Preface	ix
List of Contributors	xiii
1 Summary and Introduction	1
1.1 Introduction	1
1.2 Network Architecture	3
1.3 Protocol Stack	4
1.4 Compact Open Core	5
1.5 Conclusions	8
2 UMTS Air Interface	11
2.1 Introduction	11
2.1.1 3GPP	13
2.1.2 3GPP2	14
2.2 UMTS Air Interface	14
2.2.1 Layer 1	15
2.2.2 Layer 2	48
2.2.3 Layer 3	62
2.3 CDMA2000 Air Interface	70
2.3.1 Layer 1	71
2.3.2 Layer 2	76
2.3.3 Layer 3	85
2.4 Compatibility Issues	90
2.4.1 3GPP-3G	91
2.4.2 3G-2G	93
2.5 Enhancing 3G Capabilities	95
2.5.1 Adaptive Antennas	98
2.5.2 Space-Time Transmission Diversity	113
2.5.3 Turbo Coding	121
2.5.4 Multiuser Detection	128
2.6 Conclusions	132
3 Network Architecture	137
3.1 Introduction	137
3.1.1 Requirements for 3G Systems	138
3.1.2 International Standardisation Activities	138
3.1.3 General Aspects of 3G Systems	140
3.1.4 Chapter Outline	141

3.2	Generic Network Model	142
3.2.1	<i>Physical Model</i>	142
3.2.2	<i>Functional Model</i>	144
3.3	Network Architecture	146
3.3.1	<i>3GPP Release 99</i>	147
3.3.2	<i>3GPP Release 4</i>	156
3.3.3	<i>3GPP Release 5</i>	160
3.3.4	<i>An Overview of PS Domain Protocols</i>	166
3.4	UMTS Terrestrial Radio Access Network	169
3.4.1	<i>UTRAN Architecture</i>	169
3.4.2	<i>UTRAN Functions</i>	174
3.4.3	<i>Control and User Plane Separation in UTRAN</i>	176
3.4.4	<i>UE-UTRAN Association</i>	177
3.4.5	<i>The Uu Interface</i>	178
3.4.6	<i>The Iu Interface</i>	178
3.4.7	<i>Key Features of Iu Interface</i>	179
3.4.8	<i>Protocol Architecture across Iu</i>	181
3.4.9	<i>Signalling Procedures across Iu</i>	187
3.4.10	<i>Iur Interface</i>	198
3.4.11	<i>Iub Interface</i>	205
3.4.12	<i>Establishment of Data Bearers in UTRAN</i>	209
3.5	Network Access Security	215
3.5.1	<i>Key Security Principles</i>	216
3.5.2	<i>Weaknesses in Second-Generation Security</i>	217
3.5.3	<i>Security Objectives</i>	217
3.5.4	<i>Security Architecture</i>	218
3.5.5	<i>Network Access Security</i>	220
4	Emerging Wireless Applications and Protocols	239
4.1	Introduction	239
4.2	Wireless Application Protocol (WAP)	240
4.2.1	<i>WAP Markets</i>	240
4.2.2	<i>WAP Architectures and Protocols</i>	243
4.2.3	<i>WAP Securities</i>	251
4.2.4	<i>WAP Interoperability</i>	252
4.2.5	<i>WAP and 3Gwireless</i>	254
4.2.6	<i>WAP Services and Applications</i>	256
4.2.7	<i>WAP System Solutions</i>	260
4.3	i-Mode	262
4.3.1	<i>What is i-Mode?</i>	262
4.3.2	<i>i-Mode Compatible HTML</i>	262
4.3.3	<i>i-Mode Network Structure</i>	263
4.3.4	<i>Features of i-Mode</i>	264
4.3.5	<i>i-Mode Applications</i>	265
4.3.6	<i>i-Mode Developing Strategy</i>	266
4.4	Other Wireless Mobile Internet Application Technologies	267
4.5	Conclusions	268
5	Initiatives in 4G Mobile Design	271
5.1	Introduction – Who Needs 4G? What is 4G?	271
5.1.1	<i>Social Background and Future Trends</i>	271
5.1.2	<i>Trends in ITU-R</i>	271
5.1.3	<i>Wireless Access Systems Related to 4G Mobile</i>	277
5.1.4	<i>Key Technologies</i>	277

5.2	Microwave Propagation	277
5.2.1	<i>Microwave Mobile Propagation Characteristics in Urban Environments</i>	279
5.2.2	<i>Microwave Mobile Propagation Characteristics in Residential Environments</i>	285
5.3	Adaptive Antennas	288
5.3.1	<i>Introduction</i>	288
5.3.2	<i>Algorithms</i>	290
5.3.3	<i>Space-time Equaliser Using Adaptive Antennas</i>	291
5.3.4	<i>Implementation of the Space-time Equaliser</i>	293
5.3.5	<i>CDMA Adaptive Array Antennas</i>	295
5.3.6	<i>SDMA (Spatial Division Multiple Access)</i>	296
5.3.7	<i>Summary</i>	300
5.4	Multiple Access Schemes	300
5.4.1	<i>Comparison and Improvement Technology of Multiple Access Schemes</i>	301
5.4.2	<i>Multi-carrier CDMA</i>	302
5.4.3	<i>Summary</i>	307
5.5	CDMA Dynamic Cell Configuration	307
5.5.1	<i>Teletraffic Load in Cellular Radio Systems</i>	307
5.5.2	<i>Teletraffic Management and Access Methods</i>	308
5.5.3	<i>Channel Assignment</i>	309
5.5.4	<i>Control Methods in CDMA Systems</i>	309
5.5.5	<i>Principle of Dynamic Cell Configuration</i>	310
5.5.6	<i>Evaluation of DCC</i>	311
5.5.7	<i>Characteristics in Up and Downlinks</i>	312
5.5.8	<i>Future Works</i>	314
5.6	CDMA Cellular Packet Communications	315
5.6.1	<i>Transmission Power Control for Connection-less Services</i>	316
5.6.2	<i>Service Fairness in a System with Site Diversity Reception</i>	318
5.6.3	<i>Accommodation of Asymmetric Traffic</i>	322
5.6.4	<i>Summary</i>	325
5.7	Network Architecture and Teletraffic Evaluation	326
5.7.1	<i>Reducing Interruptions During Handoff</i>	327
5.7.2	<i>Reducing Forced Terminations During Handoff</i>	327
5.7.3	<i>Handover Control Appropriate for Multimedia Communications Using ATM and IP Technologies</i>	331
5.7.4	<i>A Mobile Communication Traffic Model</i>	332
5.8	TCP over 4G	336
5.8.1	<i>Transmission Rate Control</i>	339
5.8.2	<i>Transmission Power Control for CDMA Wireless Systems</i>	340
5.8.3	<i>Steady State Analysis for Combining of Transmission Power Control and Packet Transmission Rate Control</i>	341
5.8.4	<i>Performance Evaluation</i>	342
5.8.5	<i>Conclusions</i>	343
5.9	Decoding Technique in Mobile Multimedia Communications	343
6	Conclusions	357
	Index	361
