|--|----------|
| CHAPTER 1 The Windows 2000 System Administration Migration Path | 1 |
| Brief Overview of Windows 2000 Server | 2 |
| Windows 2000 System Administration Overview | 5 |
| Increased Reliability, Availability, and Scalability | 6 |
| Core Operating System Services | 6 |
| Fault Tolerance | 7 |
| Disaster and System Recovery | 8 |
| Reliable Storage | 9 |
| Avoiding Crashes and Reboots | 10 |
| High-Availability Solutions | 11 |
| Improved Scalability | 12 |
| Easier Management and Lower Costs | 13 |
| Integrated Directory Services | 13 |
| Comprehensive Management Solutions | 14 |
| Comprehensive File, Print, and Web Services | 15 |
| Comprehensive Internet and Application Server | 17 |
| Application Services | 17 |
| Communications and Networking Services | 19 |
| Why the Change? | 20 |
| Migrating to Windows 2000 Server | 23 |
| Getting Ready | 24 |
| Streamlining | 25 |
| Planning | 26 |
| Architecture | 27 |
| Costs | 28 |
| Plan of Action | 29 |

| | |
|--|-----------|
| Timeline | 30 |
| Testing | 31 |
| Deployment | 31 |
| Setting Up Windows 2000 Server | 32 |
| Installing Windows 2000 Server | 32 |
| Upgrading to Windows 2000 Server | 35 |
| Summary | 37 |
| FAQs | 40 |
| CHAPTER 2 Overview of Windows 2000 Administration | 43 |
| Introduction to Network Administration | 44 |
| Designing and Setting Up the Network | 45 |
| Managing the Network | 46 |
| Protecting the Network | 46 |
| Documenting the Network | 48 |
| Microsoft Management Console | 51 |
| Introduction to Active Directory | 56 |
| Key Concepts | 56 |
| Directory Service | 57 |
| Domains | 57 |
| Namespace | 60 |
| Global Catalog | 61 |
| Organizational Units | 62 |
| Groups | 62 |
| Name | 64 |
| Features and Benefits of Active Directory | 65 |
| Simplified Management | 66 |
| Added Security | 67 |
| Scalability | 70 |
| Replication of Information | 70 |
| Extended Interoperability | 71 |
| Integration with DNS | 72 |
| Beyond Active Directory | 72 |
| Volume Management | 72 |
| Disk Quotas | 73 |
| Defragmentation | 74 |
| Backup and Recovery | 75 |
| Hierarchical Storage Management | 76 |

| | |
|---|-----------|
| File Service Management | 76 |
| Distributed File System | 77 |
| Using Windows 2000 Help | 79 |
| Summary | 81 |
| FAQs | 83 |
| CHAPTER 3 Setting Up User Accounts | 87 |
| Defining an Acceptable Use Policy | 88 |
| Template: Acceptable Use/Security Policy | 90 |
| Purpose | 90 |
| Interpretation | 90 |
| Definitions | 90 |
| Responsibility | 91 |
| Introduction to User Accounts | 95 |
| Requirements for New User Accounts | 96 |
| Default User Account Settings | 97 |
| Creating a Domain User Account | 99 |
| Active Directory Users and Computers | 99 |
| Creating User Accounts | 100 |
| Setting Password Requirements | 103 |
| Security Templates | 103 |
| Loading Security Snap-ins into the MMC | 104 |
| Loading the Security Templates | 105 |
| Changing Account (Password) Policies | 106 |
| Setting Properties for User Accounts | 110 |
| Modifying User Accounts | 110 |
| General | 111 |
| Address | 112 |
| Account | 113 |
| Profile | 115 |
| Telephones/Notes | 116 |
| Organization | 118 |
| Dial-in | 119 |
| Managing User Accounts | 121 |
| Deleting User Accounts | 122 |
| Changing User Passwords | 122 |
| Enabling an Account | 123 |
| Disabling an Account | 123 |

| | |
|---|------------|
| Other Active Directory Users and Computers Functions | 123 |
| Moving User Accounts | 125 |
| Mapping a Certificate to a User | 125 |
| Best Practices | 128 |
| Using Active Directory Users and Computers | 129 |
| Advanced Features | 129 |
| Filters | 129 |
| Administrative Logon | 130 |
| Account (Password) Policies | 132 |
| Summary | 132 |
| FAQs | 133 |
| | |
| CHAPTER 4 Using Groups to Organize User Accounts | 135 |
| Introduction to Groups | 136 |
| Group Type | 139 |
| Security Groups | 139 |
| Distribution Lists | 139 |
| Group Scope | 140 |
| Domain Local | 140 |
| Global | 140 |
| Universal | 140 |
| Implementing Group Strategies | 142 |
| Why Use Groups? | 142 |
| Structuring Groups | 143 |
| Implementing Groups | 144 |
| Preparing to Create Groups | 144 |
| Information Needed to Create a Group | 144 |
| Creating a Group | 145 |
| Assigning Users to a Group | 147 |
| Adding Users through the Group Setting | 147 |
| Adding User through the User Settings | 149 |
| Configuring Group Settings | 151 |
| General | 152 |
| Members | 153 |
| Member Of | 153 |
| Managed By | 154 |
| Object | 154 |

| | |
|---|-----|
| Security | 156 |
| Managing Groups | 157 |
| Changing a Group's Scope | 157 |
| Finding a Group | 158 |
| Deleting a Group | 159 |
| Implementing Local Groups | 160 |
| Preparing to Create Local Groups | 160 |
| Creating a Local Group | 161 |
| Implementing Built-in Groups | 162 |
| Built-in Domain Local Groups | 162 |
| Built-in Global Groups | 163 |
| Built-in Local Groups | 163 |
| Built-in System Groups | 164 |
| Built-in Group Behavior | 164 |
| Best Practices | 168 |
| Managing Groups | 169 |
| Using Universal Groups | 169 |
| Switching Modes | 170 |
| Summary | 172 |
| FAQs | 172 |
| | |
| CHAPTER 5 Administering File Resources | 175 |
| Introduction | 176 |
| Using Microsoft Windows NT File System (NTFS) | |
| Permissions | 176 |
| NTFS Folder Permissions | 176 |
| NTFS File Permissions | 177 |
| How Windows 2000 Applies NTFS Permissions | 178 |
| Access Control Lists | 178 |
| Combining NTFS Permissions | 179 |
| Permissions Are Cumulative | 179 |
| File Permissions Override Folder Permissions | 179 |
| Deny Overrides All Other Permissions | 180 |
| Permission Inheritance | 180 |
| Assigning NTFS Permissions | 181 |
| Planning NTFS Permissions | 181 |
| Managing NTFS Permissions | 182 |
| Special Access Permissions | 185 |

| | |
|---|------------|
| Take Ownership | 185 |
| Change Permissions | 187 |
| Other Special Permissions | 187 |
| Using Special Access Permissions | 188 |
| Setting the Special Access Permissions | 188 |
| Taking Ownership of Files and Folders | 190 |
| Changing NTFS Permissions | 191 |
| Copying and Moving Files and Folders | 192 |
| Copying Files | 192 |
| Moving Files | 193 |
| Sharing Resources | 196 |
| Securing Network Resources | 196 |
| Shared Folder Permissions | 197 |
| Creating Shared Folders | 198 |
| Developing a Shared Folder Strategy | 198 |
| Shared Applications | 199 |
| Shared Data | 200 |
| Sharing Folders | 200 |
| Administrative Shares | 201 |
| Creating a Shared Folder | 202 |
| Assigning Permissions to a Shared Folder | 204 |
| Managing Shared Folders | 206 |
| Connecting to a Shared Folder | 208 |
| NTFS Permissions and Shared Folders | 211 |
| Troubleshooting Access Problems | 213 |
| Solving Permission Problems | 213 |
| Typical Permission-Related Access Problems | 213 |
| Solving Permission-Related Access Problems | 214 |
| Best Practices | 214 |
| Avoiding Permission-Related Access Problems | 215 |
| Guidelines for Managing Shared Folder Permissions | 216 |
| Summary | 217 |
| FAQs | 218 |
| CHAPTER 6 Administering User Accounts | 221 |
| Managing User Profiles | 222 |
| User Profiles Overview | 222 |
| Types of User Profiles | 223 |

| | |
|---|------------|
| Contents of a User Profile | 223 |
| All Users | 224 |
| Settings Saved in a User Profile | 225 |
| Local User Profiles | 226 |
| Roaming User Profiles | 227 |
| Creating Individualized Roaming User Profiles | 228 |
| Mandatory Profiles | 229 |
| Setting Up a Roaming User Profile | 230 |
| Assigning Customized Roaming Profiles | 231 |
| Creating Home Folders | 235 |
| Home Directories and My Documents | 235 |
| Creating Home Directories | 236 |
| Introduction to Group Policies | 239 |
| Applying Group Policy | 240 |
| Order of Application | 240 |
| Filtering Policy Based on Security Group Membership | 241 |
| Blocking Policy Inheritance | 241 |
| Enforcing Policy from Above | 241 |
| Best Practices | 242 |
| Allowing for Different Hardware Configurations | 242 |
| Combining the Power of Profiles and Policies | 242 |
| Tightening Security on Home Directories | 243 |
| Summary | 244 |
| FAQs | 244 |
| | |
| CHAPTER 7 Administering Printer Resources | 247 |
| Introduction to Administering Printers | 248 |
| Terminology | 248 |
| Planning the Print Environment | 248 |
| Dedicated vs. Non-dedicated Print Servers | 249 |
| Local, Remote, and Network Printers | 250 |
| Creating the Print Environment | 250 |
| Installing a Local Printer | 250 |
| Installing a Network Printer | 254 |
| Installing a Printer from Another Server | 256 |
| Other Types of Network Printers | 257 |
| Loading Printer Drivers | 259 |

| | |
|--|------------|
| Printer Properties | 261 |
| General | 261 |
| Sharing | 262 |
| Ports | 262 |
| Advanced | 263 |
| Security | 263 |
| Device Settings | 265 |
| Managing Printer Permissions | 265 |
| Security/Sharing Permissions | 266 |
| Printer Ownership | 268 |
| Managing Printers | 269 |
| Assigning Forms to Paper Trays | 269 |
| Assigning Separator Pages | 270 |
| Creating a Printer Pool | 272 |
| Specifying Printer Priorities | 273 |
| Redirecting a Printer | 274 |
| Removing Printer Drivers | 275 |
| Managing Documents in a Print Queue | 276 |
| Setting Priority, Notification, Printing Time | 277 |
| Administering Printers by Using a Web Browser | 278 |
| Best Practices | 281 |
| Organize Printers by Business Function or Geographic Location | 281 |
| Put Print Devices on a Separate Network | 282 |
| Allow Clients Access to Web Printing Interfaces | 282 |
| Restart Print Spool Service Periodically | 283 |
| FAQs | 283 |
| CHAPTER 8 Managing Storage Data | 285 |
| Managing Data Compression | 286 |
| Compressing Files and Folders | 286 |
| Determining Compression Status | 289 |
| Disk Space Requirements | 291 |
| Compression State | 292 |
| Compression Rules | 292 |
| Copying and Moving Compressed Files and Folders | 292 |

| | |
|---|------------|
| Managing Disk Quotas | 297 |
| Encrypting Data | 305 |
| File Encryption | 308 |
| Decryption of Files | 308 |
| Storing Encrypted Files on Remote Servers | 308 |
| Accessing Encrypted Data | 309 |
| Moving and Renaming Encrypted Data | 309 |
| Decrypting Data | 309 |
| The Recovery Agent | 310 |
| Using Disk Defragmenter | 311 |
| Analyzing a Drive | 314 |
| Viewing Reports | 315 |
| Defragmenting NTFS File System Partitions | 316 |
| Troubleshooting Data Storage | 317 |
| Best Practices | 318 |
| FAQs | 319 |
| | |
| CHAPTER 9 Monitoring Event Logs | 321 |
| Introduction to Monitoring Event Logs | 322 |
| Viewing Event Logs | 325 |
| Monitoring Security Events | 336 |
| Auditing Files and Folders | 342 |
| Auditing Registry Entries | 347 |
| Analyzing Security Events | 353 |
| Managing Event Logs | 354 |
| Best Practices | 359 |
| Summary | 360 |
| FAQs | 361 |
| | |
| CHAPTER 10 Backing Up and Restoring Data | 363 |
| Introduction to Backing Up and Recovering Data | 364 |
| Types of Backups | 367 |
| Normal Backup | 367 |
| Daily Backup | 367 |
| Copy Backup | 368 |
| Incremental Backup | 368 |
| Differential Backup | 369 |
| Necessary Permissions and User Rights | 370 |

| | |
|--|-----|
| System State Data | 371 |
| Emergency Repair Disk | 372 |
| Back Up and Restore Options | 373 |
| Advanced Options | 378 |
| Backing Up Data | 380 |
| Back Up Files to File or a Tape | 382 |
| Scheduling | 384 |
| Using Batch Files | 387 |
| Restoring Data | 389 |
| Restore Files from a File or Tape | 389 |
| Restore System State Data | 390 |
| Authoritative Restore | 391 |
| Maintaining Media | 393 |
| Best Practices | 394 |
| Summary | 396 |
| FAQs | 397 |
| | |
| CHAPTER 11 Advanced Administration of Windows 2000 | 399 |
| Administering Windows 2000 | 400 |
| Microsoft Management Console | 400 |
| Windows 2000 System Administration | 402 |
| Computer Management Console | 402 |
| Event Viewer | 406 |
| License Manager | 406 |
| Performance | 407 |
| Windows 2000 Network Administration | 410 |
| Adapters and Protocols | 410 |
| Configuring Adapters and Protocols | 412 |
| DHCP Manager | 415 |
| DNS Management | 419 |
| Windows Internet Naming Service (WINS) | 424 |
| Terminal Services | 425 |
| Quality of Service | 429 |

| | |
| CHAPTER 12 Administering Active Directory | 469 |
| Introduction to Administering Active Directory | 470 |
| Active Directory Concepts | 471 |
| Directory | 471 |
| Namespace | 472 |
| Naming Conventions | 474 |
| Schema | 476 |
| Global Catalog | 477 |
| Replication | 479 |
| Client Software | 481 |
| Active Directory Components | 482 |
| Objects | 482 |
| Site | 484 |
| Domain | 485 |
| Trees and Forests | 485 |
| Using Active Directory Management Utilities | 486 |

| | |
|---|------------|
| DCPromo | 486 |
| Active Directory Users and Computers | 493 |
| Active Directory Domains and Trusts | 496 |
| Active Directory Sites and Services | 498 |
| Publishing Objects in Active Directory | 503 |
| Sharing Resources | 503 |
| Locating Objects in Active Directory | 506 |
| Controlling Access to Objects | 508 |
| User Authentication | 509 |
| Object-based Access Control | 509 |
| Active Directory Permissions | 512 |
| Delegating Administrative Control of Objects | 512 |
| Delegation of Control Wizard | 513 |
| Overview of Active Directory Service Interface (ADSI) | 515 |
| Best Practices | 516 |
| Summary | 517 |
| FAQs | 521 |
| CHAPTER 13 Implementing Group Policy | 523 |
| Introduction to Windows 2000 | |
| Group Policy | 524 |
| Group Policy Structure | 525 |
| Types of Configurations | 526 |
| Computer Configuration | 526 |
| User Configuration | 526 |
| Configuration Subfolders | 526 |
| Type of Group Policies | 530 |
| Software Deployment | 530 |
| Software Policies | 530 |
| Desktop File\Folder Management | 531 |
| Scripts | 531 |
| Security | 531 |
| Group Policy Objects | 531 |
| Group Policy Containers | 532 |
| Group Policy Templates | 532 |
| GPT Contents | 533 |
| GPT.INI | 534 |

| | |
|--|------------|
| How Group Policy Is Applied in Active Directory | 536 |
| Order of Inheritance | 536 |
| Creating a Group Policy Object | 538 |
| Group Policy and Slow Networks | 540 |
| Filtering the Scope of GPO | 541 |
| Modifying Group Policy Inheritance | 542 |
| Modifying Group Policy | 543 |
| Group Policy Tab | 544 |
| Group Policy Editor | 546 |
| Adding Administrative Templates | 548 |
| Using the Group Policy Management Snap-in | 549 |
| Group Policy Configuration Example | 549 |
| Delegating Administrative Control of a Group Policy Object | 550 |
| Creating a Group Policy Object | 552 |
| Modifying a Group Policy Object | 554 |
| Managing a Group Policy Object Link to a Site, Domain, or Organizational Unit | 555 |
| Guidelines for Implementing Group Policy | 557 |
| Best Practices | 560 |
| Summary | 562 |
| FAQs | 565 |
| | |
| CHAPTER 14 Managing User Environments Using Group Policy | 567 |
| Introduction to Managing User Environments | 568 |
| Types of Group Policy for Managing User Environments | 569 |
| Group Policy Snap-In for the Microsoft Management Console | 570 |
| Using Administrative Templates | 573 |
| Assigning Registry-Based Policies | 576 |
| Creating Custom Administrative Templates | 579 |
| Adding Administrative Templates | 585 |
| Using Scripts | 586 |
| Assigning Script Policies to Users and Computers | 588 |
| Folder Redirection | 590 |
| FAQs | 593 |

| | |
|---|------------|
| CHAPTER 15 Managing Software by Using Group Policy | 595 |
| Introduction | 596 |
| Introduction to Managing Software Deployment | 596 |
| Deploying Software | 597 |
| Creating Software Packages | 599 |
| Creating a Non-Windows Installer Package File | 601 |
| Managing Software | 605 |
| Maintaining Software | 615 |
| Upgrading Software | 621 |
| Removing Software | 623 |
| Summary | 624 |
| FAQs | 625 |
| | |
| CHAPTER 16 Administering User Accounts and Groups | 629 |
| Introduction to Administration of User Accounts and Groups | 630 |
| Creating Multiple User Accounts | 631 |
| Migrating Users from an NT 4.0 Domain | 632 |
| Creating New Active Directory Users in Bulk | 634 |
| How Does the Script Work? | 634 |
| Importing Users from Novell Directory Services (NDS) | 636 |
| Administering Logon Names | 636 |
| Lockout Settings | 636 |
| Password Requirements | 639 |
| Configuring Account Policies Using Group Policy | 641 |
| Troubleshooting User Logon Problems | 646 |
| Unable to Find a Domain Controller | 646 |
| Unable to Load the User Profile | 648 |
| Missing Computer Account | 650 |
| Redirecting User Data to a Network Share | 651 |
| Setting Up Accounts for Mobile Users | 655 |
| Multilink and Bandwidth Allocation Protocol (BAP) | 658 |
| Using Universal Groups | 660 |
| Windows NT 3.x and 4.x Groups Types | 660 |
| Windows 2000 Group Types | 661 |
| Best Practices | 663 |
