Clinical approach

1

History taking in patients with haematological disease	2
Physical examination	4
Splenomegaly	6
Lymphadenopathy	8
Unexplained anaemia	10
Patient with elevated haemoglobin	12
Elevated WBC	14
Reduced WBC	16
Elevated platelet count	20
Reduced platelet count	22
Easy bruising	24
Recurrent thromboembolism	26
Pathological fracture	28
Raised ESR	30
Serum or urine paraprotein	32
Anaemia in pregnancy	34
Thrombocytopenia in pregnancy	36
Prolonged bleeding after surgery	38
Positive sickle test (HbS solubility test)	40
