Foreword by Robin Milner	<i>page</i> ix
Preface	xi
Overview of the book	xii
Contributors	xiii
Acknowledgments	xiii
1 Introduction	1
1.1 Design rules and conventions	2
1.2 Documentation conventions	7
2 Library modules	11
2.1 Required modules	11
2.2 Optional modules	12
3 Top-level environment	19
3.1 Modules in the top-level environment	19
3.2 Top-level type, exception, and value identifiers	19
3.3 Overloaded identifiers	22
3.4 Infix identifiers	23
3.5 The process environment	23
4 General usages	25
4.1 Linear ordering	26
4.2 Option	27
4.3 Exception handling	29
4.4 Miscellaneous functions	30

5	Text	33
5.1	Characters	33
5.2	Strings and substrings	34
5.3	Conversions to and from text	34
5.4	Taking strings apart	38
6	Numerics	43
6.1	Numerical conversions	43
6.2	Floating-point numbers	45
6.3	Packed data	47
7	Sequential data	51
7.1	Common patterns	51
7.2	Lists	56
7.3	Array modification	57
7.4	Subsequences and slices	57
7.5	Operating on pairs of lists	58
7.6	Two-dimensional arrays	59
8	Input/Output	61
8.1	The I/O model	61
8.2	Using the I/O subsystem	65
9	Systems programming	81
9.1	Portable systems programming	81
9.2	Operating-system specific programming	90
10	Network programming with sockets	99
10.1	Overview	99
10.2	Socket addresses	101
10.3	Internet-domain stream sockets	101
10.4	Internet-domain datagram sockets	104
10.5	Unix-domain sockets	105
10.6	Advanced topics	106
11	Manual pages	111
11.1	The Array structure	112
11.2	The Array2 structure	116
11.3	The ArraySlice structure	122
11.4	The BinIO structure	127
11.5	The BIT_FLAGS signature	129
11.6	The Bool structure	131
11.7	The Byte structure	133
11.8	The CHAR signature	135

11.9	The <code>CommandLine</code> structure	143
11.10	The <code>Date</code> structure	144
11.11	The <code>General</code> structure	149
11.12	The <code>GenericSock</code> structure	153
11.13	The <code>IEEEReal</code> structure	155
11.14	The <code>IMPERATIVE_IO</code> signature	158
11.15	The <code>ImperativeIO</code> functor	165
11.16	The <code>INetSock</code> structure	166
11.17	The <code>INTEGER</code> signature	169
11.18	The <code>IntInf</code> structure	174
11.19	The <code>IO</code> structure	177
11.20	The <code>List</code> structure	180
11.21	The <code>ListPair</code> structure	185
11.22	The <code>MATH</code> signature	189
11.23	The <code>MONO_ARRAY</code> signature	193
11.24	The <code>MONO_ARRAY2</code> signature	199
11.25	The <code>MONO_ARRAY_SLICE</code> signature	205
11.26	The <code>MONO_VECTOR</code> signature	211
11.27	The <code>MONO_VECTOR_SLICE</code> signature	215
11.28	The <code>NetHostDB</code> structure	220
11.29	The <code>NetProtDB</code> structure	223
11.30	The <code>NetServDB</code> structure	225
11.31	The <code>Option</code> structure	227
11.32	The <code>OS</code> structure	229
11.33	The <code>OS.FileSys</code> structure	231
11.34	The <code>OS.IO</code> structure	237
11.35	The <code>OS.Path</code> structure	241
11.36	The <code>OS.Process</code> structure	250
11.37	The <code>PACK_REAL</code> signature	253
11.38	The <code>PACK_WORD</code> signature	255
11.39	The <code>Posix</code> structure	257
11.40	The <code>Posix.Error</code> structure	259
11.41	The <code>Posix.FileSys</code> structure	263
11.42	The <code>Posix.IO</code> structure	276
11.43	The <code>Posix.ProcEnv</code> structure	284
11.44	The <code>Posix.Process</code> structure	289
11.45	The <code>Posix.Signal</code> structure	294
11.46	The <code>Posix.SysDB</code> structure	296
11.47	The <code>Posix.TTY</code> structure	298
11.48	The <code>PRIM_IO</code> signature	308

11.49 The <code>PrimIO</code> functor	317
11.50 The <code>REAL</code> signature	318
11.51 The <code>Socket</code> structure	330
11.52 The <code>STREAM_IO</code> signature	346
11.53 The <code>StreamIO</code> functor	358
11.54 The <code>STRING</code> signature	360
11.55 The <code>StringCvt</code> structure	366
11.56 The <code>SUBSTRING</code> signature	372
11.57 The <code>TEXT</code> signature	380
11.58 The <code>TEXT_IO</code> signature	382
11.59 The <code>TEXT_STREAM_IO</code> signature	386
11.60 The <code>Time</code> structure	387
11.61 The <code>Timer</code> structure	391
11.62 The <code>Unix</code> structure	394
11.63 The <code>UnixSock</code> structure	398
11.64 The <code>Vector</code> structure	401
11.65 The <code>VectorSlice</code> structure	405
11.66 The <code>Windows</code> structure	409
11.67 The <code>WORD</code> signature	420
<i>Bibliography</i>	427
<i>General index</i>	429
<i>SML identifier index</i>	435
<i>Raised exception index</i>	465
