

Table of Contents

Introduction	1
Why PHP4?	2
The Prompt	2
What Do I Need To Use This Book?	3
PHP4 Resources	4
Conventions	4
Downloading the Source Code	5
Support & Errata	5
Online Forums at p2p.wrox.com	6
Checking the Errata Online at www.wrox.com	6
Wrox Developer's Membership	6
Finding Errata on the Web Site	8
Adding Errata and Obtaining e-Mail Support	9
Customer Support	9
Editorial	9
The Authors	9
What We Can't Answer	9
How to Tell Us Exactly What You Think	9
Chapter 1: Installation	11
Installing PHP4 on Windows 95 and 98	13
Obtaining PWS	13
Setting Up PWS	15
Installing PHP4 Alongside PWS	17
Installing PHP4 on Windows NT and 2000	19
Installing PHP4 Alongside IIS	24
Installing PHP4 on Linux and Other UNIXes	28
Choosing Your Installation Method	29
Obtaining RPMs	29
Which Packages Do We Need?	30
Configuring and Starting Apache with PHP4	31

Chapter 2: Writing PHP Programs	39
An Example PHP Program	40
Viewing a Web Page	44
Client-Server	44
Internet Protocols	44
The HTTP Protocol	45
The HTTP Request	46
The HTTP Response	48
Where PHP Comes Into This	49
Server-Side Scripting	50
Identifying a PHP Script	51
Caching	51
Variables	52
Data Types	55
String Data Type	55
Numeric Data Types	58
Constants	63
The Define Keyword	64
Initialization	64
Conversions	65
Type Casting	67
gettype and settype	67
isset, unset, and empty	68
Environment Variables	68
Summary	69
Chapter 3: Getting Data from the Client	71
Web Forms	72
The FORM Tag	72
Attributes of FORM	72
ACTION	72
METHOD	73
HTML Form Controls and PHP	76
Text Fields (Text Boxes)	76
Text Areas	80
Check Boxes	82
Radio Buttons	88
List Boxes	91
Hidden Controls	95
Passwords	99
Submit Buttons and Reset Buttons	99
Using Values Returned From Forms In Your PHP Scripts	100
Summary	106
Chapter 4: Decision Making	109
Conditional or Branching Statements	110
An Example of Branching in Day to Day Life	110
If Statements	111
Boolean Values	112
	iii

Boolean operators	112
Combining Operators	123

Multiple Conditions – else and elseif	127
Nesting If Statements	129
Switch Statements	135
Form Validation	140
Summary	144
Chapter 5: Loops and Arrays	147
Loops	148
while Loops	148
do while Loops	155
for Loops	159
Arrays	165
Initialization of Arrays	165
Iterating Through an Array	167
Iterating Through Non-Sequential Arrays	172
Iterating Through String-Indexed Arrays	176
Sorting Arrays	177
sort()	177
asort()	178
rsort() and arsort()	179
ksort()	179
Miscellaneous Array Functions	180
array_push() and array_pop()	180
Implode and Explode	180
HTTP_GET_VARS and HTTP_POST_VARS	182
Multi-dimensional Arrays	182
Practical Demonstration of Arrays	183
New Loop and Array Features in PHP4	188
Array Multisorting	188
foreach Loops	189
Summary	191
Chapter 6: Organizing Your Code	193
What's So Great About Code Reuse?	194
Modularization	194
Functions	194
Defining and Calling Functions	195
Switching Functions	201
Assigning the Value Returned by Functions to Variables	202
Passing Values	203
Passing By Value	203
Passing By Reference	203
Setting Default Parameter Values	204
Scope of Variables	206
Global and Local Variables	207
Using Global Variables Inside Functions	208
Getting Local Variables to Retain their Value	209
Nesting	213

Include Files	218
Common Uses of Include Files	221
Summary	224
Chapter 7: Handling and Avoiding Errors	227
Error Handling in PHP	228
Insecure Information	228
Unsightly Web Pages	228
Invisible Error Messages	228
Error Types	229
Syntax Errors	229
Logical Errors	232
Runtime Errors	232
Unexpected Output Errors	235
Errors In the Program Assumptions	235
Good Coding Practice	236
Indent Your Code	237
Comment Your Code	237
Use Functions	238
Use Include Files	239
Use Sensible Variable Names	239
Trying to Break your Code	240
More Form Validation	241
Thinking Like Your Users	241
Protection From Mischievous or Malicious Users	242
Receiving Input from Users	243
Regular Expressions	243
Patterns	243
Special Characters	244
Debugging PHP Script	255
Use echo()	256
Check the HTML Source	257
Suppressing Error Messages	257
Checking The Error Log	257
Doing the Hard Work Manually	258
Summary	258
Chapter 8: Working With the Client	261
Making the Most of a Stateless Protocol	262
Talking to the User – HTTP, HTML, PHP and Interactivity	262
Native Sessions in PHP4	264
'Do It Yourself' Persistence	265
Hidden Form Fields Revisited	265
Query Strings	272
Cookies	280
Sessions	287
	vii

Summary**292**

Chapter 9: Objects	295
Object-Oriented Terminology	296
Using Pre-Defined Classes	297
Why Use Objects?	300
Giving the Calculator a Memory	304
Exploring Our Simple Class Further	307
Passing By Value And By Reference	307
Creating Classes Of Our Own	311
Creating a Class From Scratch	311
Extending an Existing Class	314
A Useful Object	317
Summary	321
Chapter 10: File and Directory Handling	323
Working with Files	324
Opening and Closing Files	325
Reading and Writing to Files	327
Reading and Writing Characters in Files	331
Reading Entire Files	333
Random Access to File Data	335
Getting Information on Files	339
Time-related Properties	340
Ownership and Permissions	342
Splitting the Name and Path from a File	347
Copying, Renaming and Deleting Files	347
Building a Text Editor	350
Working with Directories	358
Other Directory Functions	359
Traversing a Directory Hierarchy	361
Creating a Directory Navigator	363
Uploading Files	367
Putting it All Together – A Web Text Editor	371
Resources	377
Summary	377
Chapter 11: PHP Database Connectivity	379
Databases	379
Data Models	380
Normalization and Relational Databases	380
Database Architecture	382
Standalone Model	383
Client/Server Model	383
Why MySQL?	384
Installing MySQL	385
Installing On Windows	385
Installing On Linux	386
	ix

Setting Up The Root Account	387
Testing Our MySQL Server	388

Introduction to SQL	388
Data Types	388
Indexes and Keys	390
Queries	391
A Quick Play with MySQL	393
Running the MySQL Client	393
Selecting a Database to Use	394
Taking a Peek at Data in a Database	394
Manipulating Data in a Database	396
Using GRANT and REVOKE commands	398
GRANT	398
REVOKE	399
Summing Up	399
PHP MySQL Connectivity	400
Basic Connection Functions	400
Handling Server Errors	403
Creating Databases and Tables from MySQL	407
Creating the Sample Database and Tables with PHP	411
Altering Tables	415
Inserting Data Into a Table	417
Escaping Quotes	418
Populating our Database Tables	419
Resources	421
Summary	421
Chapter 12: Retrieving Data from MySQL Using PHP	423
Retrieving Data Using PHP	423
SQL Statements for Retrieving Data	426
Server Functions	426
Retrieving Fields	427
Limiting the Number of Results Returned	428
Ordering the Results	430
Pattern Matching	431
Getting Summaries	432
More Complex Retrievals	433
Retrieving Fields from More Than One Table	435
Putting It All Together	437
Using the User Viewer	446
Resources	447
Summary	447
Chapter 13: Manipulating Data in MySQL Using PHP	449
Inserting Records Using PHP	449
Special Characters	450
Updating and Deleting Records in Tables	452
Working with Date and Time Type Fields	454
	xi

Creating a User Registration Script	468
Creating an Access Logger Script	474
Creating a User Manager	482
Resources	491
Summary	491
Chapter 14: XML	493
What is XML?	493
XML Document Structure	496
Well-Formed XML	496
DTDs	499
Event Driven Parsing	501
Parsing the Example File	502
Parsing an External File	508
Summary	512
Chapter 15: e-Mail Handling	515
Sending e-mails in PHP	515
Anatomy of an e-Mail	518
Handling Attachments	525
Anatomy of e-Mail Revisited	525
Content-type	526
Content-transfer-encoding	527
MIME-Version	527
Multiple Mail Components	528
Attaching Files to e-Mail	529
A Newsletter Mailing List Manager	536
Resources	552
Summary	553
Chapter 16: Generating Graphics	555
Laying a Foundation	555
Creating an Image	556
Setting up Colors	556
The Image Coordinate System	557
Drawing on our Image	558
Lines	558
Circles	560
Rectangles	562

Practical Application	566
Interactive Maps	566
Getting Started	567
Creating the database	568
Adding data	568
Testing our data	569
Building a Framework	573
Drawing the Layout	574
Further Interactivity	579
Showing the Shop Detail	581
Advanced Graphics Manipulation	585
A Stylized Map	585
Palette Limitations	589
Summary	591
 Chapter 17: Case Study – A URL Directory Manager	 593
Introducing the URL Directory Manager	593
Designing the Directory Manager	594
User Requirements	594
Users vs Administrators	595
User Authentication	596
User Interface	596
Data Storage	596
Connecting to the Database	597
Database Schema	597
Database Tables	600
Other Design Considerations	601
Code Layout	601
Security Issues	601
Directory Functions	602
Code Implementation	604
Common Code – php_directory.inc	604
directory_header()	606
directory_footer()	606
db_connect()	607
sql_error()	607
error_message()	608
user_message()	608
get_category_info()	609
get_url_info()	615
search_form()	616
show_list()	617
add_url_form()	631
add_url()	634
modify_url_form()	637
modify_url()	640
go_url()	642
list_sites()	643
User Code – php_directory.php	645
Administration Code – dir_manager.php	646
list_categories()	646
add_category_form()	649
add_category()	651
edit_category_form()	652
	XV

delete_category()	654
update_db()	655
view_new()	657
edit_new_form()	660
edit_new()	662
delete_url()	664
top_menu()	665
User Feedback	667
Summary	667
<u>Appendix A: ODBC</u>	<u>669</u>
What is ODBC?	669
What ODBC Isn't	670
PHP and ODBC	674
Connecting to a Data Source	674
Executing SQL commands	674
Handling Query Results	675
<u>Appendix B: PHP Functions</u>	<u>683</u>
Apache-Specific Functions	683
Array Functions	683
Aspell Functions	687
Calendar Functions	687
Class/Object Functions	688
CURL, Client URL Library Functions	689
Database Functions	689
Database Abstraction Layer Functions	689
dBase Functions	690
DBM Functions	691
Informix Functions	692
InterBase Functions	694
Microsoft SQL Server Functions	695
mSQL Functions	696
MySQL Functions	699
Unified ODBC Functions	701
Oracle 8 Functions	704
Oracle Functions	706
PostgreSQL Functions	707
Sybase Functions	709
Date and Time Functions	710
Directory Functions	711
DOM XML Functions	712
	xvii

Error Handling and Logging Functions	712
Filesystem Functions	713
Forms Data Format Functions	716
Function Handling Functions	717
HTTP Functions	718
Image Functions	718
Mail Functions	722
Mathematical Functions	722
Miscellaneous Functions	724
Network Functions	725
Output Control Functions	726
PHP Options and Information	727
POSIX Functions	728
Program Execution Functions	730
Pspell Functions	730
Perl-Compatible Regular Expression Functions	731
Regular Expression Functions (POSIX Extended)	732
Session Handling Functions	733
String Functions	734
URL Functions	738
Variable Functions	739
WDDX Functions	740
XML Parser Functions	740
Zlib Functions	742
Function Index	745
Index	755
A Guide to the Index	755
