About the Web Site xxvii

PART 1

Servlets 2.1 and 2.2 2

CHAPTER 1

Overview of Servlets and JavaServer Pages 4

1.1 Servlets 5

1.2 The Advantages of Servlets Over “Traditional” CGI 7

Efficient 7

Convenient 7

Home page for this book: <http://www.coreservlets.com>.

Home page for sequel: <http://www.moreservlets.com>.

Servlet and JSP training courses: <http://courses.coreservlets.com>.

Powerful	8
Portable	8
Secure	8
Inexpensive	9
1.3 JavaServer Pages	9
1.4 The Advantages of JSP	10
Versus Active Server Pages (ASP)	10
Versus PHP	10
Versus Pure Servlets	11
Versus Server-Side Includes (SSI)	11
Versus JavaScript	11
Versus Static HTML	12
1.5 Installation and Setup	12
Obtain Servlet and JSP Software	12
Bookmark or Install the Servlet and JSP API Documentation	14
Identify the Classes to the Java Compiler	14
Package the Classes	15
Configure the Server	16
Start the Server	17
Compile and Install Your Servlets	18

CHAPTER 2

First Servlets 20

2.1 Basic Servlet Structure	21
2.2 A Simple Servlet Generating Plain Text	23
Compiling and Installing the Servlet	24
Invoking the Servlet	25
2.3 A Servlet That Generates HTML	26
2.4 Packaging Servlets	27
Creating Servlets in Packages	28
Compiling Servlets in Packages	29
Invoking Servlets in Packages	30
2.5 Simple HTML-Building Utilities	31
2.6 The Servlet Life Cycle	34
The init Method	34
The service Method	36

The doGet, doPost, and doXxx Methods	37
The SingleThreadModel Interface	38
The destroy Method	38
2.7 An Example Using Initialization Parameters	39
2.8 An Example Using Servlet Initialization and Page Modification Dates	44
2.9 Debugging Servlets	50
2.10 WebClient: Talking to Web Servers Interactively	52
WebClient	52
HttpClient	55
NetworkClient	57
SocketUtil	59
CloseableFrame	60
LabeledTextField	61
Interruptible	63

CHAPTER 3

Handling the Client Request: Form Data 64

3.1 The Role of Form Data	65
3.2 Reading Form Data from Servlets	66
3.3 Example: Reading Three Explicit Parameters	67
3.4 Example: Reading All Parameters	70
3.5 A Résumé Posting Service	74
3.6 Filtering Strings for HTML-Specific Characters	87
Code for Filtering	88
Example	89

CHAPTER 4

Handling the Client Request: HTTP Request Headers 92

4.1 Reading Request Headers from Servlets	94
4.2 Printing All Headers	96
4.3 HTTP 1.1 Request Headers	98
4.4 Sending Compressed Web Pages	104
4.5 Restricting Access to Web Pages	107

CHAPTER 5

Accessing the Standard CGI Variables 114

5.1 Servlet Equivalent of CGI Variables 116

5.2 A Servlet That Shows the CGI Variables 119

CHAPTER 6

Generating the Server Response: HTTP Status Codes 122

6.1 Specifying Status Codes 124

6.2 HTTP 1.1 Status Codes and Their Purpose 126

6.3 A Front End to Various Search Engines 135

CHAPTER 7

Generating the Server Response: HTTP Response Headers 142

7.1 Setting Response Headers from Servlets 143

7.2 HTTP 1.1 Response Headers and Their Meaning 145

7.3 Persistent Servlet State and Auto-Reloading Pages 154

7.4 Using Persistent HTTP Connections 163

7.5 Using Servlets to Generate GIF Images 168

CHAPTER 8

Handling Cookies 178

8.1 Benefits of Cookies 179

Identifying a User During an E-commerce Session 180

Avoiding Username and Password 180

Customizing a Site 180

Focusing Advertising 181

8.2 Some Problems with Cookies 181

8.3 The Servlet Cookie API 183

Creating Cookies 183

Cookie Attributes 183

Placing Cookies in the Response Headers 186

Reading Cookies from the Client 186

8.4 Examples of Setting and Reading Cookies 186

8.5 Basic Cookie Utilities	190
Finding Cookies with Specified Names	190
Creating Long-Lived Cookies	191
8.6 A Customized Search Engine Interface	191

CHAPTER 9

Session Tracking 198

9.1 The Need for Session Tracking	199
Cookies	200
URL-Rewriting	200
Hidden Form Fields	201
Session Tracking in Servlets	201
9.2 The Session Tracking API	201
Looking Up the HttpSession Object Associated with the Current Request	202
Looking Up Information Associated with a Session	202
Associating Information with a Session	205
Terminating Sessions	206
Encoding URLs Sent to the Client	206
9.3 A Servlet Showing Per-Client Access Counts	207
9.4 An On-Line Store Using a Shopping Cart and Session Tracking	209
Building the Front End	210
Handling the Orders	215
Behind the Scenes: Implementing the Shopping Cart and Catalog Items	220

PART 2

JavaServer Pages 228

CHAPTER 10

JSP Scripting Elements 230

10.1 Scripting Elements	233
Template Text	234
10.2 JSP Expressions	234

Contents

Predefined Variables	234
XML Syntax for Expressions	235
Using Expressions as Attribute Values	235
Example	236
10.3 JSP Scriptlets	238
Using Scriptlets to Make Parts of the JSP File Conditional	241
Special Scriptlet Syntax	242
10.4 JSP Declarations	242
Special Declaration Syntax	244
10.5 Predefined Variables	244

CHAPTER 11

The JSP page Directive: Structuring Generated Servlets 246

11.1 The import Attribute	248
Directories for Custom Classes	248
Example	249
11.2 The contentType Attribute	251
Generating Plain Text Documents	252
Generating Excel Spreadsheets	254
11.3 The isThreadSafe Attribute	258
11.4 The session Attribute	259
11.5 The buffer Attribute	259
11.6 The autoflush Attribute	260
11.7 The extends Attribute	260
11.8 The info Attribute	260
11.9 The errorPage Attribute	261
11.10 The isErrorPage Attribute	261
11.11 The language Attribute	264
11.12 XML Syntax for Directives	265

CHAPTER 12

Including Files and Applets in JSP Documents 266

12.1 Including Files at Page Translation Time	268
12.2 Including Files at Request Time	270

12.3 Including Applets for the Java Plug-In	274
The jsp:plugin Element	275
The jsp:param and jsp:params Elements	277
The jsp:fallback Element	278
Example: Building Shadowed Text	279

CHAPTER 13

Using JavaBeans with JSP 286

13.1 Basic Bean Use	288
Accessing Bean Properties	290
Setting Bean Properties: Simple Case	290
Installing Bean Classes	291
13.2 Example: StringBean	292
13.3 Setting Bean Properties	294
Associating Individual Properties with Input Parameters	298
Automatic Type Conversions	300
Associating All Properties with Input Parameters	301
13.4 Sharing Beans	302
Conditional Bean Creation	304

CHAPTER 14

Creating Custom JSP Tag Libraries 308

14.1 The Components That Make Up a Tag Library	310
The Tag Handler Class	310
The Tag Library Descriptor File	311
The JSP File	313
14.2 Defining a Basic Tag	314
The Tag Handler Class	315
The Tag Library Descriptor File	316
The JSP File	318
14.3 Assigning Attributes to Tags	319
The Tag Handler Class	319
The Tag Library Descriptor File	321
The JSP File	322
14.4 Including the Tag Body	323

The Tag Handler Class	324
The Tag Library Descriptor File	326
The JSP File	328
14.5 Optionally Including the Tag Body	329
The Tag Handler Class	329
The Tag Library Descriptor File	331
The JSP File	332
14.6 Manipulating the Tag Body	334
The Tag Handler Class	334
The Tag Library Descriptor File	335
The JSP File	336
14.7 Including or Manipulating the Tag Body Multiple Times	338
The Tag Handler Class	338
The Tag Library Descriptor File	340
The JSP File	341
14.8 Using Nested Tags	341
The Tag Handler Classes	342
The Tag Library Descriptor File	348
The JSP File	350

CHAPTER 15

Integrating Servlets and JSP 352

15.1 Forwarding Requests	354
Using Static Resources	354
Supplying Information to the Destination Pages	355
Interpreting Relative URLs in the Destination Page	357
Alternative Means of Getting a RequestDispatcher	358
15.2 Example: An On-Line Travel Agent	358
15.3 Including Static or Dynamic Content	375
15.4 Example: Showing Raw Servlet and JSP Output	377
15.5 Forwarding Requests From JSP Pages	380

PART 3

Supporting Technologies 382

CHAPTER 16

Using HTML Forms 384

- 16.1 How HTML Forms Transmit Data 385
- 16.2 The FORM Element 390
- 16.3 Text Controls 395
 - Textfields 395
 - Password Fields 397
 - Text Areas 398
- 16.4 Push Buttons 400
 - Submit Buttons 401
 - Reset Buttons 404
 - JavaScript Buttons 405
- 16.5 Check Boxes and Radio Buttons 405
 - Check Boxes 406
 - Radio Buttons 407
- 16.6 Combo Boxes and List Boxes 409
- 16.7 File Upload Controls 412
- 16.8 Server-Side Image Maps 414
 - IMAGE—Standard Server-Side Image Maps 414
 - ISMAP—Alternative Server-Side Image Maps 417
- 16.9 Hidden Fields 419
- 16.10 Grouping Controls 420
- 16.11 Controlling Tab Order 422
- 16.12 A Debugging Web Server 423
 - EchoServer 423
 - ThreadedEchoServer 427
 - NetworkServer 428

CHAPTER 17

Using Applets As Servlet Front Ends 432

- 17.1 Sending Data with GET and Displaying the Resultant Page 434

17.2 A Multisystem Search Engine Front End	435
17.3 Sending Data with GET and Processing the Results Directly (HTTP Tunneling)	438
Reading Binary or ASCII Data	439
Reading Serialized Data Structures	441
17.4 A Query Viewer That Uses Object Serialization and HTTP Tunneling	443
17.5 Sending Data by POST and Processing the Results Directly (HTTP Tunneling)	450
17.6 An Applet That Sends POST Data	453
17.7 Bypassing the HTTP Server	459

CHAPTER 18

JDBC and Database Connection Pooling	460
18.1 Basic Steps in Using JDBC	462
Load the Driver	462
Define the Connection URL	463
Establish the Connection	464
Create a Statement	465
Execute a Query	465
Process the Results	465
Close the Connection	466
18.2 Basic JDBC Example	467
18.3 Some JDBC Utilities	473
18.4 Applying the Database Utilities	482
18.5 An Interactive Query Viewer	487
Query Viewer Code	489
18.6 Prepared Statements (Precompiled Queries)	497
18.7 Connection Pooling	501
18.8 Connection Pooling: A Case Study	508
18.9 Sharing Connection Pools	515
Using the Servlet Context to Share Connection Pools	515
Using Singleton Classes to Share Connection Pools	516

APPENDIX

Servlet and JSP Quick Reference 518

- A.1 Overview of Servlets and JavaServer Pages 519
 - Advantages of Servlets 519
 - Advantages of JSP 519
 - Free Servlet and JSP Software 519
 - Documentation 520
 - Servlet Compilation: CLASSPATH Entries 520
 - Tomcat 3.0 Standard Directories 520
 - Tomcat 3.1 Standard Directories 520
 - JSWDK 1.0.1 Standard Directories 520
 - Java Web Server 2.0 Standard Directories 521
- A.2 First Servlets 521
 - Simple Servlet 521
 - Installing Servlets 521
 - Invoking Servlets 521
 - Servlet Life Cycle 522
- A.3 Handling the Client Request: Form Data 523
 - Reading Parameters 523
 - Example Servlet 523
 - Example Form 524
 - Filtering HTML-Specific Characters 524
- A.4 Handling the Client Request: HTTP Request Headers 524
 - Methods That Read Request Headers 524
 - Other Request Information 525
 - Common HTTP 1.1 Request Headers 525
- A.5 Accessing the Standard CGI Variables 526
 - Capabilities Not Discussed Elsewhere 526
 - Servlet Equivalent of CGI Variables 526
- A.6 Generating the Server Response: HTTP Status Codes 527
 - Format of an HTTP Response 527
 - Methods That Set Status Codes 527
 - Status Code Categories 527
 - Common HTTP 1.1 Status Codes 527
- A.7 Generating the Server Response: HTTP Response Headers 528
 - Setting Arbitrary Headers 528

Setting Common Headers	528
Common HTTP 1.1 Response Headers	528
Generating GIF Images from Servlets	529
A.8 Handling Cookies	530
Typical Uses of Cookies	530
Problems with Cookies	530
General Usage	530
Cookie Methods	530
A.9 Session Tracking	531
Looking Up Session Information: <code>getValue</code>	531
Associating Information with a Session: <code>putValue</code>	531
<code>HttpSession</code> Methods	532
Encoding URLs	533
A.10 JSP Scripting Elements	533
Types of Scripting Elements	533
Template Text	533
Predefined Variables	533
A.11 The JSP page Directive: Structuring Generated Servlets	534
The <code>import</code> Attribute	534
The <code>contentType</code> Attribute	534
Example of Using <code>contentType</code>	534
Example of Using <code>setContentType</code>	535
The <code>isThreadSafe</code> Attribute	535
The <code>session</code> Attribute	536
The <code>buffer</code> Attribute	536
The <code>autoflush</code> Attribute	536
The <code>extends</code> Attribute	536
The <code>info</code> Attribute	536
The <code>errorPage</code> Attribute	536
The <code>isErrorPage</code> Attribute	536
The <code>language</code> Attribute	536
XML Syntax	537
A.12 Including Files and Applets in JSP Documents	537
Including Files at Page Translation Time	537
Including Files at Request Time	537
Applets for the Java Plug-In: Simple Case	537
Attributes of <code>jsp:plugin</code>	537

Parameters in HTML: jsp:param	538
Alternative Text	538
A.13 Using JavaBeans with JSP	539
Basic Requirements for Class to be a Bean	539
Basic Bean Use	539
Associating Properties with Request Parameters	539
Sharing Beans: The scope Attribute of jsp:useBean	539
Conditional Bean Creation	540
A.14 Creating Custom JSP Tag Libraries	540
The Tag Handler Class	540
The Tag Library Descriptor File	541
The JSP File	541
Assigning Attributes to Tags	541
Including the Tag Body	541
Optionally Including the Tag Body	542
Manipulating the Tag Body	542
Including or Manipulating the Tag Body Multiple Times	542
Using Nested Tags	542
A.15 Integrating Servlets and JSP	542
Big Picture	542
Request Forwarding Syntax	543
Forwarding to Regular HTML Pages	543
Setting Up Globally Shared Beans	543
Setting Up Session Beans	543
Interpreting Relative URLs in the Destination Page	543
Getting a RequestDispatcher by Alternative Means (2.2 Only)	543
Including Static or Dynamic Content	544
Forwarding Requests from JSP Pages	544
A.16 Using HTML Forms	544
The FORM Element	544
Textfields	544
Password Fields	544
Text Areas	545
Submit Buttons	545
Alternative Push Buttons	545
Reset Buttons	545
Alternative Reset Buttons	545

JavaScript Buttons	546
Alternative JavaScript Buttons	546
Check Boxes	546
Radio Buttons	546
Combo Boxes	546
File Upload Controls	547
Server-Side Image Maps	547
Hidden Fields	547
Internet Explorer Features	547
A.17 Using Applets As Servlet Front Ends	547
Sending Data with GET and Displaying the Resultant Page	547
Sending Data with GET and Processing the Results Directly (HTTP Tunneling)	548
Sending Serialized Data: The Applet Code	549
Sending Serialized Data: The Servlet Code	549
Sending Data by POST and Processing the Results Directly (HTTP Tunneling)	550
Bypassing the HTTP Server	551
A.18 JDBC and Database Connection Pooling	552
Basic Steps in Using JDBC	552
Database Utilities	553
Prepared Statements (Precompiled Queries)	553
Steps in Implementing Connection Pooling	554
Index	557
