Introduction	xxiii

PART ONE: THE STRATEGIC BENEFITS OF COLLABORATIVE, WEB-ENABLED BUSINESS PROCESS MANAGEMENT

1	The strategic benefits of business community integration	3
	The beginnings of collaborative commerce	5
	The virtual organization	6
	Partnerships	7
	End-to-end business process management	8
2	E-business strategy	13
	The web-enabled organization	15
	The public sector	17
	Measurement of value and return on investment	18
	Outsourcing and application service providers	22

PART TWO: TECHNOLOGICAL, FINANCIAL, LEGAL AND RISK MANAGEMENT CONSIDERATIONS

3	Web-enabling technology	29
	The Internet and the Web	31
	Intranets and extranets	32
	Internet standards and protocols	32

	Web services	34
	Enterprise application integration	36
	Data storage	38
4	Mobile and wireless technology	41
	Introduction	43
	Broadband (high-speed packet-based wireless)	44
	Voice over packet networks	44
	General packet radio service	45
	Wireless application protocol	46
	Messaging	46
5	Electronic invoicing and payments	49
	Introduction	51
	Electronic data interchange	51
	Electronic invoice presentment and payment	51
	E-treasury	53
	Electronic bill presentment and payment	54
6	Statutory and risk management considerations	57
	Introduction	59
	Dynamic security policy	59
	Physical and technical security tools	62
	Industry standards	63
	Statutory considerations	64
 PART THREE: END-TO-END BUSINESS PROCESSES		
7	Enterprise resource planning	71
	Introduction	73
	ERP has facilitated process management	73
	Drivers for implementing ERP	74
	Advantages of ERP	74
	Problems encountered with ERP	75
	ERP in the twenty-first century	75

Service process optimization	77
Electronic document management	79
8 Business to employee	83
Human resource management	85
E-recruitment	87
E-learning	88
Information management delivering business intelligence	89
Data quality and compatibility	90
Content management systems	92
Enterprise portals	93
9 Supply/demand chain management	99
Introduction	101
Supply/demand chain strategy	103
E-manufacturing	105
Front-end systems	106
Logistics	107
E-tailing	107
Consumer marketplaces	108
10 E-procurement	111
Introduction	113
Procurement models	115
E-marketplaces	116
Open standards	121
11 Customer relationship management and e-marketing	131
Introduction	133
Customer relationship management	133
CRM automation	136
Key benefits of CRM	139
Pointers to CRM success	140
E-marketing	141

PART FOUR: HOW TO ANALYSE, RE-ENGINEER AND MANAGE BUSINESS PROCESSES

12	Business process analysis	147
	Introduction	149
	Activity/process analysis methodology	150
	Collection of activity/process information	153
	Steps in building a process model	156
13	Activity/process-based costing	163
	Introduction	165
	Research	165
	Signs of the need to review the costing system	166
	How ABC differs from traditional costing	166
	Choice of drivers	167
	ABC example	169
	Customer profitability	172
	Process-based modelling	173
14	Business process performance improvement	175
	Introduction	177
	Activity classification	177
	Activity-based cost management	178
	Removal of constraints	179
	Business process re-engineering	180
15	Change management	189
	Introduction	191
	Achieving successful change	191
	How not to do it	193
	Qualities of a change agent	195
16	Business process performance management	199
	Introduction	201
	Process-based budgeting	201
	Objectives and responsibilities	203
	Balanced performance measures and targets	204

Evaluation of alternative service levels	206
Priority-based budgeting	206
Process/activity-based monitoring and reporting	210
17 Process-based accounting incorporating Six Sigma	217
Introduction	219
Forward-looking characteristics of processes	219
Ten bottom-line management guidelines for PBA	219
Steps for implementing PBA	220
Steps for operating PBA	220
A process-based performance measurement framework	221
The Six Sigma way	222
Knowledge transfer systems	222
Notes and references	225
Executive summary	235
Index	247
