Introduction	xv

Part I

Lighting Theory

Chapter 1	Properties of Light	3
	Intensity/Luminosity	3
	Color	5
	Direction	7
	Diffuseness	9
	Shadow	11
	Shape	12
	Contrast	13
	Movement	15
	Size	18
Chapter 2	What, Where, When?	20
	Interior or Exterior	20
	Time of Day	23
	Time of Year	24
	Atmospheric Conditions	25
Chapter 3	Light Sources	28
	Sunlight	29
	Skylight	35
	Incandescent Light	37
	Fluorescent Light	38
	Reflected Light	38
	Diffuse Reflected Light	39
	A Note about Proportion and Scale	40
Chapter 4	Basic Material Considerations	42
	Color in the Real World	42
	Specularity and Glossiness	44
	Reflectivity	47
	Diffuse Color	49
	Luminosity	51
Chapter 5	Studying Light	54
	Natural Light	55
	Sunlight	55
	Skylight	57
	Cloudy Day	58

Moonlight	58
Starlight	59
Artificial Light	59
Incandescent Sources	59
Diffuse Sources	60
Point Sources	60
Fluorescent Sources	60
Shadow	61
Light Color	63

Chapter 6 Principles of Lighting 64

The Key Light	65
The Fill Light	65
The Highlight	66
McCandless Lighting	68
Key/Fill Lighting	70
Three-Point Lighting	71
What Is Great about Three-Point Lighting	72
What Is Not So Great about Three-Point Lighting	73
Four-Point Lighting	73
Other Lighting Angles	74
Coloring Your Light	76
Complementary Tint	76
Related Tint	77
Intensity Ratios	77
Options in Lighting a Scene	78

Part II

3ds max Lighting Tools

Chapter 7 Standard Lights and Typical Uses 81

Default Light	82
Ambient Light	83
Free Lights and Target Lights	86
Directional Lights	87
Directional Parameters	88
Light Cone	88
Show Cone	89
Overshoot	89
Hotspot/Beam	89
Falloff/Field	89
Circle/Rectangle	90
Aspect	91
Bitmap Fit...	91
Spotlights	91
Omni Lights	92

Chapter 8	mental ray Lights	95
	mr Area Omni Lights	96
	mr Area Light Parameters Rollout (Area Omni Lights)	97
	On	97
	Show Icon in Renderer	97
	Type	98
	Samples	100
	mr Area Spotlights	101
	mr Area Light Parameters Rollout (Area Spotlights)	101
	On	101
	Show Icon in Renderer	102
	Type	102
	Radius, Height, and Width	102
	Samples	103
Chapter 9	Photometric Lights	104
	The Good	104
	The Bad	104
	...and the Ugly	104
	Photometric Light Types	105
	Point Lights	105
	Area Lights	107
	Linear Lights	108
	IES Sky	109
	IES Sun	111
	Daylight System – Simulated Direct Sunlight Plus a Photometric Skylight	112
	Photometric Light Parameters	113
	Photometric Light Presets	114
	Exposure Control (Environment Control)	114
Chapter 10	Other Lighting in MAX	116
	Light Tracer and Radiosity (Default Scanline Renderer)	116
	Caustics	118
	Volume Lights	118
	Objects as Lights	121
	Lens Flares	125
	Lens Flares Defined	125
	Why Not to Use Them	126
	Good Uses for Lens Flares	127
Chapter 11	Manipulating Lights	134
	Creating Lights	134
	Selecting and Transforming Lights	135
	Selecting an Item	135
	Moving an Item	137
	Rotating an Item	138
	Scaling an Item	140

Transforming Target Lights	143
The Light Viewport	143
Light Navigation Controls.	144
Dolly, Target, Both	144
Light Hotspot	145
Roll Light	147
Light Falloff	147
Truck Light.	149
Orbit, Pan Light	149
The Light Lister	150

Chapter 12 General Light Parameters 152

General Parameters Rollout	153
Light Type	153
On	153
Type	154
Targeted	154
Shadows	155
On	155
Use Global Settings	155
Shadow Type	156
Exclude	156
Intensity/Color/Attenuation Rollout (Standard Lights)	159
Multiplier	159
Color Swatch	160
Decay.	161
Type	161
Start	162
Show	162
Near and Far Attenuation	163
Use.	164
Show	164
Start/End	164
Intensity/Color/Distribution Rollout (Photometric Lights)	165
Distribution	165
Isotropic	165
Spotlight	165
Diffuse	165
Web	165
Color	166
Kelvin.	166
Color Swatch	167
Filter Color	167
Intensity	168
Resulting Intensity	168
Multiplier	169

Linear Light Parameters Rollout	169
Area Light Parameters Rollout	170
Shadow Parameters Rollout	170
Object Shadows	170
Color	171
Density	171
Map	172
Light Affects Shadow Color	173
Atmosphere Shadows	173
On	174
Opacity	174
Color Amount	174
Atmospheres & Effects Rollout	174
Advanced Effects Rollout	175
Affect Surfaces	175
Contrast	175
Soften Diff. Edge	177
Diffuse/Specular	177
Ambient Only	178
Projector Map	179
Chapter 13 Shadow Types and their Typical Uses	181
Shadow Maps	181
Shadow Map Parameters Rollout	181
Bias	181
Size	182
Sample Range	182
Absolute Map Bias	183
2 Sided Shadows	183
mr Shadow Maps	183
mental ray Shadow Map Parameters Rollout	183
Map Size	183
Sample Range	184
Samples	184
Ray-traced Shadows	184
Ray Traced Shadow Parameters Rollout	185
Ray Bias	185
2 Sided Shadows	185
Max Quadtree Depth	186
Advanced Ray-traced Shadows	186
Advanced Ray Traced Parameters Rollout	186
2 Sided Shadows	186
Shadow Integrity	187
Shadow Quality	187
Shadow Spread	187
Shadow Bias	188

	Jitter Amount	188
	Area Shadows	189
	Area Shadows Parameters Rollout	189
	Basic Options	189
	Antialiasing Options.	190
	Area Light Dimensions.	190
Chapter 14	Radiosity	191
	Radiosity Defined.	191
	Global Illumination Defined.	191
	The Tools.	192
	Radiosity	192
	Radiosity Tutorial	193
	Light Tracer	197
	A Short Light Tracer Tutorial	198
	Another Short Light Tracer Tutorial	200
	mental ray Indirect Illumination.	204
	mr Global Illumination Tutorial.	205
Chapter 15	Texture Baking and Light Painting	209
	Texture Baking	209
	Texture Baking Tutorial	210
	Light Painting.	222
	Light Painting Tutorial	223
Chapter 16	MAX Color Selection Tools.	229
	RGB	230
	HSV	231
	HSB	232
	HSW.	233
	Kelvin Color Picker (Photometric Lights)	233
	Kelvin and Filters.	234
Chapter 17	HDRI and Caustics.	235
	What Is HDRI?	236
	Why Should I Use HDRI?	237
	Lighting a Scene with HDRI	238
	How Do I Use HDRI to Light a Scene?	239
	Using LightGen	239
	Using an HDR Image	241
	Caustics Defined	248
	When and Where to Use Caustics	251
Chapter 18	Rendering	252
	Default Scanline Renderer Panel.	252
	The Common Tab	253
	The Renderer Tab	255
	The Render Elements Tab.	256

The Raytracer Tab	257
The Advanced Lighting Tab	258
Light Tracer Parameters	259
Radiosity Parameters	260
mental ray Renderer Panel	261
The Common Tab	261
The Renderer Tab	261
The Indirect Illumination Tab	262
The Processing Tab	263
The Render Elements Tab	264

Part III

Creating Lighting

Chapter 19	Intent and Purpose	267
	Understanding Artistic and Emotional Intent	268
	What Is Your Light's Motivation? (Justifying Choices)	269
	Chiaroscuro: The Use of Light and Shadow	270
	Some Examples	271
	A Pleasant Scene	272
	A Sad Scene	273
	A Frightening Scene	273
Chapter 20	Color Mixing	275
	Two Types of Color	275
	The Color of Light	275
	The Color of Pigments	277
	Pigments in the Real World	278
	Pigments in MAX	279
	RGB Values	280
	Hue, Saturation, and Value	281
	Hue	281
	Saturation	281
	Value	282
	How Hue, Saturation, and Value Interact	283
	Recapping HSV	283
	The Additive Color Wheel	284
	Primary Colors	286
	Secondary Colors	288
	Tertiary Colors	288
	Intermediate Colors	289
	Color Harmonies, or Schemes	289
	Monochromatic Harmony	290
	Complementary Colors	291
	Split Complementary	292
	Double Split Complementary	294
	Analogous Color Harmony, aka Related Tints	295
	Triadic Color Harmony	296

Additive Mixing	298
Missing Color	299
Subtractive Mixing	300
Subtractive Light Mixing	301
Mixing Light with Pigments	302
The Psychology of Color	302
Warm Colors	303
Red	303
Orange	303
Yellow	303
Cool Colors	304
Green	304
Blue	304
Purple	304
Black	304
White	304
Other Colors	305
Related Tints	305
Complementary Colors	305
Triadic Colors	306
Monochromatic Colors	307
High-Saturation, High-Value Colors	307
Low-Value Colors	307
Low-Saturation Colors	307
High-Contrast Color Combinations	308
Low-Contrast Color Combinations	308
Designing with Color	309

Chapter 21	Mood Setting	310
	Angle and Shadow	311
	Contrast	314
	Intensity	315
	Motion	316
	Weather	316

Chapter 22	Style	318
	What Is Style?	318
	So What Do I Do?	319
	Less Is More	320
	Consistency between Shots	320

Chapter 23	Designing Lighting	322
	The Design Process	322
	Script Analysis	322
	Understanding the Story	323
	Research	325
	Historical	325
	Visual	326

	Technical	326
	Dramatic	327
	Discussion: Working with the Design Team	327
	Planning	329
	Sketches and Drawings	329
	The Magic Sheet	331
	A Formal Lighting Plot	332
	A Formal Lighting Schedule	335
	Implementation	337
	Block Placement.	337
	Roughing Out.	338
	Fine-Tuning	338
	Working with Materials	339
	Evaluation.	339
	Balancing the Scene	340
	Focus and Emphasis	342
	Designing with Light and Shadow	342
	Designing with Light	342
	Designing with Shadow	343
	Lighting a Scene vs. Lighting an Object	343
	Putting It All Together (Making a Pleasing Picture).	344
	Saving and Reusing Lighting Rigs	345
Chapter 24	Identifying and Recreating Light Sources in a Plate	346
	About Photo-real Lighting.	346
	About Plates and Light Sources	347
	Replicating the Light Source	350
	The Mirror Ball	357
	A More Complex Lighting Environment	358
	Rendering the Element	372
	Getting the Color Perfect Is Not Your Job.	372
Chapter 25	Lighting Setup Examples	374
	Exterior Sunny Day	374
	Exercise 1: Direct Key, Ambient Fill	375
	Exercise 2: Direct Key, Direct Fill	380
	Exercise 3: Using Shadow Maps	381
	Exercise 4: Area Shadows	383
	Exercise 5: Using a Skylight for the Fill	384
	Exercise 6: mental ray Area Lights	386
	Exercise 7: Using Photometric Lights	392
	Exercise 8: IES Sun and IES Sky	397
	Exterior Scenes with Radiosity	401
	Index	403
