Foreword	xxxii
Chapter 1 Implementing DNS in a Windows Server 2003 Network	1
Introduction	2
Reviewing the Domain Name System	3
A Brief History of DNS	3
DNS Namespaces	3
The DNS Structure	4
DNS in Windows Operating Systems	5
New Features in Windows Server 2003 DNS	6
Conditional Forwarders	6
Stub Zones	6
Active Directory Zone Replication	6
Enhanced Security	7
Enhanced Round Robin	7
Enhanced Logging	7
DNSSEC	7
EDNS0	8
Resource Registration Restriction	8
2.1/2.1.1 Planning a DNS Namespace	8
2.1.1 Resolution Strategies	9
Choosing Your First DNS Domain Name	10
Internal Domains versus Internet Domains	11
Naming Standards	12
DNS Namespace and Active Directory Integration	17
How DNS Integrates with Active Directory	18
Benefits of Integration	19

2.1.2/2.1.5	Zone Replication	20
	Transfer Types	23
2.1.5	Non-Active Directory Integrated Zones	25
	Configuring Stub Zones	30
2.1.5	Using Windows DNS with Third-Party DNS Solutions	31
	Active Directory Integrated Zones	32
	Zone Storage	33
	Scopes	36
2.1.3	DNS Forwarding	38
	Understanding Forwarders	39
	Forwarder Behavior	39
	Conditional Forwarders	41
	Forward-Only Servers	43
	Directing Queries Through Forwarders	44
2.1.4	DNS Security	45
	DNS Security Guidelines	45
	Levels of DNS Security	47
	Low-Level Security	48
	Medium-Level Security	48
	High-Level Security	49
	Understanding and Mitigating DNS Threats	49
	DNS Spoofing	50
	Denial of Service	50
	DNS Footprinting	52
	Using Secure Updates	52
	The DNS Security Extensions Protocol	54
	Using DNSSEC	56
	Summary of Exam Objectives	58
	Exam Objectives Fast Track	58
	Exam Objectives Frequently Asked Questions	60
	Self Test	62
	Self Test Quick Answer Key	67
Chapter 2 Planning and Implementing an Active Directory Infrastructure		69
	Introduction	70
6.2/6.2.1/ 6.2.2	Designing Active Directory	70

Evaluating Your Environment	70
Creating a Checklist	76
Expect the Unexpected	78
6.2/6.2.1/	
6.2.2	
Before You Start	80
6.2.1	
Forest Root	81
6.2.2	
Child Domains	83
Domain Trees	84
6.2.3/6.2.4/ Configuring Active Directory	85
6.2.5/6.2.6	
6.2.3	
Application Directory Partitions	85
Managing Partitions	87
6.2.4	
Replication	87
6.2.4	
Domain Controllers	88
6.2.6	
Establishing Trusts	94
6.2.6	
Types of Trusts	94
Evaluating Connectivity	98
6.2.5	
Setting Functionality	98
6.2.5	
Forest Functional Levels	98
6.1/6.1.1/	
6.1.2	
Domain Functional Levels	100
6.1.1	
Global Catalog Servers	101
6.1.2	
6.1	
Planning a Global Catalog Implementation	102
When to Use a Global Catalog	104
6.1.1	
Creating a Global Catalog Server	105
6.1.2	
Universal Group Membership Caching	106
6.1.2	
When to Use Universal Group Membership Caching	106
Configuring Universal Group Membership Caching	107
6.1.1	
Adding Attributes to Customize the Global Catalog	108
6.1.2	
Effects on Replication	109
6.1.2	
Security Considerations	109
6.1.1	
Summary of Exam Objectives	110
6.1.1	
Exam Objectives Fast Track	111
6.1.1	
Exam Objectives Frequently Asked Questions	112
6.1.1	
SelfTest	114
6.1.1	
SelfTest Quick Answer Key	119

Chapter 3 Managing and Maintaining an Active Directory Infrastructure	121
Introduction	122
Choosing a Management Method	122
Using a Graphical User Interface	122
Using the Command-line	124
Defining Commands	124
Using Scripting	125
7.1/7.1.1/Managing Forests and Domains	126
7.1.2/7.1.3	
7.1	
Managing Domains	126
Creating a New Child Domain	127
Managing a Different Domain	131
Removing a Domain	132
Deleting Extinct Domain Metadata	133
Raising the Domain Functional Level	134
Managing Organizational Units	136
Assigning, Changing, or Removing Permissions on Active Directory Objects or Attributes	138
Managing Domain Controllers	139
7.1/7.1.2	
Managing Forests	142
Creating a New Domain Tree	143
Raising the Forest Functional Level	145
Managing Application Directory Partitions	147
Managing the Schema	149
7.1.2	
7.1.1	
Managing Trusts	152
Creating a Realm Trust	154
Managing Forest Trusts	157
Creating a Shortcut Trust	158
Creating an External Trust With the Windows Interface	160
Selecting the Scope of Authentication for Users	161
Verifying a Trust	162
Removing a Trust	163
Managing UPN Suffixes	164
7.1.3	
7.2	
Restoring Active Directory	165
7.2.2	
Performing a Nonauthoritative Restore	166
7.2.1	
Performing an Authoritative Restore	170

Understanding NTDSUTIL Restore Options	171
Performing a Primary Restore	172
Summary of Exam Objectives	173
Exam Objectives Fast Track	173
Exam Objectives Frequently Asked Questions	175
Self Test	176
Self Test Quick Answer Key	182
Chapter 4 Implementing PKI in a Windows Server 2003 Network	183
Introduction	184
An Overview of Public Key Infrastructure	184
Understanding Cryptology	185
Encryption	185
Benefits of Public Key Infrastructure	188
Privacy	189
Authentication	189
Nonrepudiation	190
Integrity	190
Components of Public Key Infrastructure	190
Digital Certificates	190
X.509	191
Certificate Authorities	193
Single CA Models	194
Hierarchical Models	194
Web-of-Trust Models	196
Certificate Policy and Practice Statements	197
Publication Points	198
Certificate Revocation Lists	199
Simple CRLs	199
Delta CRLs	199
Online Certificate Status Protocol	200
Certificate Trust Lists	200
Key Archival and Recovery	200
Hardware Key Storage versus Software Key Storage	201
Standards	202
Windows PKI Components	204
Microsoft Certificate Services	204

Active Directory	205
CryptoAPI	205
CAPICOM	205
5.2 Planning the Windows Server 2003 Public Key Infrastructure	206
The Certificate Templates MMC Snap-in	206
Certificate Autoenrollment and Autorenewal for All Subjects ...	207
Delta CRLs	207
Role-Based Administration	207
Key Archival and Recovery	208
Event Auditing	208
Qualified Subordination	208
The Process for Designing a PKI	208
Defining Certificate Requirements	209
Creating a Certification Authority Infrastructure	211
Extending the CA Infrastructure	211
Configuring Certificates	212
Creating a Certificate Management Plan	212
5.2.1 Types of Certificate Authorities	213
Online versus Offline Certificate Authorities	213
Root versus Subordinate Certificate Authorities	213
Enterprise CA versus Standalone CAs	214
5.2.2 Enrollment and Distribution	215
Web Enrollment	215
Autoenrollment	217
5.2.3 Using Smart Cards	218
Defining a Business Need	218
Smart Card Usage	218
Smart Card Certificate Enrollment	219
5.1 Configuring Public Key Infrastructure within Active Directory ...	219
Web Enrollment Support	223
Creating an Issuer Policy Statement	225
Managing Certificates	226
Managing Certificate Templates	226
Using Autoenrollment	226
Importing and Exporting Certificates	230
Revoking Certificates	231
Configuring Public Key Group Policy	232
Automatic Certificate Request	232

Managing Certificate Trust Lists	233
Common Root Certificate Authorities	233
Publishing the CRL	234
Scheduled Publication	234
Manual Publication	234
Backup and Restoring Certificate Services	234
Summary of Exam Objectives	238
Exam Objectives Fast Track	238
Exam Objectives Frequently Asked Questions	240
SelfTest	241
SelfTest Quick Answer Key	246
Chapter 5 Managing User Authentication	247
Introduction	248
8.1.2 Password Policies	248
Creating an Extensive Defense Model	249
Strong Passwords	250
System Key Utility	250
Defining a Password Policy	253
Applying a Password Policy	253
Modifying a Password Policy	256
Applying an Account Lockout Policy	256
Modifying an Account Lockout Policy	259
Password Reset Disks	259
Creating a Password Reset Disk	259
Resetting a Local Account	260
8.1 User Authentication	262
Need for Authentication	263
Single Sign-on	263
Interactive Logon	264
Network Authentication	264
Authentication Types	265
Kerberos	265
Understanding the Kerberos Authentication Process	266
Secure Sockets Layer/Transport Layer Security	267
NT LAN Manager	268
Digest Authentication	269
Passport Authentication	270

Internet Authentication Service	273
Using IAS for Dialup and VPN	275
Creating Remote Access Policies	278
Using IAS for Wireless Access	281
Creating a User Authorization Strategy	282
Educating Users	284
8.1.1 Using Smart Cards	283
When to Use Smart Cards	285
Implementing Smart Cards	285
PKI and Certificate Authorities	286
Setting Security Permissions	287
Enrollment Stations	288
Issuing Enrollment Agent certificates	289
Requesting an Enrollment Agent Certificate	290
Enrolling Users	291
Installing a Smart Card Reader	292
Issuing Smart Card Certificates	292
Assigning Smart Cards	294
Logon Procedures	294
Revoking Smart Cards	294
Planning for Smart Card Support	296
Summary of Exam Objectives	297
Exam Objectives Fast Track	297
Exam Objectives Frequently Asked Questions	299
Self Test	300
Self Test Quick Answer Key	307
Chapter 6 Developing and Implementing a Group Policy Strategy	309
Introduction	310
9.1 Developing a Group Policy Strategy	310
9.1.1 Planning Group Policy with RSoP	311
Group Policy Overview	311
The Planning Process	316
Using RSoP	318
Queries	324
9.1.2 Planning the User Environment	326
9.1.3 Planning the Computer Environment	328

9.2	Configuring the User Environment	330
9.2.1	Distributing Software	332
9.2.2	Autoenrolling User Certificates	335
9.2.3	Redirecting Folders	336
9.2.4	User Security	340
	Summary of Exam Objectives	342
	Exam Objectives Fast Track	342
	Exam Objectives Frequently Asked Questions	344
	SelfTest	345
	SelfTest Quick Answer Key	351
Chapter 7 Managing Group Policy in Windows Server 2003		353
	Introduction	354
	Managing Applications	354
	Managing Security Policies	358
10.1	Troubleshooting Group Policies	360
	Troubleshooting the Group Policy Infrastructure	361
	Troubleshooting Software Installation	363
	Troubleshooting Policy Inheritance	364
	Using RSoP	365
	Using RSoP in Logging Mode	366
	Using RSoP to Troubleshoot Security Settings	373
	Using GPRResult.exe	373
	Other Troubleshooting Techniques	375
	Using the Group Policy Management Console	377
	Key Features and Benefits	379
	Delegating Control of a GPO via GPMC	381
	Using Security Filtering in GPMC	382
	Using GPMC as a Troubleshooting Tool	383
	Creating a Group Policy Modeling Report	385
	Managing Windows 2000 Domains	386
	Summary of Exam Objectives	387
	Exam Objectives Fast Track	387
	Exam Objectives Frequently Asked Questions	389
	SelfTest	390
	SelfTest Quick Answer Key	399

Chapter 8 Securing a Windows Server 2003 Network	401
Introduction	402
Understanding Server Roles	402
File Servers	403
Print Servers	403
Application Servers	404
Mail Servers	404
Terminal Servers	405
Remote Access and VPN Servers	406
Domain Controllers	407
Operations Masters	407
Global Catalog Servers	408
DNS Servers	408
DHCP Servers	409
WINS Servers	409
Streaming Media Servers	409
Securing Servers by Roles	418
1.1/1.2/	
1.2.1	
Securing File Servers	424
Securing Print Servers	425
Securing Application Servers	426
Web Servers	427
Securing Mail Servers	429
Secure Password Authentication	432
Securing Terminal Servers	433
Securing Remote Access and VPN Servers	434
Securing Domain Controllers	436
Securing DNS Servers	437
Securing DHCP Servers	438
Known Security Issues	438
Securing WINS Servers	439
1.2.2	
Security Templates	443
Creating Security Templates	449
Best Practices	449
Modifying Existing Templates	450
Applying Templates	450

4.3.1/4.3/	Securing Data Transmission	459
4.3.1/4.3.2		
	Need for Network Security	459
	Planning for Secure Data Transmission	459
4.3.2	IP Security	460
	Overview	460
	Deploying IPSec	460
	IPSec Management Tools	461
5.3	Implementing and Maintaining Security	469
5.3.1	Security Monitoring	470
5.3.2	Change and Configuration Management	471
5.4	Updating the Infrastructure	473
	Types of Updates	473
	Service Packs	473
	Hotfixes	474
	Deploying and Managing Updates	475
	Analyzing Your Computers	476
	Windows Update	492
	Windows Update Catalog	496
	Software Update Services and Automatic Updates	499
	Summary of Exam Objectives	508
	Exam Objectives Fast Track	509
	Exam Objectives Frequently Asked Questions	511
	SelfTest	512
	SelfTest Quick Answer Key	518
Chapter 9 Planning Security for a Wireless Network		519
	Introduction	520
	Wireless Concepts	520
	Communication in a Wireless Network	521
	Radio Frequency Communications	521
	Spread-Spectrum Technology	522
	How Wireless Works	523
	Wireless Network Architecture	526
	CSMA/CD and CSMA/CA	527
	Wireless Standards	528
	Windows Wireless Standards	529
	IEEE 802.11b	530

IEEE 802.11a	531
IEEE 802.11g	531
IEE 802.20	532
Wireless Vulnerabilities	532
Passive Attacks	533
War Driving to Discover Wireless Networks	533
Sniffing	535
Active Attacks	535
Spoofing and Unauthorized Access	536
Denial of Service and Flooding Attacks	539
Man-in-the-Middle Attacks on Wireless Networks	540
Hijacking and Modifying a Wireless Network	541
Jamming Attacks	542
Fundamentals of Wireless Security	543
Understanding and Using the Wireless Equivalent Privacy Protocol	543
Creating Privacy with WEP	545
Understanding WEP Vulnerabilities	548
Using IEEE 802.1X Authentication	549
RC4 Vulnerabilities	550
Planning and Configuring Windows Server 2003 for Wireless Technologies	550
4.2 Planning and Implementing Your Wireless Network with Windows Server 2003	551
Planning the Physical Layout	552
Planning the Network Topology	553
Planning for Network Identification	553
Planning for Wireless Security	554
4.2 Implementing Wireless Security on a Windows Server 2003 Network	555
Using Group Policy for Wireless Networks	555
Defining Preferred Networks	560
802.1X Authentication	563
User Identification and Strong Authentication	565
Dynamic Key Derivation	565
Mutual Authentication	565
Per-Packet Authentication	566
Using RSoP	566

Logging Mode Queries	567
Planning Mode Queries	567
Assigning and Processing Wireless Network Policies in Group Policy	568
Wireless Network Policy Information	568
Displayed in the RSoP Snap-in	568
Viewing Wireless Computer Assignments	573
4.2 Securing a Windows Server 2003 Wireless Network	574
Using a Separate Subnet for Wireless Networks	577
Securing Virtual Private Networks	578
Using IPSec	579
Implementing Stub Networks for Secure Wireless Networks	579
Monitoring Wireless Activity	580
Implementing the Wireless Monitor Snap-in	580
Monitoring Access Point Data	582
Using Wireless Logging for Security	583
Summary of Exam Objectives	584
Exam Objectives Fast Track	586
Exam Objectives Frequently Asked Questions	588
SelfTest	589
SelfTest Quick Answer Key	594
Chapter 10 Remote Management	595
4.1/4.1.1	
Introduction	596
Remotely Administering Client Computers	596
Remote Assistance	597
Configuring the Client	597
Setting Group Policy for Remote Assistance	598
Requesting Help Using Remote Assistance	604
Providing Help Using Remote Assistance	611
Blocking Remote Assistance Requests	613
Securing Remote Assistance	615
Firewalls and Remote Assistance	619
Terminal Services Remote Administration	621
New Features in Terminal Services	621
Audio Redirection	622
Group Policy Integration	622
Resolution and Color Enhancements	623

Remote Desktop for Server Administration	624
Understanding Remote Desktop for Administration	625
Configuring Remote Desktop for Administration	626
Deploying Remote Desktop for Server Administration	633
Using Remote Desktop for Administration	633
Remote Desktop Snap-in	635
Summary of Exam Objectives	638
Exam Objectives Fast Track	639
Exam Objectives Frequently Asked Questions	640
Self Test	642
Self Test Quick Answer Key	648
Chapter 11 Disaster Recovery Planning and Prevention	649
Introduction	650
3.2.3 Understanding Disaster Recovery	650
Planning for Disaster Recovery	651
3.2.3 Windows Disaster Recovery	653
Startup Options	653
Recovery Console	658
3.2.3 Automated System Recovery	660
3.2/3.2.1/ Backup and Recovery	663
3.2.2	
Establishing a Plan	664
Tape Rotation	664
Offsite Storage	665
3.2.1	
Backup Strategies	666
Volume Shadow Copy	666
The Need for Periodic Testing	671
Security Considerations	671
Using Windows Clustering	672
Clustering Technologies	672
Availability and Features	673
3.1/3.1.1/ Planning a High-Availability Solution	674
3.1.2	
3.1.1	
Clustering Services	674
Considerations	675
Typical Deployments	676

Installing a Server Cluster	676
Securing a Server Cluster	676
3.1.2 Network Load Balancing	676
Sizing a Load-Balanced Cluster	677
Typical Deployment	678
Installing Network Load Balancing	679
Securing Network Load Balancing	683
Summary of Exam Objectives	684
Exam Objectives Fast Track	684
Exam Objectives Frequently Asked Questions	686
SelfTest	687
SelfTest Quick Answer Key	691
Self Test Appendix	693
Index	785
