Abstract	iii
Special Notices	xiii
Preface	xv
How This Document is Organized	xvi
Related Publications	xvi
ITSO Redbooks on the World Wide Web (WWW)	xvii
Acknowledgments	xviii

Part 1. Context Setting	1
Chapter 1. Business Processes Overview	3
Chapter 2. The Changing Environment	5
2.1 Forces Driving Corporate Change	6
2.1.1 Customers	6
2.1.2 Competition	6
2.1.3 Constant Change	7
Chapter 3. A Model for Business Processes	9
3.1 The Human Element	10
3.2 The Customer-Supplier Relationship	10
3.3 Customer-Supplier Communications	12
3.4 Traditional Process Definition Methods	14
3.5 Process Measurement	14
3.6 Business Process Definition	15
3.7 Who Are the Customers?	16
3.8 Case Study Lessons	16
3.8.1 Missing Roles and Phases	17
3.8.2 Connecting the Commitments	17
3.8.3 Estimates versus Commitments	19
3.8.4 Structuring Accountability	19
3.8.5 Roles and Organization Structure	19
3.9 Designing Business Processes	20
3.9.1 New Process Design	21
3.9.2 Redesigning Processes	22
3.10 Business Process Definition: A New Tool	22
3.11 An IBM Business Process Reengineering Example: Customer Relationship Management	22
3.11.1 CRM Project Overview	23
3.11.2 CRM Project Approach	23
3.11.3 Sample Transaction Scenarios	24
Chapter 4. Information Systems Architecture	27
4.1 The Architecture Concept	29
4.1.1 Bubble Charts	29
4.1.2 Architect's Drawings	29
4.1.3 Architect's Plans	29
4.1.4 Contractor's Plans	30
4.1.5 Shop Plans	30

4.2	Are Architectural Representations Generic?	31
4.3	Different Views of an Information System	32
4.3.1	ISA Framework Rules	35
4.4	Value of the Information Systems Architecture Framework	36
Chapter 5. A Case Study		41
5.1	Universal Trust Company Overview	42
5.2	Mortgage Application Process	42
5.2.1	Cycle Time Details	43
5.3	Headquarters Real Estate Administrator	44

Part 2. Roadmap	47
------------------------	----

Chapter 6. Business Process Reengineering Using IBM's Enhanced Line of Visibility Engineering Methodology		49
6.1	Introducing LOVEM-E	50
6.1.1	Use	50
6.1.2	Benefits	51
6.2	Components of LOVEM-E	52
6.2.1	Process Path Management	52
6.2.2	Process Maturity Rating and Key Indicators	55
6.2.3	Structure	56
6.2.4	Types of LOVCs	58
6.3	Architecture Line of Visibility Chart	59
6.3.1	Structure and Main Components	59
6.3.2	ALOVC Example	63
6.4	Logical Line of Visibility Chart	64
6.4.1	Structure and Main Components	65
6.4.2	LLOVC Examples	66
6.5	Physical Line of Visibility Chart	67
6.5.1	Structure and Main Components	67
6.5.2	PLOVC Examples	70
6.6	Job Line of Visibility Chart	72
6.6.1	Structure and Main Components	72
6.6.2	JLOVC Examples	76
6.6.3	JLOVC Applications	77
6.7	Reengineering Using the LOVCs	78
6.7.1	Criteria for Choosing Business Process Reengineering or Process Redesign	79
6.7.2	Major Business Process Reengineering Roadmap	80
6.7.3	Documenting As Is Processes	81
6.7.4	Architecting To Be Processes	82
6.7.5	Designing To Be Process Models	84
Chapter 7. Workflow Management		87
7.1	Application Structures	88
7.2	Business Reengineering	88
7.3	Applications	88
7.4	An Application Integrator	90
7.5	Three Dimensions of Workflow Definition	90
7.5.1	The Process View: What Is Performed	90
7.5.2	The Organization View: Who Performs	92
7.5.3	The Infrastructure View: Which Resources Are Used	92
7.6	Resource Manager	93

7.6.1 Buildtime Support	94
7.6.2 Runtime Support	94
7.6.3 Administration	95
7.7 Process-Based Application Development	95
7.8 Workflow-Based Application Development	96
7.8.1 Process Verification	97
7.9 Object-Oriented Technology	97

Part 3. Tools for Productivity 99

Chapter 8. Business Modeling Tool	101
8.1 Basic Activities of the Business Modeling Tool	102
8.1.1 Gathering Information	102
8.1.2 Modeling Business Processes	102
8.1.3 Analyzing, Improving, and Monitoring the Process	103
8.2 Using Business Modeling Tool	103
8.2.1 Business Models	104
8.2.2 Using the Export Facility	107
8.2.3 Using the LOVCs of BMT	108
8.3 Generating Workflow Scripts	109
8.3.1 FlowMark and the FlowMark Definition Language	109
8.3.2 BMT Generation of FlowMark Definition Language	110
8.3.3 From LOVCs to FlowMark Definition Language	111
8.4 Complementary Modeling Techniques	111
8.4.1 BMT Hierarchical Structure Diagram	111
8.4.2 BMT Logical Transformation List	113
Chapter 9. VisualAge Requirements Tool	117
9.1 Introducing VisualAge Requirements Tool	118
9.1.1 Advantages	118
9.1.2 Uses	119
9.2 Business Objects	122
9.3 Associations	123
9.4 The User Requirement Statement	124
9.5 Positioning	124
9.5.1 VisualAge Requirements Tool User Environment	125
9.6 Business Operation	126
9.7 Business Transactions	128
9.8 Business Rules	132
9.9 Business Information	140
9.9.1 Data Dependency Relationships	142
9.10 Business Facts	143
9.11 Data Consolidation	144
9.12 Review Requirements Statements with Users	145
9.13 VisualAge Requirements Tool Reports	145
Chapter 10. FlowMark	149
10.1 FlowMark Description	150
10.1.1 Buildtime	150
10.1.2 Runtime	151
10.1.3 Workflow Model	151
10.1.4 How These Pieces Fit Together	154
10.2 Modeling with Buildtime	155
10.2.1 Creating a FlowMark Model	157

10.2.2	Creating Data Structures	159
10.2.3	Creating Program Registrations	159
10.2.4	Defining Staff	161
10.2.5	Defining Program Activities	162
10.2.6	Animation	164
10.2.7	Preparing Application Programs	165
10.3	Executing with Runtime	165
10.3.1	Audit Trail	166
10.3.2	Process Monitor	167
10.4	External Format	167
10.4.1	Importing BMT FlowMark Definition Language	168
10.5	From LOVCs to FlowMark Implementation	171

Part 4. Conclusions 173

Chapter 11. Closing Thoughts	175
11.1 The Rise of the Customer	175
11.2 Understanding Business Processes	176
11.3 From Theory to Practice	177
11.3.1 The Boundary Between Business Process and Application System	178
11.3.2 Business Processes and the Software Design Process	178
11.3.3 From Models to Action	181
11.3.4 Business Processes and Application Development	181
11.3.5 The Goal: Dynamic Business Processes	182

Appendix A. Customer Relationship Management Processes, Operational Roles, and Responsibilities	185
A.1 Processes	185
A.2 Operational Roles and Responsibilities	186

Glossary	189
