spotlight views	47
Tutorial: Navigating the active viewport	47
Using the Views Menu	49
Undoing and saving changes made with the Viewport Navigation Controls	49
Viewing grids	50
Displaying various viewport items	50
Disabling and refreshing viewports	50
Maximizing the active viewport	51
Configuring the Viewports	52
Setting the viewport rendering method	53
Altering the Viewport layout	59
Using Safe Frames	60
Understanding Adaptive Degradation	62
Defining regions	63
Working with Viewport Backgrounds	64
Loading viewport background images	64
Loading viewport background animations	65
Tutorial: Loading reference images for modeling	66
Summary	67
Chapter 3: Saving Your Scene – Working with Files and XRefs	69
Working with Max Scene Files	69
Saving files	70
Opening files	71
Merging and replacing objects	72
Archiving files	73
Getting out	73
Setting File Preferences	73
Handling files	73
Backing up files	76
Tutorial: Setting Auto Backup	76
Maintaining log files	77

Importing and Exporting	77
Importing supported formats	77
Import preference	78
Exporting supported formats	78
Exporting utilities	82
Referencing External Objects	84
Using XRef scenes	84
Using XRef objects	88
Tutorial: Using an XRef proxy	90
XRef objects in the Modifier Stack	92
Configuring XRef paths	92
Using the File Utilities	92
Using the Asset Browser utility	93
Finding files with the Max File Finder utility	94
Collecting files with the Resource Collector utility	94
Using the File Link Manager utility	95
Using i-drop	95
Accessing File Information	96
Displaying scene information	96
Viewing file properties	96
Viewing files	97
Summary	98

Chapter 4: Customizing the Max Interface and Setting Preferences 99

Using the Customize User Interface Window	99
Customizing keyboard shortcuts	99
Tutorial: Assigning keyboard shortcuts	100
Customizing toolbars	101
Tutorial: Creating a custom toolbar	102
Customizing quadmenus	104
Customizing menus	106
Tutorial: Adding a new menu	107
Customizing colors	107
Customizing Modify and Utility Panel Buttons	108
Working with Custom Interfaces	109
Saving and loading a custom interface	109
Tutorial: Saving a custom interface	110
Locking the interface	110
Reverting to the startup interface	111
Switching between default and custom interfaces	111
Configuring Paths	112
Selecting System Units	113
Using Custom and Generic units	114
Rescaling world units	115
Setting Preferences	115
General preferences	115
Files panel preferences	117
Viewport preferences	118
Gamma preferences	123
Rendering preferences	124
Animation preferences	124
Inverse Kinematics preferences	126
Gizmos preferences	126

MAXScript preferences	126
Radiosity preferences	126
mental ray preferences	126
Summary	127

Part II: Working with Objects

129

Chapter 5: Creating and Editing Primitive Objects 131

Creating Primitive Objects	131
Using the Create menu	131
Using the Create panel	132
Naming and renaming objects	133
Assigning colors	134
Using the Color Clipboard	136
Using different creation methods	137
Using the Keyboard Entry rollout for precise dimensions	139
Altering object parameters	139
Recovering from mistakes and deleting objects	139
Tutorial: Exploring the Platonic solids	140
Exploring the Primitive Object Types	141
Standard Primitives	141
Extended Primitives	145
Modifying object parameters	155
Tutorial: Filling a treasure chest with gems	155
Architecture Primitives	156
Using AEC Objects	156
Tutorial: Add stairs to a clock tower building	158
Summary	159

Chapter 6: Selecting Objects and Setting Object Properties 161

Selecting Objects	161
Selection filters	162
Select buttons	163
Selecting with the Edit menu	164
Selecting multiple objects	167
Using the Paint Selection Region tool	167
Tutorial: Selecting objects	168
Locking selection sets	169
Using named selection sets	170
Editing named selections	170
Isolating the current selection	171
Selecting objects in other interfaces	171
Setting Object Properties	172
Viewing object information	173
Setting display properties	173
Setting rendering controls	175
Enabling Motion Blur	176
Using the Advanced Lighting and mental ray panels	176
Using the User-Defined panel	176
Hiding and Freezing Objects	177
Using the Display Floater dialog box	177
Using the Display panel	178

Object Culling Utility	179
Tutorial: Hidden toothbrushes	180
Using Layers	181
Using the Layer Manager.	181
Using the Layer List.	184
Tutorial: Dividing a scene into layers.	185
Summary	186
Chapter 7: Transforming Objects – Translate, Rotate, and Scale	187
Translating, Rotating, and Scaling Objects	187
Translating objects	187
Rotating objects.	188
Scaling objects	188
Using the transform buttons.	189
Working with the Transformation Tools.	189
Working with the Transform Gizmos	189
Using the Transform Type-In dialog box	192
Using the status bar Type-In fields	192
Understanding the Transform Managers.	193
Tutorial: Landing a spaceship in port	198
Using Pivot Points	199
Positioning pivot points	199
Aligning pivot points	200
Transform adjustments	200
Using the Reset XForm utility	201
Tutorial: A bee buzzing about a flower.	201
Using the Align Commands	203
Aligning objects	203
Using the Quick Align tool	203
Aligning normals	204
Tutorial: Aligning a kissing couple	204
Aligning to a view	205
Using Grids	206
The Home Grid	206
Creating and activating new grids	206
Using AutoGrid	207
Tutorial: Creating a Spyglass	207
Using Snap Options	208
Setting snap points	209
Setting snap options	210
Using the Snaps toolbar	211
Tutorial: Creating a lattice for a methane molecule	211
Summary	213
Chapter 8: Cloning Objects and Creating Object Arrays	215
Cloning Objects.	215
Using the Clone command	215
Using the Shift-clone method	216
Tutorial: Cloning dinosaurs	216
Understanding Cloning Options	217
Working with copies, instances, and references	218
Tutorial: Creating instanced doughnuts	218
Tutorial: Working with referenced apples	219

Mirroring Objects	221
Using the Mirror command	221
Tutorial: Mirroring a robot's leg.	221
Cloning over Time	223
Using the Snapshot command.	223
Tutorial: Creating a tower of cubes.	223
Spacing Cloned Objects	225
Using the Spacing tool	225
Tutorial: Stacking a row of dominoes.	226
Using the Clone and Align Tool	227
Aligning source objects to destination objects	227
Tutorial: Cloning and aligning objects	228
Creating Arrays of Objects	229
Linear arrays.	230
Tutorial: Building a white picket fence	230
Circular arrays.	232
Tutorial: Building a Ferris wheel	232
Working with a ring array	233
Tutorial: Using Ring Array to create a carousel	234
Summary	236
Chapter 9: Grouping and Linking Objects	237
The Group Menu	237
Working with Groups.	237
Creating groups	238
Ungrouping objects.	238
Opening and closing groups.	238
Attaching and detaching objects	238
Tutorial: Grouping a plane's parts together	238
Building Assemblies	240
Adding lights to assemblies	240
Wiring Luminaire helper objects to light objects	241
Tutorial: Creating a flashlight assembly	241
Understanding Parent, Child, and Root Relationships.	243
Building Links between Objects	243
Linking objects	243
Unlinking objects	244
Tutorial: Creating a solar system	244
Displaying Links and Hierarchies.	245
Displaying links in the viewport.	245
Viewing hierarchies.	246
Working with Linked Objects	247
Selecting hierarchies	247
Linking to dummies.	248
Tutorial: Circling the globe	248
Summary	249
Chapter 10: Working with the Schematic View	251
Using the Schematic View Window.	251
The Graph Editors menu options	251
The Schematic View interface	252
Working with Schematic View nodes	256

Working with Hierarchies	260
Using the Display floater	260
Connecting nodes	261
Copying modifiers and materials between nodes	262
Assigning controllers and wiring parameters	262
Tutorial: Linking a character with the Schematic View	263
Setting Schematic View Preferences	264
Limiting nodes	264
Working with grids and backgrounds	265
Display preferences	266
Tutorial: Adding a background image to the Schematic View	266
Using List Views	267
Summary	268

Chapter 11: Introducing Modifiers and Using the Modifier Stack 269

Exploring the Modifier Stack	269
Understanding Base Objects	269
Applying modifiers	270
Other Modifier Stack entities	270
Using the Modifier Stack	270
Reordering the Stack	273
Tutorial: Creating a molecular chain	273
Holding and fetching a scene	275
Collapsing the Stack	275
Using the Collapse utility	276
Using gizmo subobjects	277
Tutorial: Squeezing a plastic bottle	277
Modifying subobjects	278
Topology dependency	278
Exploring Modifier Types	278
Object-Space versus World-Space modifiers	280
Tutorial: Learning Object-Space versus World-Space order	280
Selection modifiers	281
Parametric Deformer modifiers	284
Free Form Deformer modifiers	300
Summary	302

Part III: Modeling

303

Chapter 12: Modeling Basics and Working with Subobjects 305

Exploring the Modeling Types	305
Parametric objects versus editable objects	306
Converting to editable objects	307
Tutorial: Creating trumpet flowers with various modeling types	307
Modeling for Games	309
Enabling a polygon count	309
The Polygon Counter utility	309
The Level of Detail utility	310
Modeling Architecture	311
Understanding Normals	311
Viewing normals	311
Tutorial: Cleaning up imported meshes	312

Working with Subobjects	313
Using Soft Selection	314
Tutorial: Soft selecting a heart shape from a plane	315
Applying modifiers to subobject selections	317
Tutorial: Building a superhero logo	317
Modeling Helpers	318
Using Dummy and Point objects	318
Measuring coordinate distances	319
Tutorial: Testing the Pythagorean Theorem	320
Summary	321
Chapter 13: Drawing and Editing 2D Splines and Shapes	323
Drawing in 2D	323
Working with shape primitives	324
Tutorial: Drawing a company logo	333
Tutorial: Viewing the interior of a heart	334
Editing Splines	335
Editable Splines versus the Edit Spline modifier	336
Making splines renderable	336
Selecting spline subobjects	337
Controlling spline geometry	339
Editing vertices	342
Editing segments	348
Editing Spline subobjects	350
Using Spline Modifiers	355
Spline-specific modifiers	355
Moving Splines to 3D	358
Summary	362
Chapter 14: Using Editable Poly Objects	363
Understanding Poly Objects	363
Creating Editable Poly Objects	364
Converting objects	365
Collapsing to a mesh object	365
Applying the Edit Poly modifier	365
Editing Poly Objects	365
Editable Poly subobject modes	366
Selection rollout	366
Tutorial: Modeling a clown head	367
Edit Geometry rollout	369
Editing Vertex subobjects	377
Editing Edge Subobjects	379
Editing Border subobjects	381
Editing Polygon and Element subobjects	382
Surface properties	385
Tutorial: Modeling a tooth	388
Summary	390
Chapter 15: Painting Deformations	391
The Basics of Deformation Painting	391
Using the Deformation Brushes	393
Controlling the deformation direction	393
Limiting the deformation	393

Committing any changes	393
Using the Relax and Revert brushes	393
Tutorial: Adding veins to a forearm	394
Setting Brush Options	395
Summary	396
Chapter 16: Working with Mesh Modifiers	397
Primitive Maintenance Modifiers	397
Edit Mesh modifier	397
Edit Poly modifier	398
Edit Geometry Modifiers	398
Cap Holes modifier	398
Delete Mesh modifier	399
Extrude modifier	399
Face Extrude modifier	399
Tutorial: Extruding a bullet	400
Optimize modifier	401
MultiRes modifier	402
Tutorial: Creating a MultiRes hand	403
Smooth modifier	403
Symmetry modifier	404
Tutorial: Creating symmetrical antlers	404
Tessellate modifier	405
Vertex Weld modifier	406
Miscellaneous Modifiers	406
Edit Normals	406
Normal modifier	407
STL Check modifier	407
Subdivision Surface Modifiers	407
MeshSmooth modifier	408
TurboSmooth modifier	408
Tutorial: Creating a heart-shaped NURMS	408
Summary	410
Chapter 17: Surface Modeling with Patches and NURBS	411
Introducing Patch Grids	411
Creating a patch grid	412
Tutorial: Creating a checkerboard	412
Editing Patches	413
Editable patches versus the Edit Patch modifier	414
Selecting patch subobjects	414
Working with Patch Geometry	416
Editing vertices	417
Editing handles	420
Editing edges	421
Editing Patch and Element subobjects	423
Tutorial: Creating a maple leaf from patches	426
Using Modifiers on Patch Objects	427
Patch Select modifier	427
Edit Patch modifier	428
Delete Patch modifier	428
Using the Surface tools	428

Creating NURBS Curves and Surfaces	432
NURBS curves	432
NURBS surfaces	433
Converting objects to NURBS	434
Editing NURBS	436
Attach and Import	436
Display options	436
Surface and Curve Approximation	436
The NURBS Creation Toolbox	438
Using NURBS subobject editing tools	441
Working with NURBS	442
Lofting a NURBS surface	442
Tutorial: Creating a U Loft NURBS spoon	442
Creating a UV Loft surface	443
Lathing a NURBS surface	443
Tutorial: Lathing a NURBS CV curve to create a vase	444
Creating a 1-rail and 2-rail sweep surface	444
Tutorial: Creating a flower stem	445
Sculpting a rectangular NURBS surface	446
Tutorial: Creating a NURBS leaf	446
Tutorial: Sculpting a flower petal	448
NURBS modifiers	449
Summary	451
Chapter 18: Building Compound Objects	453
Understanding Compound Object Types	453
Morphing Objects	454
Creating Morph keys	455
Morph objects versus the Morph modifier	455
Tutorial: Morphing a woman's face	455
Creating Conform Objects	456
Setting a vertex projection direction	457
Tutorial: Placing a facial scar	458
Creating a ShapeMerge Object	459
Cookie Cutter and Merge options	459
Tutorial: Using the ShapeMerge compound object	460
Creating a Terrain Object	462
Coloring elevations	462
Tutorial: Creating an island with the Terrain compound object	463
Using the Mesher Object	464
Working with BlobMesh Objects	465
Setting BlobMesh Parameters	466
Tutorial: Creating icy geometry with BlobMesh	466
Creating a Scatter Object	467
Working with Source objects	468
Working with Distribution objects	469
Setting Transforms	470
Speeding updates with a proxy	470
Loading and saving presets	470
Tutorial: Covering the island with trees	470
Creating Connect Objects	471
Filling object holes	471
Tutorial: Creating a park bench	472

Modeling with Boolean Objects	474
Union	474
Intersection	474
Subtraction	474
Cut	475
Tips for working with Booleans	475
Tutorial: Creating a Lincoln Log set	475
Creating a Loft Object	477
Using the Get Shape and Get Path buttons	477
Controlling surface parameters	478
Changing path parameters	478
Setting skin parameters	479
Tutorial: Designing a slip-proof hanger	480
Deforming Loft objects	481
The Deformation window interface	481
Scale Deformation	484
Twist Deformation	484
Teeter Deformation	484
Bevel Deformation	484
Fit Deformation	485
Modifying Loft subobjects	486
Comparing shapes	487
Editing Loft paths	487
Tutorial: Creating drapes	488
Loft objects versus surface tools	489
Summary	489

Chapter 19: Creating Particles and Particle Flow 491

Understanding the Various Particle Systems	491
Creating a Particle System	492
Using the Spray and Snow Particle Systems	493
Tutorial: Creating rain showers	494
Tutorial: Creating a snowstorm	495
Using the Super Spray Particle System	495
Super Spray Basic Parameters rollout	496
Particle Generation rollout	496
Particle Type rollout	497
Rotation and Collision rollout	502
Tutorial: Basketball shooting practice	503
Object Motion Inheritance rollout	504
Bubble Motion rollout	505
Particle Spawn rollout	505
Load/Save Presets rollout	506
Using the Blizzard Particle System	506
Using the PArray Particle System	507
Splitting an object into fragments	508
Tutorial: Creating rising steam	508
Using the PCloud Particle System	509
Using Particle System Maps	509
Using the Particle Age map	510
Using the Particle MBlur map	510
Tutorial: Creating jet engine flames	510

Controlling Particles with Particle Flow	511
The Particle View window	511
The Standard Flow	512
Working with actions	513
Tutorial: Creating an avalanche	515
Using Particle Flow helpers	517
Wiring events	517
Tutorial: Moths chasing a light	517
Debugging test actions	518
Tutorial: Firing at a fleeing spaceship	519
Tutorial: Creating a black hole using Particle Flow	521
Summary	522

Part IV: Materials and Maps

525

Chapter 20: Exploring the Material Editor 527

Understanding Material Properties	527
Working with the Material Editor	529
Using the Material Editor controls	529
Using the sample slots	532
Naming materials	535
Getting new materials	535
Assigning materials to objects	536
Picking materials from a scene	536
Selecting objects by material	536
Previewing materials and rendering maps	536
Setting Material Editor options	537
Resetting materials	539
Removing materials and maps	539
Using the Fix Ambient utility	539
Tutorial: Coloring Easter eggs	539
Using the Material/Map Browser	541
Working with libraries	543
Tutorial: Loading a custom material library	543
Using the Material/Map Navigator	544
Summary	545

Chapter 21: Creating Simple Materials 547

Using the Standard Material	547
Using Shading Types	547
Blinn shader	548
Phong shader	550
Anisotropic shader	551
Multi-Layer shader	551
Oren-Nayar-Blinn shader	552
Metal shader	552
Strauss shader	552
Translucent shader	553
Tutorial: Making curtains translucent	553
Accessing Other Parameters	554
Extended Parameters rollout	554
SuperSampling rollout	555

Maps rollout	556
Dynamic Properties rollout	556
mental ray connection rollout.	557
Tutorial: Coloring a dolphin	557
Using External Tools	558
Creating material textures using Photoshop	558
Capturing digital images	560
Scanning images.	561
Tutorial: Creating a fishing net	561
Summary	562
Chapter 22: Creating Advanced Multi-Layer Materials	563
Using Compound Materials	563
Blend	564
Composite	565
Double Sided.	565
Shellac	566
Multi/Sub-Object	566
Tutorial: Creating a patchwork quilt	567
Morpher	568
Shell.	569
Top/Bottom	569
Tutorial: Surfing the waves	569
Using Raytrace Materials	570
Using the Matte/Shadow Material	570
Matte/Shadow Basic Parameters rollout.	570
Tutorial: Ballooning in New York	571
Using the Ink 'n' Paint Material	572
Controlling paint and ink.	572
Tutorial: Cartooning a turtle.	573
Using Architectural Materials.	574
Using the DirectX 9 Shader	576
Applying Multiple Materials.	576
Using material IDs.	576
Tutorial: Mapping die faces	576
Using the Clean MultiMaterial utility	578
Material Modifiers	578
Material modifier	578
MaterialByElement modifier.	578
Tutorial: Creating random marquee lights with the MaterialByElement modifier	578
Summary	580
Chapter 23: Adding Material Details with Maps	581
Understanding Maps	581
Understanding Material Map Types	582
2D maps	582
3D maps	592
Compositor maps	599
Color modifier maps	601
Reflection and refraction maps	601

Using the Maps Rollout	605
Ambient Color mapping	605
Diffuse Color mapping	605
Diffuse Level mapping	606
Diffuse Roughness mapping	606
Specular Color mapping	606
Specular Level mapping	606
Glossiness mapping	606
Self-Illumination mapping	606
Opacity mapping	606
Filter Color mapping	606
Anisotropy mapping	607
Orientation mapping	607
Metalness mapping	607
Bump mapping	607
Reflection mapping	607
Refraction mapping	607
Displacement mapping	607
Tutorial: Creating space textures	608
Tutorial: Aging objects for realism	610
Using the Map Path Utility	611
Using Map Instances	612
Summary	613
Chapter 24: Controlling Mapping Coordinates	615
Mapping Modifiers	615
UVW Map modifier	615
Tutorial: Using the UVW Map modifier to apply decals	617
UVW Mapping Add and Clear modifiers	618
UVW XForm modifier	618
Map Scaler modifier	618
Camera Map modifier	619
Using the Unwrap UVW modifier	619
The Edit UVWs interface	619
Tutorial: Controlling the mapping of a covered wagon	625
Relaxing vertices	627
Summary	628
Chapter 25: Creating Baked Textures	629
Using Channels	629
Using the Channel Info dialog box	630
Select by Channel modifier	630
Rendering to a Texture	631
General Settings	631
Selecting Objects to Bake	632
Output settings	633
Baked Material and Automatic Mapping settings	633
Tutorial: Baking the textures for a dog model	634
Creating Normal Maps	635
Using the Projection modifier	636
Setting Projection Mapping options	636
Tutorial: Creating a Normal map for a crocodile model	637

Using Vertex Colors	638
Assigning vertex colors	638
Painting vertices with the Vertex Paint modifier	639
Tutorial: Marking heart tension	641
The Assign Vertex Color utility	642
Summary	642

Part V: Cameras and Lighting

643

Chapter 26: Working with Cameras 645

Learning to Work with Cameras	645
Creating a camera object.	646
Creating a camera view.	646
Tutorial: Setting up an opponent's view	647
Controlling a camera	648
Aiming a camera	650
Tutorial: Watching a rocket	650
Aligning cameras	650
Tutorial: Seeing the dinosaur's good side	651
Setting Camera Parameters	653
Lens settings and field of view	653
Camera type and display options.	654
Environment ranges and clipping planes	654
Camera Correction modifier	655
Creating multi-pass camera effects	655
Using the Depth of Field effect	656
Tutorial: Applying a Depth of Field effect to a row of windmills	657
Using the Motion Blur effect.	659
Tutorial: Using a Motion Blur multi-pass camera effect	659
Matching a Camera to a Background Image.	660
Setting camera match points	661
Tutorial: Driving in Rome	662
Using the Camera Tracker Utility.	663
Loading a movie file	664
Working with trackers	664
Using the tracker gizmo	665
Stepping through frames.	665
Automating the tracking process	667
Matching the camera	667
Smoothing the camera motion	668
Pinning objects	668
Tutorial: Tracking a camera zooming past traffic cones	669
Summary	671

Chapter 27: Basic Lighting Techniques 673

Understanding the Basics of Lighting	673
Natural and artificial light	673
A standard lighting method	674
Shadows	675
Getting to Know the Light Types	676
Default lighting	676
Ambient light	677
Omni light	677

Spotlight	677
Direct light	677
Skylight	678
Area Omni and Area Spot	678
Creating and Positioning Light Objects	678
Transforming lights	678
Listing lights	678
Placing highlights	679
Tutorial: Lighting the snowman's face	679
Viewing a Scene from a Light	680
Light viewport controls	680
Tutorial: Lighting a lamp	681
Altering Light Parameters	682
General parameters	683
The Intensity/Color/Attenuation rollout	684
Spotlight and directional light parameters	685
Advanced Effects	685
Shadow parameters	685
Optimizing lights	686
Manipulating Hotspot and Falloff cones	687
Working with Photometric Lights	687
Target and Free photometric lights	687
IES photometric lights	689
Using the Sunlight and Daylight Systems	690
Using the Compass helper	691
Understanding Azimuth and Altitude	691
Specifying date and time	691
Specifying location	691
Tutorial: Animating a day in 20 seconds	692
Using Volume Lights	693
Volume light parameters	693
Tutorial: Showing car headlights	695
Tutorial: Creating laser beams	696
Using projector maps and raytraced shadows	697
Tutorial: Projecting a trumpet image on a scene	698
Tutorial: Creating a stained-glass window	699
Summary	700

Chapter 28: Advanced Lighting, Light Tracing, and Radiosity 701

Selecting Advanced Lighting	701
How light tracing works	702
Enabling light tracing	703
Tutorial: Viewing color bleeding	705
Using Local Advanced Lighting Settings	706
Tutorial: Excluding objects from light tracing	706
Understanding Radiosity	707
Lighting for radiosity	708
Tutorial: Lighting an archway with radiosity	712
Using Local and Global Advanced Lighting Settings	713
Working with Advanced Lighting Materials	714
Advanced Lighting Override	714
Landscape material	715

Using Lighting Analysis	715
Summary	716

Part VI: Animation 717

Chapter 29: Animation and Keyframe Basics 719

Using the Time Controls	719
Setting frame rate	721
Setting speed and direction	721
Using Time Tags	721
Working with Keys	722
Auto Key mode	722
Set Key mode	723
Tutorial: Rotating a windmill's blades	723
Creating keys with the Time Slider	724
Copying parameter animation keys	724
Deleting all object animation keys	725
Using the Track Bar	725
Viewing and Editing Key Values	726
Using the Motion Panel	727
Setting parameters	728
Using trajectories	728
Tutorial: Making an airplane follow a looping path	729
Using Ghosting	731
Animating Objects	731
Animating cameras	732
Tutorial: Animating darts hitting a dartboard	732
Animating lights	733
Animating materials	733
Tutorial: Dimming lights	734
Using IFL files	735
Generating IFL files with the IFL Manager Utility	736
Tutorial: What's on TV?	736
Working with Previews	738
Creating previews	738
Viewing previews	740
Renaming previews	740
Summary	740

Chapter 30: Using Animation Modifiers 741

Animated Skin Modifiers	741
Using the Skin Modifier	741
Using the Skin Wrap modifiers	749
Using the Skin Morph modifier	751
Animated Deformation Modifiers	752
Morpher modifier	752
Tutorial: Morphing facial expressions	753
Using the Flex Modifier	755
Melt modifier	759
PatchDeform and SurfDeform modifiers	759
Tutorial: Deforming a car going over a hill	760
PathDeform modifier	761

Miscellaneous Animated Modifiers	761
Linked XForm modifier	761
SplineIK Control modifier	762
Attribute Holder modifier	762
Summary	763
Chapter 31: Wiring Custom Attributes	765
Adding Custom Parameters	765
Collecting Parameters	767
Wiring Parameters	770
Using the Parameter Wiring dialog box	770
Manipulator helpers	772
Tutorial: Controlling a crocodile's bite	772
Summary	773
Chapter 32: Animating with Constraints and Controllers	775
Restricting Movement with Constraints	775
Using constraints	776
Working with the constraints	776
Understanding Controller Types	786
Assigning Controllers	787
Automatically assigned controllers	787
Assigning controllers with the Animation menu	788
Assigning controllers in the Motion panel	789
Assigning controllers in the Track View	789
Setting Default Controllers	790
Examining the Various Controllers	790
Transform controllers	790
Position track controllers	792
Rotation and Scale track controllers	803
Parameter controllers	804
Summary	811
Chapter 33: Using the Expression Controller	813
Working with Expressions in Spinners	813
Understanding the Expression Controller Interface	814
Defining variables	815
Building expressions	815
Debugging and evaluating expressions	816
Managing expressions	816
Tutorial: Creating following eyes	817
Understanding Expression Elements	818
Predefined variables	818
Operators	819
Functions	820
Return types	822
Sample expressions	823
Using Expression Controllers	824
Animating transforms with the Expression controller	824
Animating parameters with the Float Expression controller	824
Tutorial: Inflating a balloon	825

Animating materials with the Expression controller	825
Tutorial: Controlling a stoplight.	826
Summary	828
Chapter 34: Working with the Track View	829
Learning the Track View Interface	829
The Track View layouts	829
Track View menus and toolbars.	830
Controller and Key panes	836
Lower interface toolbars	837
Working with Keys	838
Selecting keys	839
Using soft selection.	839
Adding and deleting keys	840
Moving, sliding, and scaling keys	840
Editing keys	840
Using the Randomize Keys utility.	840
Displaying keyable icons.	841
Editing Time.	841
Selecting time and the Select Keys by Time utility	842
Deleting, cutting, copying, and pasting time.	842
Reversing, inserting, and scaling time	842
Setting ranges	842
Editing Curves	843
Inserting new keys and moving keys	843
Tutorial: Animating a monorail	843
Drawing curves	846
Reducing keys	847
Working with tangents	847
Tutorial: Animating a flowing river	848
Applying out-of-range, ease, and multiplier curves.	849
Tutorial: Animating a wind-up teapot	850
Filtering Tracks	853
Working with Controllers	854
Using visibility tracks.	855
Adding Note Tracks.	855
Tutorial: Animating a hazard light	855
Tutorial: Animating a checkers move	857
Synchronizing to a Sound Track	860
Using the Sound Options dialog box	861
Tutorial: Adding sound to an animation	861
Summary	863

Part VII: Character Studio, Rigging, and Inverse Kinematics

865

Chapter 35: Creating and Animating Bipeds.	867
Character Studio Basics	867
Creating a Bipod	868
Customizing a bipod	870
Modifying a bipod.	872

Setting the Biped display options	874
Working with Postures and Poses	875
Tutorial: Creating a four-footed biped	876
Animating a Biped	877
Using Footstep mode	877
Tutorial: Making a biped jump on a box	879
Converting biped animation clips	880
Using Freeform mode	880
Loading and saving biped animation clips	882
Using Motion Flow mode	882
Previewing a biped animation	883
Moving a biped with its footsteps	883
Introducing the Biped Apps	883
Accessing the Motion Mixer	883
Accessing the Animation Workbench	884
Summary	884
Chapter 36: Using Physique to Add Skin to a Biped	885
Understanding Your Character	885
The curse and blessing of symmetry	886
Dealing with details	886
Building Bodies	886
Defining a structure	886
Modeling techniques	890
Using BlobMesh objects	894
Working with hands and feet	895
Modeling clothing	895
Creating hair	896
Tutorial: Adding hair to a head	896
The Character menu	897
Using the Physique Modifier	897
Preparing a Skin Mesh	898
Applying and initializing the Physique modifier	898
Loading and saving Physique files	899
Editing envelope subobjects	899
Using the Bulge Editor	901
Stretching skin with tendons	902
Tutorial: Adding Physique to a character	902
Summary	904
Chapter 37: Controlling Biped Crowds	905
Creating Crowds	905
Using Crowd and Delegate helpers	905
Scattering Delegates	905
Setting delegate parameters	906
Assigning behaviors	907
Solving the simulation	908
Tutorial: Navigating an array of cubes	908
Creating a Crowd of Bipeds	910
Associating delegates with objects	910
Associating delegates with objects	910
Tutorial: Seeking treasure	910
Summary	912

Chapter 38: Manually Rigging a Character 913

- A Rigging Workflow 913
- Building a Bones System 914
 - Assigning an IK Solver 914
 - Setting bone parameters 915
 - Tutorial: Making a simple puppet using bones 915
- Using the Bone Tools 917
 - Reordering bones 917
 - Refining bones 918
 - Coloring bones 918
 - Adjusting fins 919
 - Making objects into bones 919
- Creating Characters 919
 - Saving and loading characters 921
 - Destroying characters 921
- Working with Characters 922
 - Defining character members 922
 - Locking and unlocking characters 922
 - Setting a skin pose 922
 - Tutorial: Creating a frog character 923
 - Saving and inserting character animations 925
 - Merging animations 925
- Using Character Animation Techniques 926
- Summary 927

Chapter 39: Working with Inverse Kinematics 929

- Forward Kinematics versus Inverse Kinematics 929
- Creating an Inverse Kinematics System 930
 - Building and linking a system 930
 - Selecting a terminator 930
 - Defining joint constraints 931
 - Copying, pasting, and mirroring joints 931
 - Binding objects 931
 - Understanding precedence 932
 - Tutorial: Building an extensible arm linkage 932
- Using the Various Inverse Kinematics Methods 933
 - Interactive IK 933
 - Applied IK 936
 - History Independent (HI) IK solver 937
 - History Dependent (HD) IK solver 940
 - Tutorial: Animating a spyglass with the HD IK solver 942
 - IK Limb solver 942
 - Tutorial: Animating a character's arm with the IK Limb solver 943
 - Spline IK solver 944
 - Tutorial: Building an IK Spline snake 945
- Summary 946

Part VIII: Dynamics and reactor 947

Chapter 40: Using Space Warps 949

- Creating and Binding Space Warps 949
 - Creating a Space Warp 949
 - Binding a Space Warp to an object 950

Understanding Space Warp Types	950
Force Space Warps	950
Deflector Space Warps	958
Geometric/Deformable Space Warps	961
Modifier-Based Space Warps	967
Combining Particle Systems with Space Warps	968
Tutorial: Shattering glass	968
Tutorial: Exploding a planet	970
Tutorial: Making water flow down a trough	971
Summary	972
Chapter 41: Creating a Dynamic Simulation	973
Understanding Dynamics	973
Using Dynamic Objects	974
Spring	974
Damper	975
Defining Dynamic Material Properties	977
Using Dynamic Space Warps	978
Using the Dynamics Utility	978
Using the Dynamics rollout	979
Using the Timing & Simulation rollout	980
Editing simulation objects	980
Optimizing a simulation	982
Summary	982
Chapter 42: Animating with reactor.	983
Using reactor	983
The reactor process	984
Tutorial: Filling a glass bowl	984
Using reactor Collections	985
Collection modifiers	987
Setting object properties	987
Tutorial: Throwing a shirt over a chair	989
Creating reactor Objects	991
Springs and dashpots	992
Plane	992
Motor and Wind	992
Toy Car	993
Tutorial: Driving a monster truck over a hill	993
Fracture	995
Tutorial: Smashing a gingerbread house	995
Water	996
Tutorial: Working with water	996
Calculating and Previewing a Simulation	997
Using the Preview window	998
Creating animation keys	999
Analyzing the scene	999
Tutorial: Dropping a plate of donuts	999
Constraining Objects	1000
Using a Constraint Solver	1001
Rag Doll constraint	1001
Tutorial: Swinging into a wall	1002
reactor Troubleshooting	1004
Summary	1004

Part IX: Rendering and mental ray 1005

Chapter 43: Rendering Basics. 1007

- The Rendering Menu 1007
- Understanding the Max Renderers 1008
- Previewing with ActiveShade 1008
 - Using the ActiveShade Floater 1010
 - Enabling ActiveShade in a viewport. 1010
- Render Parameters 1011
 - Initiating a render job 1011
 - Common parameters 1013
 - E-mail notifications 1015
 - Assigning renderers 1015
 - Scanline A-Buffer renderer 1016
- Rendering Preferences 1018
- Creating VUE Files. 1020
- Using the Rendered Frame Window 1021
- Using the RAM Player. 1022
- Reviewing the Render Types 1024
- Using Command-Line Rendering 1024
- Creating Panoramic Images 1024
- Getting Printer Help. 1025
- Creating an Environment. 1026
 - Defining the rendered environment 1026
 - Setting exposure. 1028
- Summary 1030

Chapter 44: Using Atmospheric Effects 1033

- Creating Atmospheric Effects 1033
 - Working with the Atmospheric Apparatus 1033
 - Adding effects to a scene. 1034
- Using the Fire Effect. 1034
 - Tutorial: Creating the sun 1037
 - Tutorial: Creating clouds 1038
- Using the Fog Effect. 1039
 - Using the Volume Fog effect 1040
 - Tutorial: Creating a swamp scene 1042
 - Using the Volume Light effect 1043
- Summary 1043

Chapter 45: Using Render Elements and Effects 1045

- Using Render Elements. 1045
- Adding Render Effects 1047
- Creating Lens Effects 1049
 - Global Lens Effects Parameters 1049
 - Glow 1051
 - Tutorial: Creating shocking electricity from a plug outlet 1054
 - Tutorial: Creating neon 1055
 - Ring 1056
 - Ray. 1057
 - Star 1057
 - Streak 1057

Auto Secondary	1058
Manual Secondary	1059
Tutorial: Making an airplane sparkle	1060
Using Other Render Effects	1061
Blur render effect	1061
Brightness and Contrast render effect	1063
Color Balance render effect	1063
File Output render effect	1063
Film Grain render effect	1064
Motion Blur render effect	1064
Depth of Field render effect	1064
Summary	1065
Chapter 46: Raytracing and mental ray	1067
Understanding Global Raytracing Settings	1067
Controlling the raytracer	1068
Excluding objects	1070
Using Raytrace Materials	1071
Raytrace Basic Parameters	1072
Extended Parameters rollout	1073
Raytracer Control rollout	1074
Additional rollouts	1074
Tutorial: Coming up roses	1075
Using a Raytrace Map	1076
Setting raytrace parameters	1076
Tutorial: Raytracing a wine glass	1077
Enabling mental ray	1078
mental ray preferences	1078
Understanding Shaders	1079
mental ray materials and shaders	1079
mental ray lights and shadows	1082
Controlling Indirect Illumination	1085
Rendering control	1085
Advanced mental ray	1086
Summary	1086
Chapter 47: Network Rendering	1087
Understanding Network Rendering	1087
Network Requirements	1088
Setting Up a Network Rendering System	1089
Setting up the network	1089
Tutorial: Locating TCP/IP and gathering IP addresses	1090
Tutorial: Installing and configuring TCP/IP	1092
Tutorial: Setting up Max on the networked computers	1093
Configuring shared directories	1094
Tutorial: Sharing directories	1094
Tutorial: Choosing shared directories	1097
Starting the Network Rendering System	1097
Tutorial: Initializing the network rendering system	1097
Tutorial: Completing your first network rendering job	1099
Job assignment options	1101

Configuring the Network Manager and Servers	1102
The network manager settings	1102
The network servers settings	1104
Logging Errors	1104
Using the Monitor	1105
Jobs	1106
Servers	1107
Setting Up Batch Rendering	1108
Summary	1108

Chapter 48: Using the Video Post Interface 1109

Using External Compositing Packages	1109
Compositing with Photoshop	1109
Video editing with Premiere	1111
Tutorial: Creating a montage of Space Warp animations	1111
Video compositing with After Effects	1112
Tutorial: Adding animation effects using After Effects	1113
Introducing Combustion	1114
Using other compositing solutions	1116
Completing Post-Production with the Video Post Interface	1116
The Video Post toolbar	1117
The Video Post Queue and Range panes	1119
The Video Post status bar	1119
Working with Sequences	1119
Adding and Editing Events	1120
Adding an image input event	1121
Adding scene events	1122
Adding image filter events	1123
Adding image layer events	1126
Adding external events	1127
Using loop events	1128
Adding an image output event	1128
Working with Ranges	1128
Working with Lens Effects Filters	1129
Adding flares	1130
Adding focus	1131
Adding glow	1132
Adding highlights	1132
Tutorial: Making a halo shine	1134
Adding backgrounds and filters using Video Post	1135
Summary	1136

Part X: MAXScript and Plug-Ins

1137

Chapter 49: Automating with MAXScript 1139

What Is MAXScript?	1139
MAXScript Tools	1140
The MAXScript menu	1140
The MAXScript Utility rollout	1141
Tutorial: Using the SphereArray script	1141
The MAXScript Listener window	1142
Tutorial: Talking to the MAXScript interpreter	1143

MAXScript editor windows	1145
The Macro Recorder	1146
Tutorial: Recording a simple script	1147
Setting MAXScript Preferences	1149
Types of Scripts	1149
Macro scripts	1150
Scripted utilities	1150
Scripted right-click menus	1150
Scripted mouse tools	1150
Scripted plug-ins	1150
Writing Your Own MAXScripts	1150
Variables and data types	1151
Tutorial: Using variables	1152
Program flow and comments	1153
Expressions	1154
Conditions	1156
Collections and arrays	1156
Loops	1157
Functions	1159
Tutorial: Creating a school of fish	1161
Learning the Visual MAXScript Editor Interface	1166
The Editor interface	1167
The menus and the main toolbar	1167
Toolbar elements	1168
Laying Out a Rollout	1169
Aligning and spacing elements	1169
Tutorial: Building a custom rollout with the Visual MAXScript Editor	1170
Summary	1173
Chapter 50: Expanding Max with Third-Party Plug-Ins	1175
Working with Plug-Ins	1175
Installing plug-ins	1176
Viewing installed plug-ins	1176
Managing plug-ins	1177
Tutorial: Installing and using the AfterBurn Plug-in Demo	1178
Locating Plug-Ins	1179
Summary	1180
Appendix A: What's New with Max 7	1181
Appendix B: Installing and Configuring 3ds max 7	1185
Appendix C: Max Keyboard Shortcuts	1193
Appendix D: What's on the CD-ROM	1207
Index	1211
End-User License Agreement	1253
