

Contents

	Preface	<i>xxi</i>
1	Introduction	1
1.1	History of Management	2
1.2	Terms and Definitions	3
1.3	Management Characteristics and Functions and Traditional Management Versus Modern Management	5
1.4	Engineering and Technology Management Challenges and Skill Requirements	6
1.5	Useful Information on Engineering and Technology Management	10
1.5.1	Books	10
1.5.2	Professional Organizations	11
1.5.3	Journals	11
1.6	Scope of the Text	12
1.7	Problems	12
	References	13

2	<u>Organizing and the Human Element</u>	15
2.1	Introduction	15
2.2	The Components of Organizing and Guidelines for Planning an Organization	16
2.3	Organizational Charts and Basic Relationships in Organizational Structures	17
2.4	Centralization and Decentralization of Organizations, Span of Control, and Delegation	19
2.5	Methods of Organization	23
2.5.1	Organization by Product	24
2.5.2	Organization by Function	24
2.5.3	Organization by Project	25
2.5.4	Organization by Territory	26
2.5.5	Matrix Organization	27
2.6	Functions of an Engineering Department and Guidelines for Organizing a New Engineering Department	27
2.7	Characteristics and Needs of an Engineer, Routes for an Engineer to Obtain Management Positions, and Transition of an Engineer to a Managerial Position	30
2.8	An Engineering Manager's Qualities and Activities	33
2.9	Motivating Others and Analyzing Team Characteristics	34
2.10	Committees and Staff Meetings	35
2.11	Displacing Managers and an Organization Size-Efficiency Model	38
2.11.1	An Organization Size-Efficiency Model	40
2.12	Problems	42
	References	43
3	<u>Tools for Making Effective Engineering and Technology Management Decisions</u>	45
3.1	Introduction	45

3.2	Discounted Cash Flow Analysis	46
3.2.1	Compound Interest and Present Value	46
3.2.2	Uniform Periodic Payment Amount and Present Value	48
3.3	Depreciation Analysis	49
3.3.1	Method I	50
3.3.2	Method II	51
3.3.3	Method III	52
3.4	Decision Trees	53
3.5	Optimization Techniques	56
3.5.1	Lagrangian Multiplier Method	56
3.5.2	Linear Programming Method	58
3.6	Learning Curve Analysis	61
3.7	Fault Tree Analysis	63
3.8	Forecasting	67
3.8.1	Forecasting Types and Time Horizons	68
3.8.2	Forecasting Steps, Methods, and Technique Selection Factors	69
3.8.3	Simple Average	70
3.8.4	Exponential Smoothing	71
3.9	Problems	73
	References	74
4	Project Selection and Management	77
4.1	Introduction	77
4.2	Terms and Definitions	78
4.3	Types of Information Required for Evaluating a Project	79
4.4	Project Selection Models	82
4.4.1	Benefit-Cost Ratio Model	82
4.4.2	Disman Model	83
4.4.3	Pacifico Model	85

4.4.4	Mottley and Newton Model	86
4.4.5	Calculated-Risk Model	87
4.4.6	Sobelman Model	88
4.4.7	Manley Model	89
4.4.8	Profitability Index Model	89
4.4.9	Relative Worth Index Model	90
4.4.10	Dean-Sengupta Model	90
4.4.11	Net Income Present Value Model	91
4.5	Need for Project Management, Project Organization Life Cycle Phases, and Project Management Functions and Procedure Characteristics	92
4.6	Project Manager Responsibilities, Qualifications, Selection, and Reporting	93
4.7	Project Management Methods	95
4.7.1	PERT Steps	96
4.7.2	CPM Steps	99
4.7.3	CPM/PERT Symbols	100
4.7.4	Essential Formulas and Network Critical Path Determination	101
4.7.5	CPM Advantages and Disadvantages	107
4.8	Project Management Benefits, Obstacles to Achieve Benefits, and Project Management Failure Factors	107
4.9	Problems	108
	References	109
5	Management of Engineering Design and Product Costing	113
5.1	Introduction	113
5.2	Design Types and Approach	114
5.3	Expectations from a Design Department and Product Design-Related Areas Requiring Decisions	115
5.4	Engineering Design Manpower and Tasks and Qualities of a Design Engineer	117

5.5	Design Reviews and Design Review Team, Team Chairperson, and Questions	119
5.6	Engineering Drawing Types, Uses, and Guidelines for Drafting Managers When Producing Original Drawings with Computer-Aided Design (CAD)	123
5.7	Reasons and a Procedure for Product Costing	124
5.8	Product Life Cycle Costing	126
5.8.1	Cost Estimation Models	130
5.9	New Product Pricing	132
5.9.1	Product Pricing Model	133
5.10	Problems	134
	References	135
6	Management of Proposals and Contracts	137
6.1	Introduction	137
6.2	Technical Proposal Types, Higher-Level Management Considerations in Proposal Development, and a Proposal Development Procedure	138
6.3	Proposal Components and Format and RFP	140
6.4	Classifications, Layout, and Benefits and Drawbacks of Engineering Specifications	143
6.5	Contract Provisions, Contract Type Determining Factors, and Contract Types	144
6.6	Engineering Contract Documents and Contractor Selection Factors	148
6.7	Contract Negotiation Approach and Negotiator's Characteristics	149
6.8	Mathematical Models for Contracting	150
6.9	Problems	153
	References	153

7	Creativity and Innovation	155
7.1	Introduction	155
7.2	Creativity and Invention Definitions, Classifications of Inventions, and Factors in Creativity	156
7.3	Creativity Climate, Ways and Guidelines to Develop Creativity, and Creative Problem-Solving Processes	157
7.4	Types of Barriers to Creative Thinking, Management Barriers to Creativity, and Innovation Prevention Reasons	160
7.5	Individual Creative Person, Engineer, and Manager Characteristics; Attributes of a Manager of Creative People; and a Noncreative Person's Characteristics	162
7.6	New Idea Generation, Presentation, Evaluation, and Elimination	163
7.6.1	New Idea Generation	163
7.6.2	New Idea Presentation	163
7.6.3	New Idea Evaluation	165
7.6.4	New Idea Elimination	165
7.7	Creativity Methods	166
7.7.1	Group Brainstorming Method	166
7.7.2	Checklist Method	167
7.7.3	CNB Method	168
7.7.4	Gordon Method	169
7.7.5	Forced-Relationships Method	169
7.7.6	Single-Person Method	169
7.7.7	Attribute-Listing Method	170
7.7.8	And-Also Method	170
7.7.9	Tear-Down Approach	170
7.8	Problems	170
	References	171
8	Concurrent Engineering	173
8.1	Introduction	173

8.2	Concurrent Engineering Objectives and Basic Principles	174
8.3	Applying the Concurrent Engineering Concept	177
8.3.1	Concurrent Engineering Concept Introduction—Important Related Factors	179
8.4	Concurrent Engineering Team and Associated Areas	179
8.4.1	Concurrent Engineering Team Formation	179
8.4.2	Concurrent Engineering Team Plan	180
8.4.3	Concurrent Engineering Team Charter	180
8.4.4	Concurrent Engineering Team Leadership and Mentor's Role	181
8.4.5	Team Management and Limitations	182
8.4.6	Good Concurrent Engineering Team Characteristics	183
8.5	Concurrent Engineering Process–Related Methodologies and Techniques	183
8.6	Useful Concurrent Engineering Guidelines and Guidelines for Handling Conflicts in the Concurrent Engineering Environment	185
8.7	Concurrent Engineering Advantages, Savings Due to Concurrent Engineering, and Its Risks	187
8.8	Problems	189
	References	190
9	Value Engineering	193
9.1	Introduction	193
9.2	Value Engineering Terms and Definitions	194
9.3	Value Engineering Objectives and Reasons for the Unnecessary Cost and for Not Having a Value Engineering Program	195
9.4	Determining the Need for a Value Engineering Program	196
9.5	Value Engineering Phases	198

9.5.1	Team Selection Phase	198
9.5.2	Information Collection Phase	200
9.5.3	Brainstorming Phase	201
9.5.4	Alternative Evaluation Phase	203
9.5.5	Alternative Development Phase	203
9.5.6	Recommendation Phase	204
9.5.7	Implementation Phase	204
9.6	Application of Value Engineering to New Products— Related Factors and Value Engineering Techniques	204
9.7	Management Responsibilities to the Value Engineering Program, Test for Value Questions, and Poor Value Factors	205
9.8	Value Engineer's Functions and Characteristics and Value Engineering—Related Savings and Benefits	206
9.9	Problems	208
	References	208
10	Reverse Engineering	211
10.1	Introduction	211
10.2	Reverse Engineering Terms and Definitions	212
10.3	Reverse Engineering Objectives, Clone-Surrogate Reverse Engineering, and Basic Considerations	212
10.4	Reverse Engineering Method	214
10.5	Reverse Engineering Documentation	215
10.6	Software Reverse Engineering	216
10.6.1	Software Reverse Engineering Tasks and Tools	216
10.6.2	Software Reverse Engineering Application Areas and Project Selection	218
10.6.3	Software Reverse Engineering Benefits, Difficulties, and Related Pointers	220
10.7	Reverse Engineering—Related Court Cases and Laws	221
10.8	Reverse Engineering Team and Tips for Success	223

10.9	Traditional and Reverse Engineering Design Processes and Future Reverse Engineering Challenges	224
10.10	Problems	224
	References	225
11	Configuration Management	227
11.1	Introduction	227
11.2	Configuration Management Terms and Definitions	228
11.3	Types of Product Changes and Their Reasons During Design and Production	230
11.4	Reasons for and Objectives of Having a Configuration Management System	230
11.5	Configuration Management Plan and Disciplines	231
11.5.1	Identification	232
11.5.2	Control	233
11.5.3	Configuration Status Accounting	234
11.6	Configuration Management Organization	235
11.6.1	Configuration Control Board	236
11.7	Configuration Manager Responsibilities and Qualities	238
11.8	Successful Configuration Management Characteristics and Guidelines for Controlling Products' Configuration and Documentation	239
11.9	Symptoms of Ineffective Application of Configuration Management	239
11.10	Software Configuration Management	240
11.11	Problems	242
	References	243
12	Total Quality Management	245
12.1	Introduction	245

12.2	TQM-Related Terms and Definitions	246
12.3	TQM and Traditional Quality Assurance Program Versus TQM	246
12.4	TQM Principles and Components	248
12.5	Deming's Approach to TQM	250
12.6	TQM Methods and Techniques	252
12.6.1	Cause-and-Effect Diagram	253
12.6.2	Pareto Diagram	255
12.6.3	Quality Function Deployment (QFD)	256
12.6.4	Hoshin Kanri (Quality Policy Deployment)	257
12.6.5	Check Sheets	257
12.7	Facts About TQM-Related Organizational Changes and Barriers to TQM Success	258
12.8	Problems	258
	References	259
13	Maintenance Management	263
13.1	Introduction	263
13.2	Maintenance Management Terms and Definitions	264
13.3	Maintenance and Maintenance Engineering Objectives and Good Maintenance Advantages	265
13.4	Maintenance Department Functions and Organization	266
13.5	An Effective Maintenance Management Approach, Maintenance Program Effectiveness Evaluation Questions for Managers, and Maintenance Manager's Qualities and Functions	268
13.6	Effective Maintenance Management Elements	271
13.6.1	Maintenance Policy	271
13.6.2	Data-Recording System	271
13.6.3	Work Order	272
13.6.4	Job Planning	272

13.6.5	Preventive Maintenance	273
13.6.6	Material Control	273
13.7	Performance Measurement Indexes	276
13.7.1	Index I	276
13.7.2	Index II	276
13.7.3	Index III	277
13.7.4	Index IV	277
13.7.5	Index V	278
13.7.6	Index VI	278
13.7.7	Index VII	278
13.7.8	Index VIII	279
13.7.9	Index IX	279
13.7.10	Index X	280
13.7.11	Index XI	280
13.7.12	Index XII	280
13.7.13	Index XIII	281
13.8	Problems	281
	References	282
14	Warranties, Ethics, and Legal Factors	285
14.1	Introduction	285
14.2	Reasons for the Warranty Needs and Basic Options to Meet Warranty Obligations	286
14.3	Government, Commercial, and Consumer Warranties	287
14.3.1	Consumer and Government Warranties' Comparison	287
14.3.2	Consumer and Commercial Warranties' Comparison	288
14.4	Warranty Components and Management	289
14.5	Reasons for the Growth in Warranty Claims, Predictions for Warranty Problems in the Future, and Warranty Cost Estimation Models	290

14.5.1	Warranty Cost-Estimation Models	291
14.6	Need for Ethics, Ethical Concerns, and an Example of Unethical Behavior	292
14.7	General Guidelines for Ethical Behavior and Ethics Code for Engineers	293
14.7.1	Basic Canons	294
14.7.2	Rules of Practice	294
14.7.3	Obligations	295
14.8	Limitations of Ethics Codes	296
14.9	Product Liability and Patents	297
14.10	Copyrights and Trademarks	299
14.11	Problems	300
	References	300
15	Reengineering	303
15.1	Introduction	303
15.2	Reengineering Terms and Definitions	304
15.3	Reengineering Facts and Figures	304
15.4	Reasons for Reengineering and When to Reengineer	306
15.5	Product, Process, and Systems Management Level Reengineering	307
15.6	Reengineering Process	308
15.7	Reengineering Tools and Methodology	309
15.7.1	Reengineering Tools	310
15.7.2	A Business Process–Reengineering Methodology	312
15.8	Reengineering Team and Manpower	314
15.8.1	Reengineering Team	314
15.8.2	Reengineering Manpower	314
15.9	Reengineering Guidelines and Product-Reengineering Risks	315

15.10	Reengineering Assumptions, Success and Failure Factors, Top Management Reengineering–Related Mistakes, and Reengineering Sources of Resistance and Myths	317
15.11	Problems	319
