

Table of Contents

1.	Introduction	1
2.	Linear differential operators	3
3.	Separation of variables	5
4.	Fourier Series	9
5.	Bessel's inequality	14
6.	Convergence results for Fourier series	16
7.	Differentiation and Integration of Fourier Series	20
8.	Half-range Fourier series	23
9.	General Intervals	25
10.	Application to Laplace's equation	27
11.	Sturm-Liouville problems and orthogonal functions	33
12.	Bessel Functions	37
13.	Fourier Transforms	41
14.	Inverse Fourier Transforms	47
15.	Applications to Differential Equations	50
16.	Plancherel's and Parseval's Identities	54
17.	Band Limited Functions and Shannon's Sampling Theorem	56
18.	Heisenberg's Inequality	59
