

# Contents

---

Acknowledgments . . . . .	ix
Introduction . . . . .	xi
<i>How to Use this Book</i> . . . . .	xv
Levers and Buoyancy . . . . .	3
The Sun Is the Center of the Universe . . . . .	5
Human Anatomy . . . . .	7
The Law of Falling Objects . . . . .	9
Planetary Motion . . . . .	11
Jupiter's Moons . . . . .	13
Human Circulatory System . . . . .	15
Air Pressure . . . . .	17
Boyle's Law . . . . .	19
The Existence of Cells . . . . .	21
Universal Gravitation . . . . .	23
Fossils . . . . .	25
Distance to the Sun . . . . .	27
Bacteria . . . . .	29
Laws of Motion . . . . .	31
Order in Nature . . . . .	33
Galaxies . . . . .	36
The Nature of Electricity . . . . .	38
Oceans Control Global Weather . . . . .	40
Oxygen . . . . .	43
Photosynthesis . . . . .	45
Conservation of Matter . . . . .	47
The Nature of Heat . . . . .	49
Erosion of the Earth . . . . .	51
Vaccinations . . . . .	53
Infrared and Ultraviolet . . . . .	55
Anesthesia . . . . .	57
Atoms . . . . .	59
Electrochemical Bonding . . . . .	61
The Existence of Molecules . . . . .	63
Electromagnetism . . . . .	65
First Dinosaur Fossil . . . . .	67
Ice Ages . . . . .	69
Calories (Units of Energy) . . . . .	71
Conservation of Energy . . . . .	73

Doppler Effect . . . . .	75
Germ Theory . . . . .	77
The Theory of Evolution . . . . .	79
Atomic Light Signatures. . . . .	81
Electromagnetic Radiation/Radio Waves . . . . .	83
Heredity . . . . .	86
Deep-Sea Life. . . . .	88
Periodic Chart of Elements. . . . .	90
Cell Division. . . . .	92
X-Rays . . . . .	95
Blood Types . . . . .	97
Electron . . . . .	99
Virus. . . . .	101
Mitochondria . . . . .	103
Radioactivity. . . . .	105
Atmospheric Layers . . . . .	107
Hormones . . . . .	109
$E = mc^2$ . . . . .	111
Relativity . . . . .	114
Vitamins . . . . .	117
Radioactive Dating . . . . .	119
Function of Chromosomes . . . . .	121
Antibiotics . . . . .	124
Fault Lines . . . . .	126
Superconductivity. . . . .	128
Atomic Bonding . . . . .	131
Isotopes. . . . .	133
Earth's Core and Mantle. . . . .	136
Continental Drift. . . . .	138
Black Holes . . . . .	140
Insulin. . . . .	142
Neurotransmitters . . . . .	144
Human Evolution . . . . .	146
Quantum Theory. . . . .	148
Expanding Universe . . . . .	150
Uncertainty Principle . . . . .	153
Speed of Light . . . . .	155
Penicillin. . . . .	158
Antimatter. . . . .	160
Neutron. . . . .	163
Cell Structure . . . . .	165
The Function of Genes . . . . .	167
Ecosystem. . . . .	169
Weak and Strong Force . . . . .	171
Metabolism. . . . .	174

---

Coelacanth . . . . .	176
Nuclear Fission . . . . .	178
Blood Plasma . . . . .	181
Semiconductor Transistor . . . . .	183
The Big Bang . . . . .	185
Definition of Information . . . . .	188
Jumpin' Genes . . . . .	190
Fusion . . . . .	192
Origins of Life . . . . .	194
DNA . . . . .	196
Seafloor Spreading . . . . .	199
The Nature of the Atmosphere . . . . .	201
Quarks . . . . .	203
Quasars and Pulsars . . . . .	205
Complete Evolution . . . . .	208
Dark Matter . . . . .	211
The Nature of Dinosaurs . . . . .	213
Planets Exist Around Other Stars . . . . .	215
Accelerating Universe . . . . .	218
Human Genome . . . . .	220
References . . . . .	223
Appendix 1: Discoveries by Scientific Field . . . . .	229
Appendix 2: Scientists . . . . .	233
Appendix 3: The Next 40 . . . . .	237
Index . . . . .	239
