

<b>Struts and Enterprise Web Technologies .....</b>	<b>1</b>
Technology Stew .....	1
JavaServer Pages .....	2
Servlets .....	3
Custom Tag Libraries .....	3
XML .....	4
Web and Application Servers .....	4
Model-View-Controller .....	5
General Flow .....	6
The Model .....	7
The View .....	7
The Controller .....	7
Application Model .....	7
Introduction to Struts 1.1 .....	8
Moving On .....	9
 <b>Framework Components Overview.....</b>	 <b>11</b>
Controlling Flow with the ActionServlet Component .....	11
Working with the Model Components .....	12
org.apache.struts.action.ActionMapping .....	13
org.apache.struts.action.Action .....	15
org.apache.struts.action.ActionForward .....	15
org.apache.struts.action.ActionError .....	16
org.apache.struts.action.ActionMessage .....	17
View Components .....	18
org.apache.struts.action.ActionForm .....	18
Summary .....	19
 <b>Struts Development Plan .....</b>	 <b>21</b>
The Premise .....	21
Identify the Applicability .....	22
Ten-Step Development Program .....	23
Gather and Define the Application Requirements .....	23
Define and Develop Each Screen Requirement.....	24
Determine All the Access Paths for Each Screen.....	25
Define the ActionMappings .....	26
Create the ActionForms.....	26
Develop Actions .....	26
Develop the Application Business Logic .....	27
Create JSPs .....	27
Build the Appropriate Configuration Files .....	28
Build, Test, Deploy .....	29

<b>Summary .....</b>	<b>29</b>
<b>Creating and Building Actions .....</b>	<b>31</b>
Creating an Action .....	32
Execute Method.....	33
Execution Steps in Execute .....	35
When Bad Things Happen to Good Actions .....	38
ActionErrors .....	38
Declarative Exception Handling .....	39
Handling Tokens.....	41
Design Rules of Thumb .....	42
Summary .....	43
<b>Creating and Building ActionForms .....</b>	<b>45</b>
Defining ActionForms.....	46
ActionForm validate() method.....	48
ActionForm reset() Method .....	49
Design Rules of Thumb .....	50
Wizards, and We're Not Talking Oz .....	51
Other Wizard Variations .....	56
DynaActionForms .....	57
Summary .....	58
<b>Configuring Struts .....</b>	<b>59</b>
Web.xml.....	59
Using Subapplications.....	60
Other Initialization Parameters .....	62
Defining the Servlet Mapping.....	63
The Welcome File List.....	64
Defining the Custom Tag Libraries.....	65
Other Elements .....	66
Struts-con.g.xml.....	66
Defining Data Sources.....	66
Defining Form Beans.....	67
Defining Global Forwards.....	67
Defining Action Mappings.....	68
Action Attributes .....	69
Controller Configuration .....	71
Defining a Plugin.....	73
Summary .....	74
<b>Building Struts-Enabled JSPs .....</b>	<b>75</b>
Setting Up a JSP .....	76

Making Tags Available .....	76
Taglib Definitions .....	77
Summary .....	78
<b>Working with the Struts Custom Tag Libraries .....</b>	<b>79</b>
When Tags Throw Exceptions .....	80
Using Property Referencing .....	80
Using the Struts-html Tag Library .....	81
Using and Accessing Form-Related Tags .....	82
Working with Errors and Messages .....	84
Completed Sample .....	85
Using the Struts-bean Tag Library .....	88
Using Bean Tags .....	89
Using the Struts-logic Tag Library .....	91
Value Comparisons .....	92
Substring Matching .....	93
Presentation Location .....	93
Collection Manipulation .....	94
Using the Struts-nested Tag Library .....	97
Using the Struts-template Tags .....	100
Creating Pages with Template Structure .....	101
Summary .....	103
<b>Internationalizing Your Struts Application .....</b>	<b>105</b>
However You Say It: Hello, Bon Jour, Hola, Ni Hao .....	105
UTF-8 .....	106
Locales .....	106
PropertyResourceBundles .....	107
Formatted Messages .....	109
The MessageResources Class .....	110
Summary .....	110
<b>Configuring, Testing, and Rolling out Your Application ...</b>	<b>111</b>
The WAR File .....	111
Setting Up the WAR Layout .....	112
Building to Deploy .....	113
Jar Files .....	113
The Struts.jar File .....	114
Using Logging for Debugging .....	114
Unit Testing .....	116
Maintaining Your Application .....	118
Keeping Up with the Joneses .....	118

Summary .....	119
<b>Additional Useful Struts Packages and Extensions.....</b>	<b>121</b>
Tiles .....	121
Validator .....	122
