Introduction	xiii
CHAPTER 1 What Is Sudoku?	1
Rules of Sudoku	1
Sudoku Terminology	3
It's Just Logic!	4
Variants of Sudoku	7
Let's Play Sudoku!	8
Summary	10
CHAPTER 2 Creating the Sudoku Application	11
Creating the Sudoku Project	12
Creating the User Interface	13
Declaring the Member Variables	19
Representing Values in the Grid	21
Generating the Grid Dynamically	23
Starting a New Game	26
Selecting the Numbers to Insert	29
Handling Click Events on the Label Controls	30
Undoing and Redoing a Move	37
Saving a Game	38
Opening a Saved Game	41
Ending the Game	43
Testing the Application	44
Summary	45

CHAPTER 3	Basic Sudoku Solving Technique	47
	Elimination Technique	47
	Column, Row, and Minigrid Elimination	48
	Usefulness of the CRME Technique	54
	Exception Scenarios	56
	Implementing the CRME Technique	58
	Adding Member Variables	58
	Modifying the SetCell() Subroutine	59
	Adding a ToolTip Control	60
	Calculating the Possible Values for a Cell	61
	Scanning the Grid	63
	Wiring the Controls	65
	Testing It Out	67
	Summary	68
CHAPTER 4	Intermediate Techniques	69
	Lone Rangers	69
	Lone Rangers in a Minigrid	70
	Lone Rangers in a Row	71
	Lone Rangers in a Column	73
	Implementing the Technique	77
	Looking for Lone Rangers in Minigrids	77
	Looking for Lone Rangers in Rows	80
	Looking for Lone Rangers in Columns	81
	Modifying the SolvePuzzle() Function	83
	Testing Out the Lone Ranger Technique	86
	Example 1	86
	Example 2	90
	Summary	93
CHAPTER 5	Advanced Techniques	95
	Looking for Twins	95
	Looking for Triplets	99
	Variants of Triplets	100
	Brute-Force Elimination	103

Implementing the Techniques	106
Looking for Twins in Minigrids	107
Looking for Twins in Rows	111
Looking for Twins in Columns	114
Looking for Triplets in Minigrids	117
Looking for Triplets in Rows	120
Looking for Triplets in Columns	124
Modifying the SolvePuzzle() Function	127
Using Brute-Force Elimination	131
Modifying the Code Behind for the Solve Puzzle Button	133
Testing the Techniques	134
Summary	137

CHAPTER 6 Generating Sudoku Puzzles	139
Determining the Level of Difficulty	139
Steps to Generate a Sudoku Puzzle	141
Determining the Locations of Empty Cells	144
Single-Solution Puzzles	146
Implementing the Puzzle-Generating Algorithm	148
Creating the Class	148
Randomizing the List of Possible Values	150
Generating a New Puzzle	152
Creating Empty Cells in the Grid	156
Vacating Another Pair of Cells	158
Exposing the GetPuzzle() Function	160
Wiring Up the Logic with the User Interface	162
Testing the Implementation	165
Easy Puzzles	165
Medium Puzzles	167
Difficult Puzzles	168
Extremely Difficult Puzzles	169
Summary	170

■ CHAPTER 7 **How to Play Kakuro** 171

 The Rules 171

 Solving a Kakuro Puzzle..... 173

 Tips for Solving Kakuro Puzzles 177

 Summary 179

■ APPENDIX **The SudokuPuzzle Class** 181

■ INDEX 207
