ACKNOWLEDGMENTS	xvii
INTRODUCTION	xix
1 Introduction to UNIX	1
1. Uncover the History of the UNIX System	2
2. Explore the Elements of a Computer System	3
3. Show the UNIX Timeline	7
AT&T Invents UNIX	7
BSD Is Born	8
The System V Releases	8
AT&T/Sun Deal	9
The Internet Worm	9
OSF/1	9
Mach	10
Linux Is Introduced	10
Red Hat	10
Versions of UNIX Today	10
Why UNIX Is Popular	11
Modular UNIX	15
The Kernel	15
4. Discover the Roles of the UNIX System Administrator	18
Support the Network	19

Handle Peripherals	19
Manage System Upgrades	20
Actively Monitor System Security	20
Maintain System Accounts	21
Advance Your Knowledge	21
Teacher	22
Politician	22
Parent	23
Police Officer	23
Friend	24
Mastery Check	25
2 Basic UNIX Commands	27
1. Explore the UNIX Shell	28
2. Investigate Basic UNIX Commands	31
cat	34
date	35
hostname	37
find	38
ls	42
strings	49
ps	52
uname	59
Project 2-1	62
Mastery Check	63
3 Using System Administration Tools	65
1. Managing Solaris Using Admintool	67
Add a New User	67
UNIX Account Example	72
Modifying a User	73
Deleting a User	74
Adding a New Group	76
Modifying a Group	79
Deleting a Group	79
2. Manage Linux Accounts with Userconf	80
Add a New User	80
Modifying a User	86
Delete an Existing User	88
Adding a New Group	90
3. Manage HP-UX Using SAM	92
Add a New User	94
Modifying a User	98
Delete an Existing User	99

Adding a New Group	101
Deleting an Existing Group	103
4. Set Up Better Account Security	105
Expiring a Password Using Admintool	106
Expiring a Password Using Userconf	106
Expiring a Password Using SAM	107
Regular Password Changes Using Admintool	109
Regular Password Changes Using Userconf	110
Turning Off an Account Using Admintool	111
Turning Off an Account Using Userconf	113
Automatic Account Expiration Using Userconf	114
Mastery Check	116
4 Software Package Management Tools	117
1. Discover Solaris Package Tools	119
pkginfo	119
pkgadd	123
pkgrm	124
2. Discover HP-UX Package Tools	126
swlist	126
swinstall	130
Project 4-1	130
swremove	133
Project 4-2	133
3. Discover Linux Package Tools	136
Project 4-3	137
Mastery Check	139
5 Maintaining UNIX Users	141
1. Discover the /etc/passwd File	142
2. Discover the /etc/group File	146
3. Discover the /etc/shadow File	149
4. Explore UNIX Account Tools	152
passwd	153
pwck	156
grpck	159
useradd	159
userdel	161
usermod	162
groupadd	163
groupdel	164
groupmod	164
logins	164
vipw	166

Project 5-1	166
Mastery Check	168
6 File Systems, Disks, and Tools	171
1. Explore a UNIX File System	172
2. Uncover a Disk Partition	176
3. Determine a Mounted File System	179
Creating a New File System	180
Using the Solaris Format Tool	180
Using the Linux fdisk Tool	186
4. Create a New File System	187
Checking the New File System	188
Mounting UNIX File Systems	191
Unmounting a UNIX File System	193
Project 6-1	193
Mastery Check	195
7 System Security	197
1. Define a Security Policy	199
2. Maintain System Patches	200
3. Uncover System Hardening	201
Elimination of Unnecessary Services	201
Configuration System Profiles	202
3. Investigate Security Tools	205
The NMAP Tool	206
Project 7-1	218
The Secure Shell Facility	220
ssh	222
scp	223
ssh-keygen	223
ssh-agent/ssh-add	225
The Sudo Tool	226
Project 7-2	228
Mastery Check	229
8 Backup and Restore	231
1. Define Backup Elements	232
User Perspective	233
Density and Form Factor	233
Network Bandwidth	235
Remote Sites	236
Backup Methods	236
2. Explore Backup Tools	238
dump	238

dd	240
restore	240
tar	241
Project 8-1	243
Mastery Check	244
9 System Operations	247
1. Determine the Boot Process	248
2. Explore the Shutdown Process	249
Halting the System	251
Rebooting the System	252
Normal System Shutdown	255
Determining When the System Was Halted	256
3. Uncover UNIX Operating Levels	257
The Default Run Level	261
List the Current Run Level	261
Single-User Mode	262
Boot to Single-User Mode	263
Project 9-1	263
Mastery Check	265
10 The TCP/IP Suite	267
1. Uncover the General Seven-Layer OSI Network Model	270
Application Layer	270
Presentation Layer	270
Session Layer	271
Transport Layer	271
Network Layer	271
Data Link Layer	271
Physical Layer	271
2. Discover the TCP/IP Protocol Architecture	272
Process Layer Services	273
End-User Tools	274
Additional Protocols	274
System Services	275
Additional Services	280
Host-to-Host Layer	281
Internet Layer	292
Internet Control Message Protocol	299
3. Discover the Address Resolution Protocol	304
Packet Format	306
ARP Cache	307
Data Link Address Format	308
Mastery Check	312

11	Basic Network Tools	315
1.	Explore the Network Address Table on a UNIX System Using arp	316
	Displaying the ARP Cache	317
	Deleting an ARP Cache	321
	Adding an ARP Cache Entry	322
2.	Control Network Interfaces Using Ifconfig	324
	Listing Available Interfaces	325
	Controlling Interface State	328
	Modifying Interface Parameters	329
	Special Configurations Parameters	331
	Logical Interfaces	332
3.	Monitor Network Operations using Netstat	334
	Displaying Active Network Sessions	335
	Displaying Interface Information	340
	Display Routing Information	342
	Display Multicast Information	344
	Display Protocol Statistics	345
4.	Verify Network Connectivity Using Ping	346
	Determine System Availability	347
	Show Basic Network Performance	350
	Additional Command Options	354
5.	Gather Network Information with Lanscan	356
	Project 11-1	357
	Mastery Check	358
12	Advanced Network Tools	361
1.	Monitor Network Traffic with the tcpdump Tool	362
	Operating Modes	364
	Display Options	368
	Using Packet Filters	371
	Address Primitives	372
	Protocol Primitives	374
	Operators	375
	Miscellaneous Primitives	377
	Qualifiers	378
	Tcpdump Command Examples	379
2.	Execute the traceroute Command to Show Network Connectivity	382
	Reading Output	384
	Changing Characteristics	387
	Display Options	389
3.	Verify Basic Operations Using the landiag Command	390
	Project 12-1	392
	Mastery Check	393

13	Overview of SNMP	395
1.	Discover SNMP Basics	397
	SNMP Applications	399
2.	Uncover MIBs	399
	Object Types	401
	Sample MIB Object	404
	SNMP Tables	406
	Accessing Objects	410
	Standard and Private MIBs	410
	SNMP Communities	411
3.	Explore SNMP Versions	412
	SNMP Protocol Operation	416
	SNMP Response Codes	422
	Transmission of an SNMP Message	423
	Connectionless Protocol	424
4.	Investigate SNMP Master and Subagent	424
	Mastery Check	427
14	Using the Domain Name System	431
1.	Discover How the Domain Name System Works	432
2.	Explore Both DNS Server and Client Components	435
	Domain Files	435
	Processes	442
	DNS Tools	444
	Explore DNS Client Components	449
	Project 14-1	451
	Mastery Check	452
15	Using NIS	453
1.	Overview of Network Information Services	454
2.	Discover NIS Components	456
	Databases	456
	Processes	457
	Tools	458
3.	Setting Up a NIS Server	463
	Project 15-1	463
4.	Configure a NIS Client	466
5.	Setting Up a Secondary NIS Server	467
	Mastery Check	469
16	SNMP System Management Tools	471
1.	Discover Elements of System Management	472
	System Heartbeat	473
	System Up/Down Messages	473

System Process Activity	474
Network Information	474
System Configuration Control	474
2. Explore the UCD SNMP Package	475
Common Command-Line Options	476
Environment Variables	482
3. Use the UCD Magement Tools	482
Snmpdelta Command	482
Snmpget Command	483
Snmpgetnext Command	485
Snmpnetstat Command	486
Snmpset Tool	491
Snmpstatus Tool	496
Snmptable Tool	497
Snmpstat Tool	497
Snmptranslate Tool	498
Snmptrap Tool	499
Snmptrapd Server	500
Snmpwalk Tool	502
Snmpbulkwalk Tool	505
Mastery Check	507
17 Using Network File System	511
Versions of NFS	512
1. NFS Server Uncovered	513
The <i>nfsd</i> Process	513
The <i>lockd</i> Process	514
The <i>statd</i> Process	515
The <i>mountd</i> Process	515
2. Mounting Remote File System	515
The <i>dfstab/export</i> Files	516
Share/Export File Options	517
3. Exploring NFS Tools	519
<i>exportfs</i>	519
<i>share/unShare</i> (Solaris Only)	520
<i>showmount</i>	521
<i>nfsstat</i>	522
4. Configuring NFS Clients	526
5. Controlling the File System Mount Table	528
Mastery Check	531
18 File Transfer Protocol	533
1. Explore a Sample FTP Session	535
Obtaining a Directory Listing	537
Configuration Options	539

Retrieving a File	539
Sending a File	540
Monitoring File Transfers	541
2. Discover FTP Commands	542
3. Controlling FTP Access	543
4. Configure Anonymous FTP	546
Setting Up Anonymous Access	548
5. Log FTP Activity	549
Enable FTP logging	549
Enable the syslog Facility	551
Project 18-1	553
Mastery Check	554
19 Important System Administration Tasks/Information	555
1. Communicate with Users on the System	556
2. Increase System Swap Space	558
List Swap Space	558
Add More Swap Space	559
3. Control Root Access	560
4. Display System Configuration Information	561
The /proc Directory	564
Project 19-1	568
Mastery Check	569
20 Using DHCP	571
1. Use The Solaris DHCP Configuration Manager	574
Starting the Solaris DHCP Configuration Manager	574
Configuring DHCP Services for the First Time	575
Using the Configuration Manager	583
Adding IP Addresses to the DHCP Server	585
2. Configure DHCP Clients	593
Manual DHCP Configuration	593
Set Up Automatic and Permanent DHCP Configuration	594
Obtain DHCP Agent Status Information	595
Configuration of DHCP Clients	596
Viewing Network Information on Windows	598
Mastery Check	604
21 Using rdist	607
1. Create an rdist Distribution File for Synchronizing Files	609
2. Debug an rdist Configuration	611
3. Investigate rdist Commands	612
Task Notifications	614
Excluding Files	616
Invoking Commands	617

4. Explore an rdist Example	618
Project 21-1	620
Mastery Check	623
A Answers to Mastery Checks	625
Module 1: Introduction to UNIX	626
Module 2: Basic UNIX Commands	626
Module 3: Using System Administration Tools	626
Module 4: Software Package Management Tools	627
Module 5: Maintaining UNIX Users	627
Module 6: File Systems, Disks, and Tools	628
Module 7: System Security	628
Module 8: Backup and Restore	629
Module 9: System Operations	629
Module 10: The TCP/IP Suite	629
Module 11: Basic Network Tools	630
Module 12: Advanced Network Tools	630
Module 13: Overview of SNMP	631
Module 14: Using Domain Name System	632
Module 15: Using NIS	632
Module 16: SNMP System Management Tools	632
Module 17: Using Network File System	633
Module 18: File Transfer Protocol	633
Module 19: Important System Administration Tasks/Information ..	634
Module 20: Using DHCP	634
Module 21: Using rdist	635
B Tools at a Glance	637
C Overview of MIB-II	641
Discover MIB-II	642
System Group	643
Interfaces Group	647
Index	657
