SMserver™

Short Message Service Center (SMSC) for GSM and IS41 wireless networks.

OTAserver™

Over-the-Air Service Provisioning (OTASP) for CDMA and TDMA wireless networks.

CALEAserver™

SS8 offers the solution that allows carriers to meet Communications Assistance for Law Enforcement Act (CALEA) requirements today.

Signaling Gateway

There are a lot of gateways. But SS8's distributed environment and high performance make for a stand-out in the field.

Distributed7™

SS8's latest generation of SS7 development platforms is designed for high availability carrier applications. The clustered multi-host architecture enables SS7 to run on multiple computers simultaneously under a single SS7 point code. Distributed7 takes SS7 reliability beyond fault tolerant platforms.

Connect7™

Host independent controller board embedded with full Signaling System No.7 (SS7) functionality.

Easy7™

The ideal link concentration solution for smaller networks. This mini-STP can be in the same room with multiple SS7 signaling points with the result that fewer SS7 links can handle your network traffic. For some, the pay-back can be astonishingly short.
