WHAT IS SS7?

Signaling System No.7 (SS7) is a global standard for telecommunications defined by the International Telecommunication Union (ITU) Telecommunication Standardization Sector (ITU-T).

SS7 defines the procedures and protocol by which network elements in the public switched telephone network (PSTN) exchange information over a digital signaling network to effect wireless (cellular) and wireline call setup, routing and control, as well as, network management and maintenance.

POCKET GUIDE OVERVIEW

This tutorial provides an introduction to basic SS7 network concepts. SS8 is also sponsoring the ss7.com web site where you can find more information on SS7, industry standards and other useful resources.
